XINJE Wechat

COMPANY INTRODUCTION

Wuxi Xinje Electric Co., Ltd. (XINJE) is a well-known national enterprise specializing in the R&D and application of industrial automation products.

Since its establishment, the company has adhered to the tenet of "Independent Innovation, Promptness and Pragmatism", striving to enhance its R&D capabilities and product quality, and applying advanced scientific and technological achievements to strengthen its overall strength. Through continuous innovation and pioneering efforts, Xinje has remained at the forefront of the industry. It has successively been recognized as a High-Tech Enterprise, a Key Project Unit under the Six Major Actions for Strengthening Industry in Jiangsu Province, a Qualified Unit for Implementing Intellectual Property Standards in Jiangsu Province, a Provincial Engineering Technology Research Center, a Provincial Enterprise Technology Center, and a Provincial Engineering Center, and has obtained numerous patented technologies.

The company's core products include Programmable Logic Controllers (PLC), Human-Machine Interfaces (HMI), servo control systems, and variable frequency drives. It also provides a comprehensive range of advanced automation equipment, including intelligent machine vision systems, teaching-based robotic arms, robots, and information-based network solutions. Xinje closely serves end customers, provides competitive customized solutions for equipment manufacturers in segmented industries, and offers advanced and reliable automation product solutions for high-quality equipment suppliers. The company continuously helps enterprises improve productivity, reduce costs, and promote the common growth of corporate value and customer value.

To date, Xinje Electric has established 32 offices and 300 distributors across China, covering the entire country. Overseas, it has set up 1 subsidiary and 20 agents covering Europe, the Americas, Southeast Asia, the Middle East, and Africa. Its extensive sales network ensures comprehensive product demand, technical support, personnel training, and other services for numerous users worldwide.

Xinje Electric currently has more than 2,600 employees, an office building covering 20,000 square meters, an independent factory covering 71,000 square meters, 1 R&D center, 4 laboratories, and 42 training bases. The company also cooperates with many universities to cultivate young and outstanding technical talents.

With dedication, sincerity, a proactive team spirit, and efficient operations, Xinje has achieved remarkable results. In December 2016, Xinje was successfully listed on the Main Board of the Shanghai Stock Exchange (Stock Code: 603416). Guided by the business philosophy of "Innovation, Quality, Service", the company continuously develops and designs more reliable products and improves product quality. It is committed to becoming "a world-class supplier of intelligent and automated overall solutions" and building a well-respected brand in the industrial automation field.

PLC overview

I²C series

The I²C series controller is based on the X86 high-performance processor and supports programming on the XS Studio/XDPro platform. Strong operational control capability, supporting up to 1ms 256 axes. Windows version fusion control meets the multi-purpose needs of information technology+control, machine vision+motion control, and more.

XF series   Blade type PLC

The XF series PLC is designed with a brand new blade structure, featuring a thinner body, stronger and richer expansion capabilities. Through a high-speed backplane bus, it is connected for more stable, reliable and high real-time performance.

XL series   Slim type PLC

XL series slim PLC card design, ultra-thin appearance, compact and practical, outstanding cost-effectiveness, can meet the vast majority of functional requirements in smaller spaces.

XM series   Medium-to-Large PLC

The newly designed XM series medium-to-large PLC can meet the demands for redundant and stable operation, open ecosystem compatibility, harsh usage environments, and information network security protection required in complex field applications, effortlessly building large-scale, complex control systems.

XD series   Small PLC

The XD series small PLC has the characteristics of fast speed, stable performance, complete functions, and wide applicability, which can meet the diverse needs of users.

IO series

Diverse structural designs, diverse product types, and a complete IO system product matrix can provide customers with diverse choices based on actual on-site needs.

PLC product model selection topology

Xinje PLC products encompass 6 major product lines with over 400 models, offering a wide variety suitable for different control scenarios. The product series can be divided into XF, XS, XA, XD, and XL. In terms of product performance, they can be categorized into conventional PLCs, network PLCs, high-performance controllers, and industrial intelligent controllers. Functionally, they can be classified into logic control types and motion control types.

Logic control PLCs are primarily used for point control and also support 2-10 axes positioning control functions. Motion control PLCs include the XS, XA, XDH, and XLH series, which support 2-256 axes synchronous motion control.

Network-based PLCs, high-performance controllers, and industrial intelligent controllers support Ethernet communication and Ethernet/IP communication; high-performance controllers and industrial intelligent controllers also support EtherCAT bus control functionality.
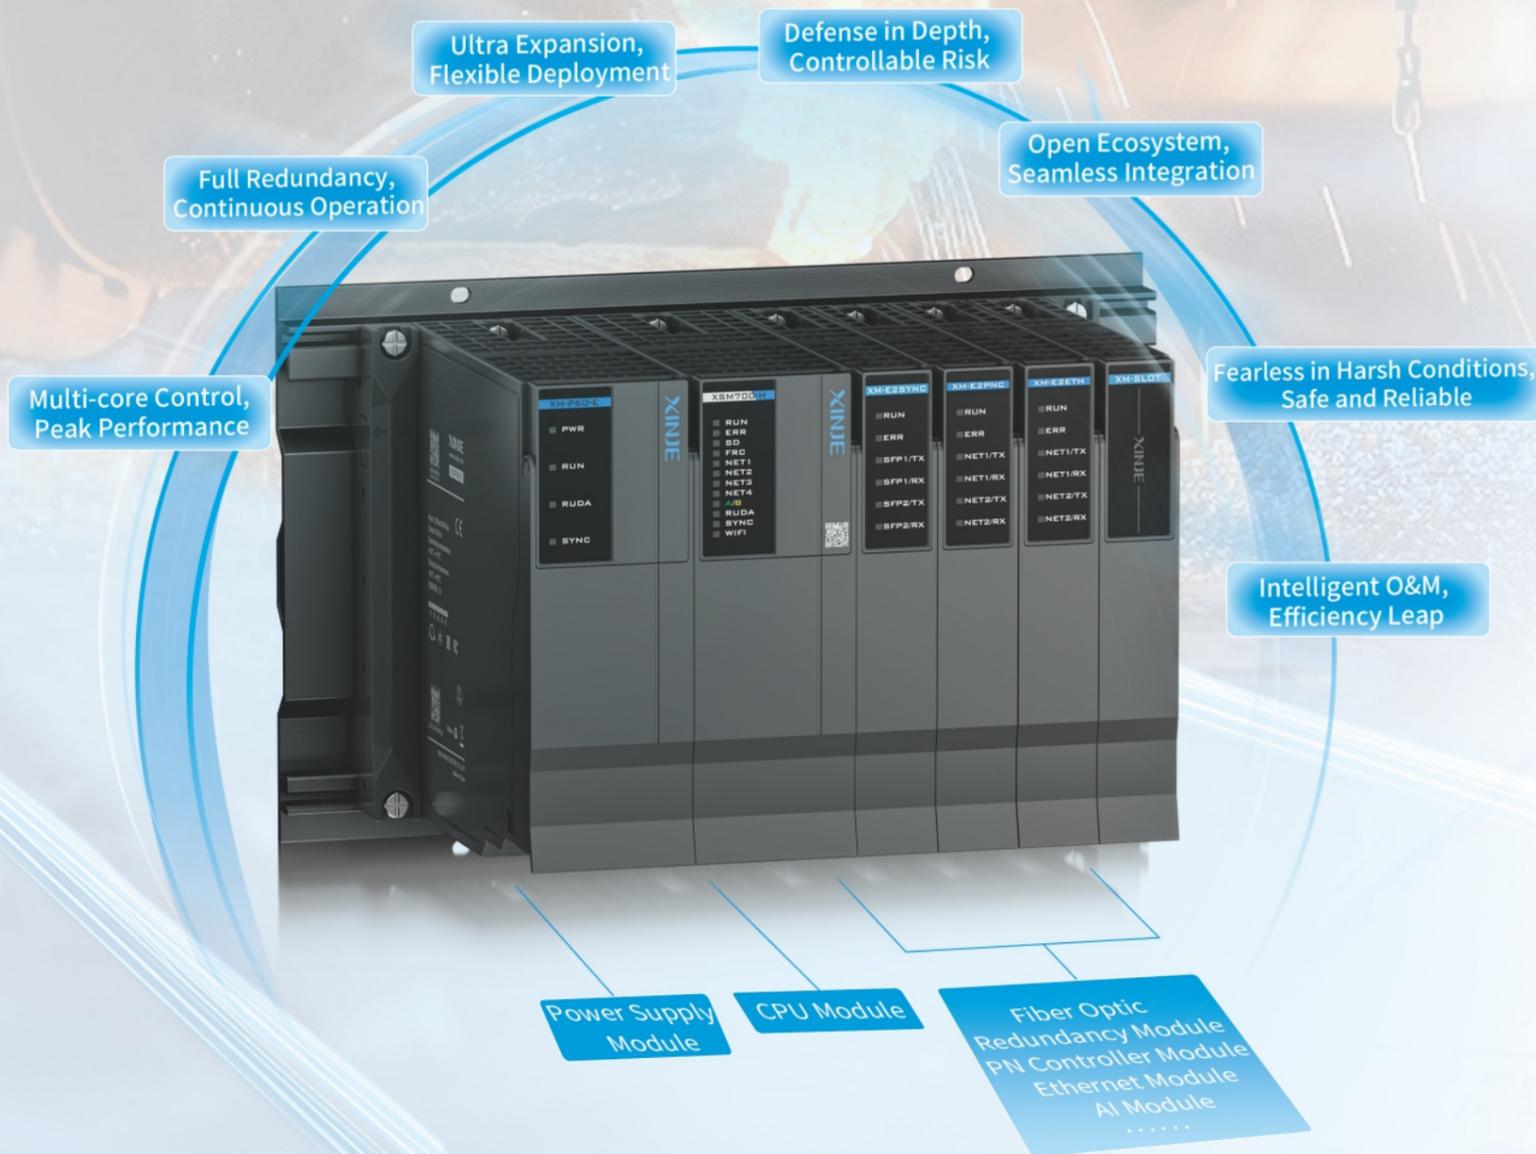

The XSF5 series and I/O modules feature a blade-style design with an ultra-thin body, supporting up to 32 expansion modules. The XSA series of industrial intelligent controllers, based on the X86 processor, offer superior performance, capable of controlling up to 256 axes with a synchronous cycle of 256 axes per 4 milliseconds.

XM Series Medium-to-Large PLC

More than just FA, designed for PA

Achieving compatible retrofitting, upgrading, and expansion, helping to realize benefits and maintenance

- Ultra Expansion, Flexible Deployment
- Defense in Depth, Controllable Risk
- Full Redundancy, Continuous Operation
- Open Ecosystem, Seamless Integration
- Multi-core Control, Peak Performance
- Fearless in Harsh Conditions, Safe and Reliable
- Intelligent O&M, Efficiency Leap

Power Supply Module

......

7 Core Advantages - Foundation of PF/FA Industry

Multi-core Control, Peak Performance

Equipped with an eight-core CPU, bit instruction speed as fast as 1ns, easily handles complex multi-tasking; system redundancy switchover time as low as 20ms, ensuring uninterrupted critical processes.

Full Redundancy, Continuous Operation

Supports full-chain redundancy including CPU, power supply, rack, network, fieldbus, etc., achieving 7*24, 365-day uninterrupted operation, reducing unplanned downtime losses;
MTBF: ≥200,000 hours; MTTR: <8 hours, maximizing equipment utilization.

Ultra Expansion, Flexible Deployment

Rich variety of I/O module types, supports ultra-large scale of 100,000 points, flexible configuration and easy expansion, full series supports hot-swapping for convenient maintenance;
Channel-level isolation and diagnostic functions, including but not limited to overtemperature, short circuit, open circuit, over-limit, power supply missing, etc., for easy maintenance.

Defense in Depth, Controllable Risk

Fully domestically produced and independently controllable software and hardware, compliant with IEC 62443, building a trusted security foundation.

Open Ecosystem, Seamless Integration

Provides abundant fieldbus and industrial Ethernet options, integrates third-party devices and network equipment, breaking down information silos;

PROFINET EtherNet/IP Modbus OPC MQTT
NTP

Complies with PLCopen standards, supports multiple programming languages; integrates basic algorithm libraries, rich PID instructions, and process automation industry process libraries.
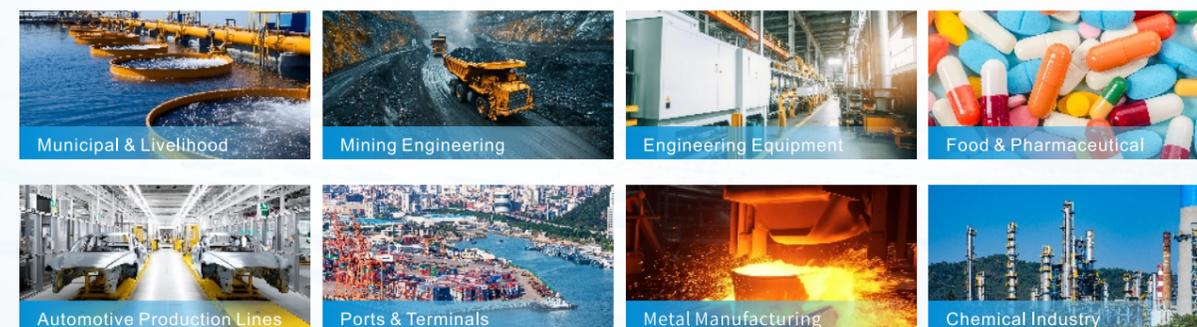

Fearless in Harsh Conditions, Safe and Reliable

Meets rigorous reliability test standards including electromagnetic compatibility (Level 4 EMC), strong anti-vibration (2G), environmental adaptability (-40°C~70°C, -1000~5000m), while also satisfying G3/3C4 corrosion protection requirements, fearless in salt spray, mold, and humid environments.

Intelligent O&M, Efficiency Leap

Provides a full lifecycle toolchain for design, simulation, debugging, and diagnosis;
Supports wireless/wired login and WEB access, enabling comprehensive equipment monitoring and fault diagnosis via network.

XSF Series blade type PLC

4 Quad-core MPU,
Major Performance Upgrade

Blade structural design, achieving slim body

- Compared with XDH-60A64-E, the body size is reduced by 70%, significantly reducing installation space.

Approximately **70%** reduction in volume compared to the previous generationXDH-60A64-E

Easy to debug and maintain

- The entire XSF series products, including the main control unit and expansion unit, support firmware self updating, and new features are available with just one click.
- Equipped with Type-C port, it can connect to the upper computer, and online debugging only requires a mobile data cable.

Type-c

Slide switch

SD card port

More powerful scalability

- Up to 32 XF extension modules can be connected locally.
- The new high-speed backplane bus allows for the expansion of functional modules such as high-speed counting, pulse output, flying shooting, and communication.

High-speed backplane bus

Up to **32**

*Note: Modules such as high-speed counting, pulse output, flying shoot, and communication are under development. Stay tuned!

- Support importing and exporting device data and project files through USB flash drives and TF cards (version V2.3.0 supports).
- Standard system slide switch, which can immediately stop PLC operation without power outage.

Production MES Traceability

- Supports internal/external network isolation to ensure network information security;
- NTP synchronization for accurate timestamp recording;
- Supports rich protocol integration: OPC UA, MQTT, HTTP

XS Studio

Outstanding motion control ability

- The XSF main control unit can communicate with various EtherCAT standard protocol devices, such as Xinje XF/XL series distributed IO, DS5C1/DS5C2 series servo drivers, VH6 series freguency converters, DP3CL series stepper drivers, etc.

Up to 64 axes EtherCAT bus control with short synchronization cycle.

High speed bus control 8 axes	High speed bus control 16 axes	High speed bus control 32 axes	High speed bus control 64 axes
Synchronization cycle **1ms**	Synchronization cycle **1ms**	Synchronization cycle **2ms**	Synchronization cycle **4ms**
XSF5-A8	XSF5-A16	XSF5-A32	XSF5-A64

Multiple networks union,convenient interwork

- The XSF main control unit is equipped with 3 RJ45 ports, 1 CAN communication port, and 1 RS485 port.
- Supports multiple protocols, including Mdbus TCP, UDP, OPC UA, TCP/IP, Ethernet/IP, CANopen, and Modbus communication.
- Support dual IP settings, achieve isolation between internal and external networks of equipment, and assist in the digital transformation of factories.

Applicable Industries

3C	Logistics	Photovoltaics	Medical	Machine Tools	Packaging

PLC
HMI
Industrial informatization
Servo system

IoT Industrial Controller

XSA Series Industrail Intelligent Controller

XSA Series Controller based on a high-performance processor, supports programming on the XS Studio platform. Adopts a unique Taihu stone-inspired exterior design, with rich built-in interfaces and powerful motion control capabilities. The Windows version further meets multi-purpose demands such as information + control, machine vision + motion control, all in one machine.

Comprehensive Industry Applications

Applicable in industries such as 3C (Computer, Communication, Consumer Electronics), photovoltaics, warehousing, lithium batteries, semiconductors, electronics, laser, and more.

3C	Photovoltaic	Warehousing	Lithium battery
semiconductors	electronics	laser	......

As a Standalone High-Performance Motion Controller

Enhances quality and efficiency for traditional industries with complex processes, such as printing, packaging, aluminum profiles, hygiene products, woodworking, filling, HVAC, and others.

Printing equipment	Packaging equipment	Aluminum profile processing equipment	Hygienic product processing equipment
woodworking	filling	HVAC	......

Distinctive Technology Integration

Allows WIN & Linux systems to implement functions such as CAD graphics processing (CAM), MES client, AGV algorithms, etc.;
The XSA Series integrates motion control, logic control, IPC fusion applications, machine vision, HMI, and other functions into one, resulting in a more streamlined overall product topology.

Multi-purpose Machine

Through APIs, motion control, logic control, data processing, machine vision, HMI, and more can be integrated. A single industrial computer consolidates functions such as PLC, motion controller, vision industrial computer, and HMI display, resulting in a more streamlined overall product topology.

Virtualization Technology

Based on Hypervisor virtualization technology, it ensures independence between systems. If the Windows system crashes, the real-time system remains unaffected; moreover, the performance of the real-time system is not impacted by high CPU load in the Windows system.
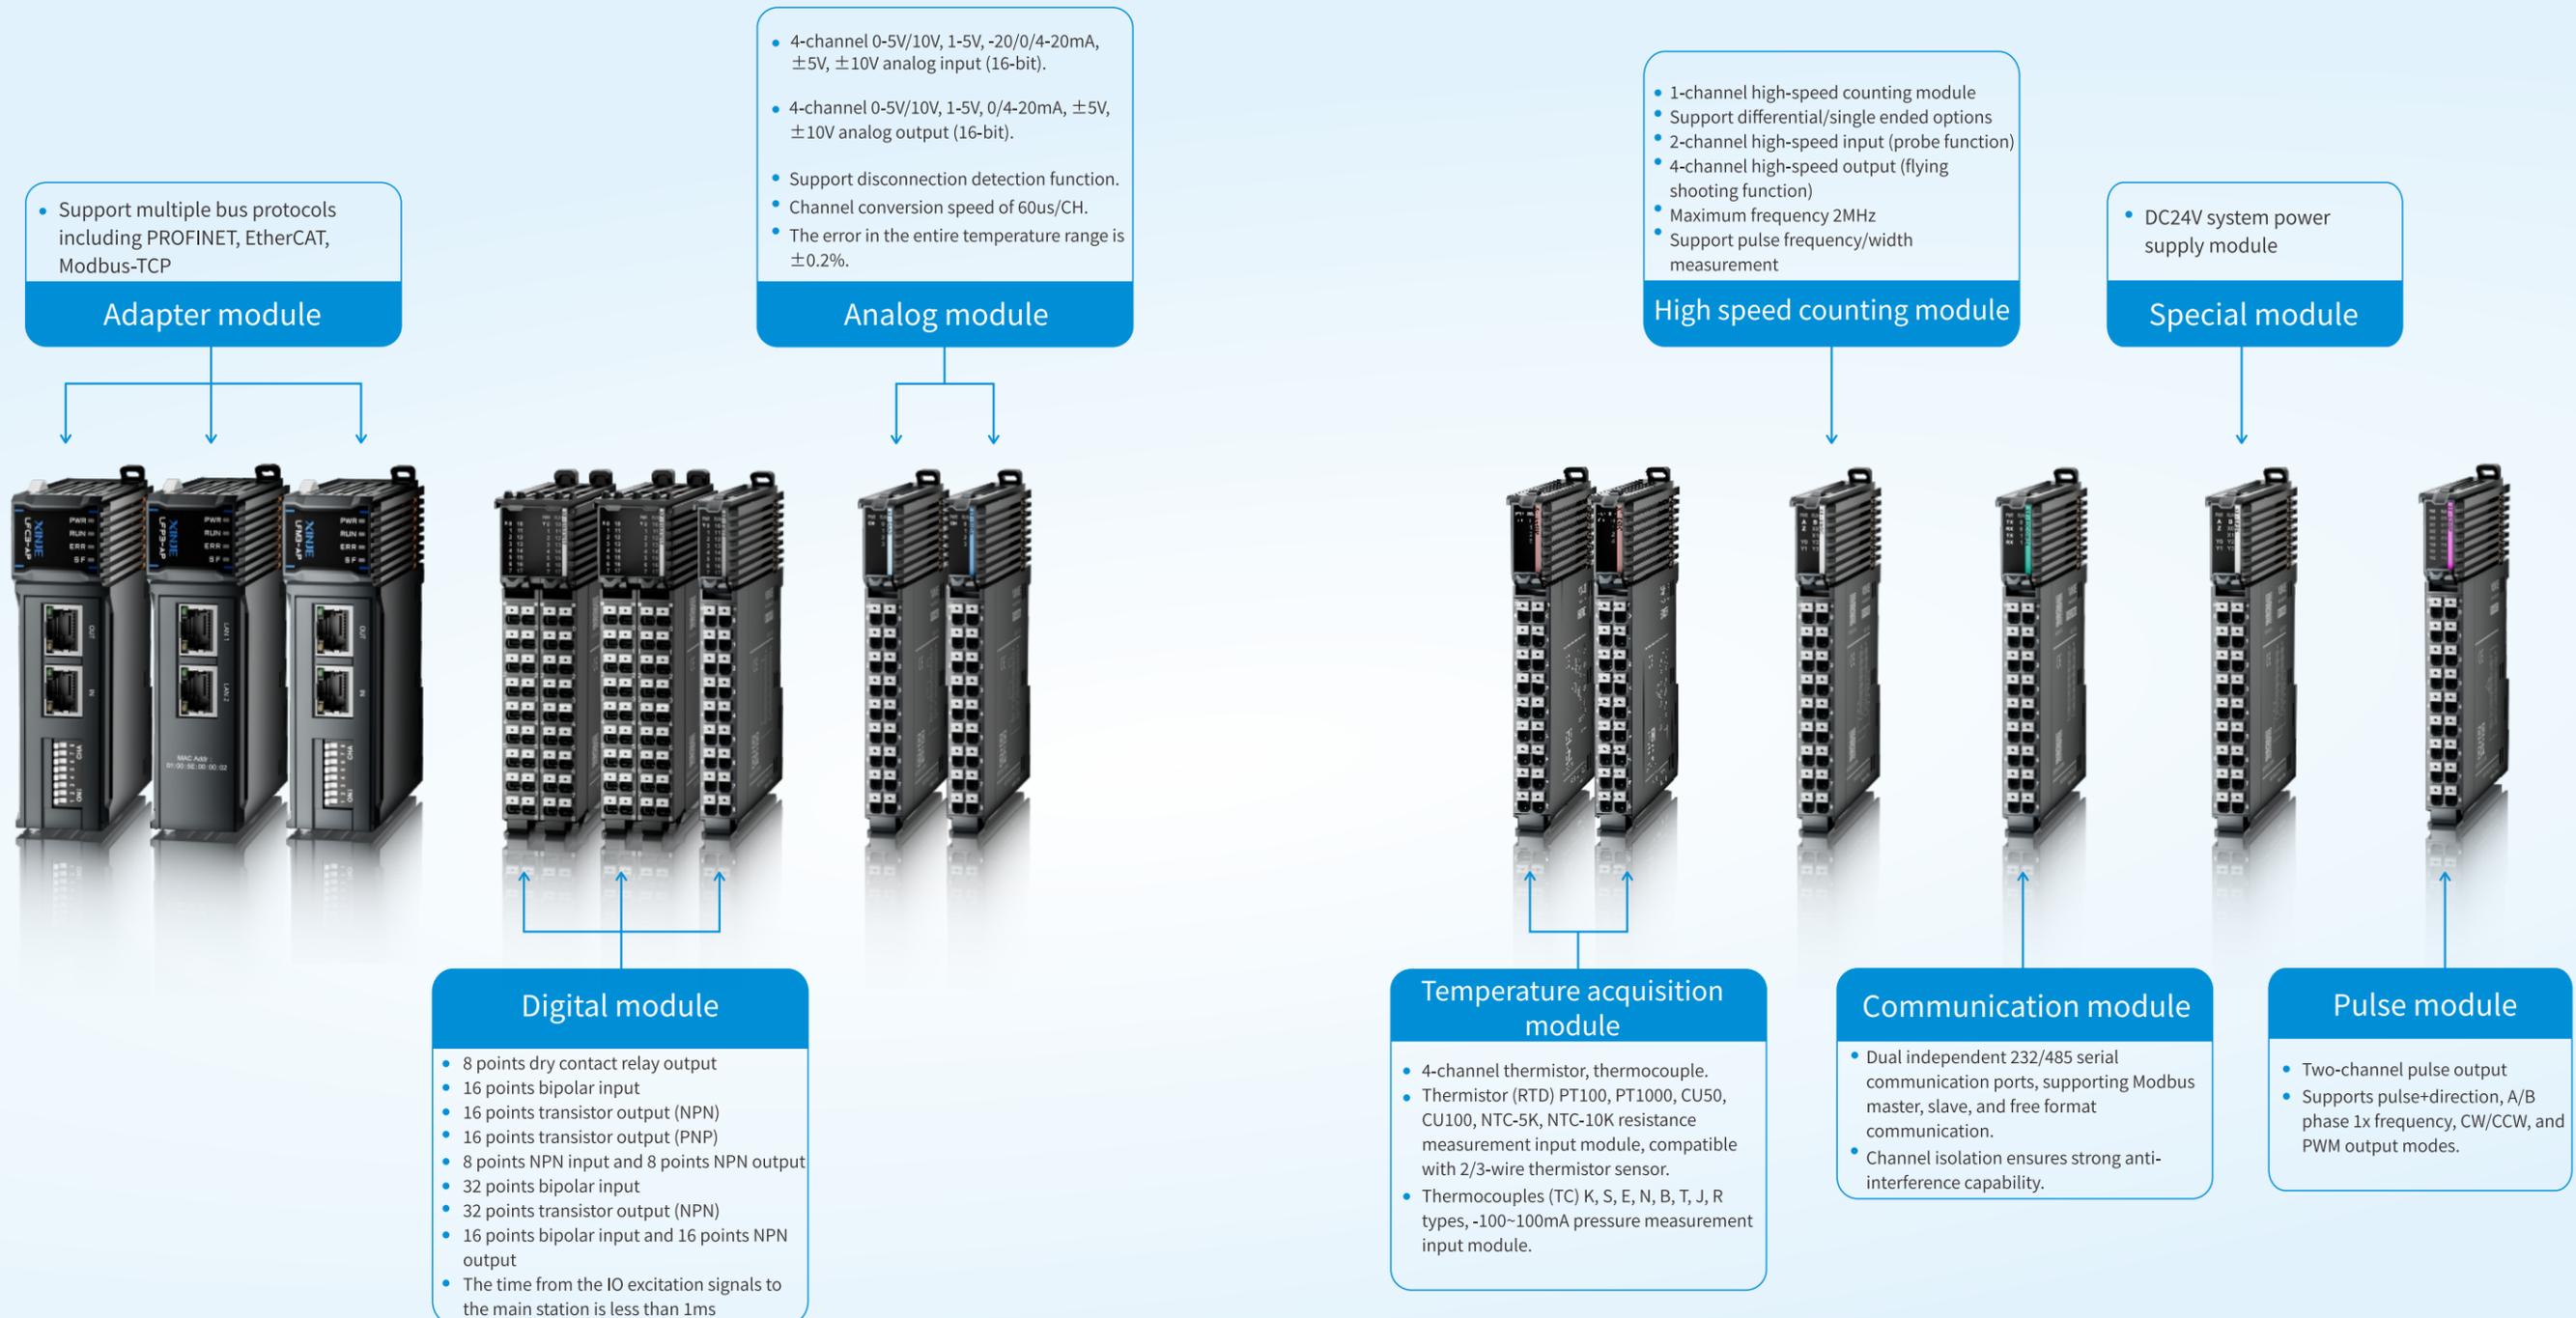

High reliability

The product design fully complies with strict PLC standards, making it more suitable for industrial use on site.

User-friendliness

Developed based on the XS Studio platform, it supports the IEC61131-3 standard and offers a variety of programming languages including LD, ST, FBD, and SFC. It enables faster development and debugging with real-time debugging, online monitoring, and simulation capabilities.

XF series --New generation IO system

Rich module types, supporting up to 32 IO modules

- 4-channel 0-5V/10V, 1-5V, -20/0/4-20mA, ±5V, ±10V analog input (16-bit).
- 4-channel 0-5V/10V, 1-5V, 0/4-20mA, ±5V, ±10V analog output (16-bit).
- Support disconnection detection function.
- Channel conversion speed of 60us/CH.
- The error in the entire temperature range is ±0.2%.

- 1-channel high-speed counting module
- Support differential/single ended options
- 2-channel high-speed input (probe function)
- 4-channel high-speed output (flying shooting function)
- Maximum frequency 2MHz
- Support pulse frequency/width measurement

- Support multiple bus protocols including PROFINET, EtherCAT, Modbus-TCP

- DC24V system power supply module

Adapter module

Analog module

High speed counting module

Special module

Digital module

- 8 points dry contact relay output
- 16 points bipolar input
- 16 points transistor output (NPN)
- 16 points transistor output (PNP)
- 8 points NPN input and 8 points NPN output
- 32 points bipolar input
- 32 points transistor output (NPN)
- 16 points bipolar input and 16 points NPN output
- The time from the IO excitation signals to the main station is less than 1ms

Temperature acquisition module

- 4-channel thermistor, thermocouple.
- Thermistor (RTD) PT100, PT1000, CU50, CU100, NTC-5K, NTC-10K resistance measurement input module, compatible with 2/3-wire thermistor sensor.
- Thermocouples (TC) K, S, E, N, B, T, J, R types, -100~100mA pressure measurement input module.

Communication module

- Dual independent 232/485 serial communication ports, supporting Modbus master, slave, and free format communication.
- Channel isolation ensures strong anti-interference capability.

Pulse module

- Two-channel pulse output
- Supports pulse+direction, A/B phase 1x frequency, CW/CCW, and PWM output modes.

Motion API

Motion API is a PC-based motion control system in the form of an industrial computer, utilizing an open X86 architecture, a microsecond-level Windows real-time system, and mainstream pure software EtherCAT communication.

It encompasses multiple instruction libraries, supports various programming languages (such as C++/C#), allows for kernel-level algorithm secondary development, is compatible with commonly used Fanuc G code, and supports 16-axis synchronous high-speed and high-precision trajectory interpolation, as well as advanced algorithms like look-ahead and AFM filtering. Deeply integrated with Xinje's servo, VFD, stepper drives, and I/O modules, it forms a comprehensive industry solution widely applied in

Six major advantages, interpreting efficiency and flexibility

Architectural innovation, multi-dimensional integration

The Motion API series products integrate motion control, logic control, machine vision, and other functionalities into one, greatly simplifying the system architecture. This integration addresses the inconvenience caused by repeatedly switching between multiple software during the programming process and enhances development efficiency.

Control software integration, industrial interconnection

Utilizing soft PLC simplifies the topology structure, avoids wear and tear on PCI interfaces, and reduces hardware failure rates.

The Motion API series products can be deployed on either Windows or Linux systems as needed, easily integrating third-party software and bridging IT/OT data channels.

Process confidentiality, reliable barrier

The Motion API series products support secondary development at the algorithm kernel level in the form of C language and can be mounted on hardware platforms for execution, offering a high degree of confidentiality.

Shared memory, lightning-fast interaction

The Motion API series products utilize shared memory for data interaction, capable of handling megabyte-level data exchanges every millisecond, with system files and configuration files transmitted in seconds.

High-efficiency axis control, performance pioneer

The Motion API series products are based on the X86 hardware architecture, boasting exceptional performance with a single instruction operation cycle of 5ns, an interpolation cycle of 1ms, and the ability to control up to 256 axes in 1ms, with a maximum of 256 axes per single channel.

Multiple programming pptions, flexible and user-friendly

The Motion API series products support various programming languages such as C#, C++, LabView, VB, and VC, making projects more flexible and easier to maintain.

Highly integration

The PLC, HMI, motion control, vision, PC APP and other functions are integrated in a hardware carrier, which improves the development rate.

Open ecosystem, creating a comprehensive industrial information network

The Motion Api product series integrates the advantages of traditional PLC and IPC platforms, combining the powerful control capabilities of PLCs with the open ecosystem of Windows/Linux. It allows for the operation of motion control, logic control, machine vision, and high-speed data acquisition for automation all on a single platform. Additionally, it facilitates information databases, cloud platform interaction, and supports a wide range of bus protocols. It also accommodates third-party software integration, making it convenient for equipment manufacturers to integrate IT/OT applications.

Motion API

Quickly meet market demands for customization, bus-based systems, high performance, expansion interfaces, multi-step processes, and complete supply solutions.

Widely used in 3C testing, semiconductor, woodworking, laser cutting, dispensing, photovoltaic and other industries.

Aluminum profile drilling and milling machine

The aluminum profile drilling and milling machine is used for processing aluminum profile door and window materials. It features a wide range of basic machining templates and various hinge patterns. With a CNC host system, it offers high processing speed and precision, maintaining a graphic accuracy error within 0.05mm. This machine boasts rich functionality and powerful performance, applicable in numerous fields such as laser cutting, 3C inspection, dispensing, photovoltaics, and semiconductors.

Robot

The robot system developed based on API features a rich set of instructions and is suitable for various scenarios. It supports debugging, is easy to program, and simple to operate. It offers advanced algorithms for smooth transitions at high speeds and allows users to load their own algorithm libraries to conduct higher-level development in combination with the Motion API.

3C inspection

During the movement of objects, there is no need to stop as the camera takes images and uses vision to calculate the position of objects, significantly improving production efficiency. The API-based 3C inspection system features high-speed responsiveness, ensuring that the transmitted IO signals reach the camera as quickly as possible. The camera can continuously move and capture images without stopping, and it can continuously output signal points.

Dispensing

Dispensing machines require precise control of the glue amount, consistency in dispensing, and high-quality stability during efficient operations. The API-based dispensing system ensures equipment stability and meets the demands of high-speed operations. The host software integrates functions such as algorithms, configuration, and diagnostics. It is easy to debug, supports data diagnostics and preview, and facilitates subsequent parameter adjustments, offering higher integration and suitability for experienced IT developers.

■ Platform complementarity

The XA series and the XSA series complement each other in terms of programming platforms, with the XA series supporting the XDPPro programming platform and the XSA series supporting the XS Studio programming platform.

■ High performance

Based on Intel high-performance x86 processors, it features a small size but offers faster response and greater computing power, with instruction execution capabilities reaching the ns level.

■ Fusion control

Offer optional Windows or Linux support to meet multifunctional needs such as informatization and control, machine vision and motion control. It also supports MotionAPI functionality.

■ Rich interfaces

The system supports differential encoder input and features frequency measurement, high-speed counting, high-speed pulse output, and pulse width modulation to meet various

XSA series

Based on the X86 platform, Intel high-performance processor, and the response speed is faster.
The self-developed XS Studio programming platform, which can reference
many standard function libraries, adopt the IEC61131-3 programming
standard, support six programming languages (ST, SFC, FBD, CFC, LD, IL),
and develop Xinje proprietary function blocks, instruction libraries and
system libraries, which can significantly improve user programming efficiency.

① 128MB Program Capacity
② Dual EtherCAT Master Control
③ EtherCAT Remote I/O Support
④ Ethernet Communication
⑤ Virtualization Technology
⑥ Built-in UPS
⑦ Optional Windows or Linux Operating System
⑧ High Reliability: Exceeds IPC Standards

XFseries blade type PLC

Compact, faster, and stronger motion control ability

The XSF5 series adopts a blade structure with a compact body, complies with the PLCopen programming specification, supports 6 programming languages, and can expand up to 32 local modules.

| Features

■ Blade structural design, achieving slim body

· Compared with XDH-60A64-E,the body size is reduced by 70%, significantly reducing installation space.

■ Easy to debug and maintain

· The entire XSF series products, including the main control unit and expansion unit, support firmware self updating, and new features are available with just one click.
· Equipped with Type-C port, it can connect to the upper computer, and online debugging only requires a mobile data cable.
· Support importing and exporting device data and project files through USB flash drives and TF cards.
· Standard system slide switch, which can immediately stop PLC operation without power outage.

■ More powerful scalability

· Up to 32 XF extension modules can be connected locally.
· The new high-speed backplane bus allows for the expansion of functional modules such as high-speed counting, pulse output, flying shooting, and communication.

■ Flexible and open, free programming

· XSF supports the Codesys platform, can be adapted to Xinje XS Studio programming software, meets the IEC61131 standard and PLCopen programming specification.

■ Multiple networks union, convenient interwork

· The XSF main control unit is equipped with 3 RJ45 ports,1 CAN communication port, and 1 RS485 port.
· Supports multiple protocols, including Mdbus TCP, UDP, OPC UA, TCP/IP, Ethernet/IP, CANopen, and Modbus communication.
· Support dual IP settings, achieve isolation between internal and external networks of equipment, and assist in the digital transformation of factories.

IoT Industrial Controller

Wide range of applications and can meet the diversified needs of users

Network control

Ethernet series PLC is equipped with 2 Ethernet communication ports as standard to easily build an intelligent network system.

High speed pulse output
With 2~10 axes positioning control function

Up to 100KHz pulse output.

Pulse instruction is simple and powerful.

Multiple communication ports
Can realize rich communication functions

XD series PLC has 5 communication ports at most. Support RS232, RS485, bus communication (EtherCAT&CAN), Ethernet (only for Ethernet type PLC), can connect VFD, meter and other peripheral devices, communication network can be set up freely.

High speed operation Fast data processing

Non-Ethernet type PLC
The basic instruction processing speed 0.02~0.05us, scanning time 10000 steps 0.5ms, program capacity 256kB~512kB, and processing speed are about 12-15 times that of XC series.

Ethernet type PLC
The basic instruction processing speed 0.01~0.03us, scanning time 10000 steps 0.2ms, program capacity 1MB~4MB, and processing speed are about 2-3 times that of XDM series.

Bus control High speed communication, cost saving

The bus network can be easily constructed through standard EtherCAT bus and CAN bus, and multi-device control can be realized with minimal wiring.

XDH series PLC has EtherCAT motion control master station function.

High speed signal acquisition
With 3~10 channels high speed counter

By selecting different counters, it can count in single-phase incremental mode (the max frequency can reach 80kHz), AB phase mode (double frequency and quadruple frequency are optional, and the max frequency can reach 50KHz) and differential mode (the max frequency can reach 200kHz).

High speed control is realized by simple high-speed counting instruction.

Strong expansion capability

XD series PLC basic units can be equipped with rich I/O expansion module, analog input and output module, temperature control module, BD board and left expansion module, which can easily realize analog control for various purposes.

The data exchange between the expansion module and the ontology has changed from the original parallel port communication mode of XC series to the SPI serial port communication mode of XD series, so the data exchange speed is faster than that of the original XC series (2ms/AD).

Economic type

XD1 series

The function is relatively simple. It can carry out logic control, data operation and other general functions. It does not support right expansion module, left expansion ED module or expansion BD board.

① Program capacity 256KB
② I/O sequential control
③ Max I/O 32 points
④ Basic instruction 0.02~0.05us
⑤ RS232, RS485
⑥ X-NET fieldbus

	FlashROM register	Power off holding FD	5120 points FD0~FD5119			
		Special SFD	2000 points SFD0~SFD1999			
		Security register FS	48 points FS0~FS47			

*Note: ①Only the PLC with transistor output has high speed positioning function；②The "-" in the table indicates that this model doesn't have this function；
③Special refers to system occupancy, cannot be used for other purposes.

PLC
HMI
Industrial informatization
Servo system
Frequency inverter
Stepping system
Vision system
IoT Industrial Controller

Basic type

XD2 series

The functions are complete. In addition to the basic data processing function, it also has special functions such as pulse output, high-speed counting, pulse width modulation, frequency measurement and so on. It supports left expansion ED and BD (16 points are not supported), and does not support right expansion module, which can meet the basic use needs of users.

① Program capacity 256KB
② I/O sequential control
③ Max I/O 60 points
④ Basic instruction 0.02~0.05us
⑤ RS232, RS485
⑥ X-NET fieldbus
⑦ 2 channels 100KHz pulse output
⑧ 3 channels high speed counting (single phase max 80K, AB phase max 50K)

*Note: ①Only the PLC with transistor output has high speed positioning function；②The "-" in the table indicates that this model doesn't have this function；
③Special refers to system occupancy, cannot be used for other purposes.

Enhanced type

XD5 series

In addition to all the functions of standard PLC, it has faster processing speed (about 15 times that of XC series), larger internal resource space and 2 ~ 10 channels of high-speed pulse output. It supports the connection of right expansion module, expansion BD board (not supported by 16 points) and left expansion ED module, and supports SD card expansion (except 16 points), which can meet various requirements.

① Program capacity 512KB
② I/O sequential control
③ Max I/O 592 points
④ Basic instruction 0.02~0.05μs
⑤ RS232, RS485
⑥ X-NET fieldbus
⑦ 2~10 channels 100KHz pulse output
⑧ 3~10 channels high speed counting (single phase max 80K, AB phase max 50K)
⑨ USB port high speed download (max 12Mbps)

Differential type

XD5-xDnTm series

Xd5 series high-speed differential PLC is designed according to the fast response demand of servo motor. It does not need conversion circuit, wiring is convenient and standard equipped with all functions of enhanced PLC.

① Program capacity 512KB
② I/O sequential control
③ Max I/O 560 points
④ Basic instruction 0.02~0.05μs
⑤ RS232, RS485
⑥ X-NET fieldbus
⑦ 4 axes 920KHz differential pulse output
⑧ 4 channels 1MHz differential high speed counter
⑨ USB port high speed download (max 12Mbps)

*Note: ①The "-" in the table indicates that this model doesn't have this function；②Special refers to system occupancy, cannot be used for other purposes.

Motion control type

XDM series

In addition to all functions of standard PLC, it has faster processing speed (about 15 times that of XC Series), larger internal resource space, two-axis linkage, interpolation and follow-up functions, and supports external SD card for data storage. Support the connection of right expansion module, expansion BD board and left expansion module.

① Program capacity 512KB~1.5MB
② I/O sequential control
③ Max I/O 572 points
④ Basic instruction 0.02~0.05µs
⑤ RS232, RS485
⑥ X-NET fieldbus
⑦ 4~10 axes 100KHz pulse output
⑧ 4~10 channels high speed counter (single phase up to 80K, AB phase up to 50K)
⑨ Follow-up function
⑩ USB port high speed download (max 12Mbps)
⑪ Linear/arc interpolation

EtherCAT bus type

XDH series

Compatible with most functions of XDM, it has larger program capacity and faster processing speed, supports Ethernet communication, EtherCAT bus, motion control commands such as interpolation and follow-up, expansion module and left expansion ED module.

① Program capacity 2~4MB
② Ethernet communication
③ Max I/O 572 points
④ Basic instruction 0.01~0.05μs
⑤ RS232, RS485, RJ45
⑥ X-NET fieldbus
⑦ 4 axes 100KHz pulse output
⑧ 4 channels high speed counter (up to 200KHz)
⑨ 3-axis linear/arc interpolation
⑩ Follow-up function
⑪ EtherCAT communication
⑫ 16 channels electronic CAM (XDH-30A16L cannot support)

Basic unit general specification

General specification

Item	Specification
Insulation voltage	DC500V above 2MΩ
Anti noise	Noise voltage 1000Vp-p 1us pulse 1 minute
Air	No corrosive and combustible gas
Ambient temperature	0°C~60°C
Ambient humidity	5%~95% (no condensation)
Installation	It can be fixed with M3 screws or directly installed on the guide rail
Grounding (FG)	The third grounding (It shall not be grounded in common with strong current system)

*Note: XDH series ambient temperature is 0°C~50°C.

Power supply specification

■ AC power supply

Item	Specification
Rated voltage	AC100V~240V
Allowable voltage range	AC90V~265V
Rated frequency	50/60Hz
Allowable instantaneous power off time	Interruption time ≤0.5 AC cycle interval ≥1s
Impulse current	Max 40A below 5ms/AC100V Max 60A below 5ms/AC200V
Maximum power consumption	15W (16 points)/ 30W (24 points and up)
Power supply for sensor	24VDC±10% 16 points max 200mA 32 points max 400mA

■ DC power supply

Item	Specification
Rated voltage	DC24V
Allowable voltage range	DC21.6V~26.4V
Rated frequency	120mA DC24V
Allowable instantaneous power off time	10ms DC24V
Impulse current	10A DC26.4V
Maximum power consumption	15W (16 points)/ 30W (24 points and up)
Power supply for sensor	24VDC±10% 16 points max 200mA 32 points max 400mA

*Note: ①Please use more than 2mm² wires for the power cable to prevent voltage drop.

②Even in case of power failure within 10ms, the PLC can continue to work. When the power is cut off for a long time or the abnormal voltage drops, the PLC will stop working and the output is also in off state. When the power supply is restored, the PLC will automatically start running.

③The grounding terminals of basic unit and expansion module are recommended to be connected with each other and grounded reliably.

Input specification

■ NPN type

Item	Specification
Input signal voltage	DC24V±10%
Input signal current	7mA/DC24V
Input ON current	Above 4.5mA
Input OFF current	Below 1.5mA
Input response time	About 10ms
Input signal format	Contactor input or NPN open collector transistor
Circuit insulation	Photoelectric coupling insulation
Input action display	LED lights when the input is ON

■ PNP type

Item	Specification
Input signal voltage	DC24V±10%
Input signal current	7mA/DC24V
Input ON current	Above 4.5mA
Input OFF current	Below 1.5mA
Input response time	About 10ms
Input signal format	Contactor input or NPN open collector transistor
Circuit insulation	Photoelectric coupling insulation
Input action display	LED lights when the input is ON

■ Differential type

Item	Contents
Input signal	5V differential signal
Input max frequency	1MHz
Circuit insulation	Photoelectric coupling insulation
Input action display	LED lights when the input is ON

Output specification

■ Relay output

External power supply		Below AC250V, DC30V
Circuit insulation		Mechanical insulation
Action indicator		LED indicator
Max load	Resistive load	3A
	Inductive load	80VA
	Lamp load	100W
Min load		DC5V 10mA
Response time	OFF→ON	10ms
	ON→OFF	10ms

■ Transistor output

External power supply		DC5~30V
Circuit insulation		Optocoupler insulation
Action indicator		LED indicator
Max load	Resistive load	0.3A
	Inductive load	7.2W/DC24V
	Lamp load	1.5W/DC24V
Min load		DC5V 2mA
Open circuit leakage current		Below 0.1mA
Response time	OFF→ON	Below 0.2ms
	ON→OFF	Below 0.2ms

■ High speed pulse output

Model	RT/T model	T4 model	T6 model	T10 model
High speed pulse output terminal	Terminal Y0~Y1	Terminal Y0~Y3	Terminal Y0~Y5	Terminal Y0~Y11
External power supply	Below DC5~30V			
Action indicator	LED indicator			
Max current	50mA			
Pulse max output frequency	100KHz			

*Note: terminal Y2, Y3 max pulse output frequency of XD3-24T4/32T4 is 10KHz.

■ Differential high speed output

Model		XD5-xDnTm-E
Output signal		5V differential signal
Max frequency		920KHz
Circuit insulation		Photoelectric coupling insulation
Action indicator		LED indicator
Response time	OFF→ON	Below 0.2ms

Serial port (RS232/RS485) communication parameter specification

Item	Parameter
Communication mode	Half duplex
Baud rate	4800bps,9600bps,19200bps(default),38400bps,57600bps,115200bps
Data type	Data bit: 5, 6, 7, 8 (default), 9 Stop bit: 1 (default), 1.5, 2 Parity bit: none, odd, even (default)
Mode	RTU (default), ASCII, free format
Station number	1~255 (the default is 1)
Delay before sending	1~100ms (the default is 3ms)
Reply timeout	1~1000ms (the default is 300ms)
Retry count	1~20 times (the default is 3 times)

Expansion unit

In order to meet more application requirements, XD series PLC basic units can be equipped with rich I/O expansion modules, analog input and output modules, temperature control modules, BD boards and left expansion modules. The ontology can expand up to 10 ~ 16 right expansion modules, 1 ~ 2 BD boards and 1 left expansion module of different types.

[Up to 16 modules can be expanded]

Left expansion module

Analog and temperature expansion module
With D/A, A/D conversion and temperature measurement function.

Communication module
PLC can realize wireless WiFi, 4G and other data transmission, as well as wired communication of RS232, RS485 and CANopen.

Expansion BD

The compact expansion card can be directly installed on the basic unit, does not occupy excess space, and can complete the communication expansion function.

Right expansion module

I/O expansion module
It is used to expand the number of input and output points. The number of points is 8 ~ 32, and the basic unit can be expanded by 512 points at most.

The output expansion module is divided into transistor (T) and relay (R) output types.

Analog and temperature expansion module
It has D/A and A/D conversion functions. By expanding analog input/output module, temperature control module, XD series PLC can be used in temperature, flow, liquid level, pressure and other process control systems.

By adding PID regulation function, it can be used more widely, flexibly and controlled with higher precision. Only four parameters need to be set.

Each channel of the temperature control module can carry out PID control independently, which can do self-tuning, and exchange information with the PLC through FROM and TO instructions.

General specification

Item	Specification
Using environment	No corrosive gas
Ambient temperature	0°C ~ 60°C
Storage temperature	-20 ~ 70°C
Ambient humidity	5 ~ 95%RH
Storage humidity	5 ~ 95%RH
Installation	It can be fixed with M3 screws or directly installed on the guide rail of DIN46277 (35mm wide); BD board is directly installed on the top of PLC.

Right expansion module

I/O expansion module

When the number of ontology points cannot meet the use requirements, this type of extension module can be used. The basic unit can be expanded by 512 points.

Total I/O points: 8 points/16 points   Total I/O points: 32 points

■ Digital input module

Model		Function description	Specification
NPN input type	PNP input type		
XD-E8X	XD-E8PX	8 channels digital input, DC24V power supply	Input filter time 1~50ms External wiring method: terminal block Wiring method: same to PLC unit

| Weighing extension module

It is used to convert the analog signal of the load cell into digital signal.
The weighing module has the characteristics of dynamic weighing, small volume, stable performance, simple and practical operation.

It can be widely used in seed, chemical industry, grain, feed weight control and other occasions.

■ Module features

① New algorithm, optimized hardware system, faster and accurate weighing control
② Analog voltage signals of 4 load cells can be collected at the same time
③ High performance A/D conversion, sampling speed up to 450 times/s
④ The display accuracy up to 1/300000
⑤ Automatic zero tracking function
⑥ The real-time data communicates with PLC at high speed through the bus,
   which does not affect the conversion speed

1~2 channels weighing   4 channels weighing

Item	Specification
Model	XD-E1WT-D,XD-E2WT-D,XD-E4WT-D
Analog input range	DC-20~20mV
A/D actual resolution	1/8388607（23Bit）
Max display resolution	1/500000
Nonlinear	0.01%F.S 0.01%F.S
Conversion speed	150 times/s, 300 times/s, 450 times/s optional
Power supply	DC24V±10%
Sensor excitation power supply	5VDC/120mA, four 350Ω load cells can be connected in parallel
Software version	V3.5.3 and up

Expansion unit

| SSI encoder measurement module XD-E4SSI

■ Module features

① Support 4-channel absolute encoder position or displacement sensor detection
② Suitable for 10 ~ 31 bits SSI encoder, supporting 125KHz ~ 1MHz communication
　 frequency and gray code or binary format coding
③ It has the function of disconnection detection and alarm

■ Specification

Item	Specification
Module power supply	DC24V (input range: 20.4~28.8V)
Module power consumption	1W (no load)
Position detection	Absolute mode
Difference between SSI data and clock signal	Comply with RS422 standard
Encoder bit number	10bit~31bit
Digital output range	0~encoder max feedback value
Resolution	1/encoder max feedback value
Communication frequency	125KHz~1MHz
Coding type	Gray code or binary code
Comprehensive accuracy	1%
Conversion speed	400us/channel
Power supply for encoder	DC24V±10%, 100mA or 300mA

■ XD-E4SSI communication speed and cable length

Communication speed	Shielded twisted pair length
125KHz	Max 320m
250KHz	Max 160m
500KHz	Max 60m
1MHz	Max 20m

| Macro measurement module XD-E2GRP

Precision displacement sensor is also called position sensor. Digital displacement sensors are widely used to transform old machine tools and equip new machine tools. After ordinary machine tools are equipped with digital display devices, they can meet the machining accuracy requirements of most parts and are suitable for machining complex parts.

XD-E2GRP can be widely used in precision measurement occasions, such as bearing inner and outer diameter detection, shaft product detection, non-standard product detection, etc.

■ Performance features

① Range: ±1000um
② Resolution: 0.1um
③ Full range linearity error: ≤0.1%
④ Repeatability error: ≤1um
⑤ Working temperature range: -10~50℃
⑥ Data collection mode: parallel communication

■ Specification

Item	Specification
Power supply	DC24V±10%
Nonlinear	0.001%F.S
Time drift	0.005%F.S
Input sensitivity	0.004uV/d
Comprehensive accuracy	0.1%

Left expansion ED module

In addition to supporting the right expansion module, XD series PLC can also expand another ED module on the left side of the PLC. The left expansion ED module is designed as a thin sheet, occupies less space, and has the functions of AD/DA conversion, temperature measurement, remote communication and so on.

| Analog and temperature expansion ED module

With the functions of AD/DA conversion, temperature measurement. XD series (except XD1 series) can connect 1 ED module.

Model	I/O signal	Specification
XD-4AD-A-ED	4 channels current input: 0~20mA/4~20mA	Power supply for the module: DC24V±10%, 150mA Conversion speed: 10ms (all the channels) AD/DA： Current/voltage input resolution: 1/4095 (12-bit) Current/voltage output resolution: 1/1023 (10-bit) AD/DA conversion comprehensive accuracy: ±1% PT： Temperature range: -100~500℃ Digital output range: -1000~5000 Temperature input resolution: 0.1℃ PT channel comprehensive accuracy: ±0.8% of the full scale

XD-2PT2DA-A-ED	2 channels temperature input: PT100 platinum thermistor 2 channels current output: 0~20mA/4~20mA	
XD-2PT2DA-V-ED	2 channels temperature input: PT100 platinum thermistor 2 channels voltage output: 0~5V/0~10V	
XD-1TC-ED	K, S, E, N, B, T, J and R type thermocouple Temperature measuring range 0℃ ~ 1300℃ (K type) (digital output range 0~13000, signed 16-bit, binary)	Power supply for analog is DC24V±10%, 50mA Resolution: 0.1℃ Integrated precision ±1% (relative max value) TC conversion speed 80ms/channel
XD-4PT-ED	Pt100, PT1000 Platinum thermistor Temperature measuring range -100℃ ~ 500℃ (digital output range -1000~5000, signed 16-bit, binary)	Power supply for analog is DC24V±10%, 50mA　Pt3 conversion speed 450ms/ 4 channels Control precision ±0.5%　PT filter coefficient 0~254 Resolution: 0.1℃　Each channel has independent Integrated precision ±1%　PID parameters (relative max value)　Support self-tuning function PT conversion speed 80ms/　Optional sampling period channel

| Communication expansion ED module

PLC can realize wireless WIFI, 4G and other data transmission, as well as wired communication such as RS232, RS485 and CANopen.

■ **XD-4GBOXL-ED**　Left expansion 4GBOX module

① Realize wireless downloading and real-time monitoring of PLC program
② SMS communication with user's mobile phone
③ Support remote monitoring
④ Support multiple Telecom operators including China Mobile, China Telecom, China Unicom
⑤ Support GPS positioning function
⑥ As the left expansion ED module of XD series PLC, the transmission rate can reach 1M
⑦ Support fieldbus (X-NET) and deep optimization of data monitoring
⑧ Long lasting online, with disconnection redial and watchdog functions

■ **XD-WBOXL-ED**　Left expansion WIFI module

① Support 2.4GHz wireless WLAN technology
② Support AP (wireless hotspot) and STA mode
③ XD-WBOX-ED is left expansion TTL interface
④ Support wireless hotspot (same SSID) roaming technology
⑤ XD series PLC provides data support for XD-WBOX-ED
⑥ Support Modbus-TCP communication protocol (up to 4 connections)
⑦ Support X-NET communication protocol, support Xinje Cloud accesscess

■ **XD-NES-ED**　Left expansion RS232/RS485 module

XD series extended ED module can expand one RS232 or RS485 port (support fieldbus communication).

■ **XD-COBOX-ED**　CANopen communication module

① The communication rate can reach 1Mbps
② 64 communication nodes
③ Support master and slave modes
④ The reliability of the system is improved
⑤ Heartbeat protection
⑥ Easier wiring

Expansion unit

Expansion BD board

| Communication expansion BD board

■ XD-NE-BD

XD series expansion BD, fieldbus, X-NET interface.

The names of each part are as follows:

Name	Function	
Communication indicator	The indicator flashes when the BD board communicating successfully	
Terminal block	A	485+
	B	485-
	SG	Signal ground
	●	Vacant terminal
Terminal resistance dialing switch	Select whether terminal resistance is required through the dial switch (120Ω)	

■ XD-NO-BD

XD series expansion BD, fieldbus communication function and X-NET optical fiber interface. It is used for optical fiber communication. It has the advantages of high speed and strong anti-interference.

The names of each part are as follows:

Name	Function
Communication indicator	The indicator flashes when the BD board communicating successfully
Terminal block	On the left is the signal input terminal and on the right is the signal output terminal

■ XD-NS-BD

XD series expansion RS-232 BD.

The names of each part are as follows:

Name	Function	
Communication indicator	The indicator flashes when the BD board communicating successfully	
Terminal block	TX	Signal sending terminal
	RX	Signal receiving terminal
	GND	Grounding terminal
	●	Vacant terminal

| Precise clock expansion BD

■ XD-RTC-BD

More accurate clock function can be realized, and the clock error is about 13s per month.

Software version requirements: V3.5.3 (20190124) and above.

Parts

| List of basic unit accessories

■ Communication/programming cable

XVP/DVP

For communication and program uploading/downloading.

■ USB to serial port convertor

USB-COM

For interface conversion between DB9 female port and USB port.

■ USB printer cable

JC-UA-15

Special download cable for Xinje products (except products without USB-B interface). Black, with double magnetic rings to improve anti-interference performance.

■ DB9 to RS485 cable

JC-EB-Length

Db9 to RS485 cable for RS485 communication between HMI and PLC. It has three models: JC-EB-3 (3m), JC-EB-5 (5m), JC-EB-8 (8m).

■ Relay module

JR-EH

Suitable for all the RS485 communication occasions.

■ Program downloader

JD-P03

① Without computer, it can be used for program and data transfer and download between multiple Xinje PLCs.
② Suitable PLC: uploading requires the XD/XL/XG2 series PLC firmware v3.4.6 or above v3.5.3 (Ethernet type) or ZG/ZP series integrated controller. Downloading requires the PLC firmware v3.4 and up.
③ JD-P03 has small appearance and takes up small space

*Note: Please refer to the manual for specific use. XDH, XC series PLC is not supported temporarily.

| List of expansion module accessories

■ XD expansion module extension cable

XD extension cable has the length of 0.7m and 1.5m. Two 0.7m or one 1.5m cables can be added to a series of modules, and two 1.5m cables are not supported.

■ XD series terminal resistance

XD-ETR

The terminal resistance is a small plug-in board, which is inserted into the expansion port of the last expansion module to improve the signal quality. This accessory is required when more than 5 modules are connected or extension cables are used.

Slim type PLC

Small size, large function, powerful core

XL series PLC has card design, ultra-thin appearance,
Equipped with powerful CPU processor, complete functions, high reliability and compact structure,
Especially suitable for narrow installation space.

① Slim appearance, small and practical
② Strong compatibility
③ Strong expansion ability
④ Outstanding cost performance
⑤ Save more installation space

Economic type

XL1 series

The function is relatively simple, which can carry out logic control, data operation and other general functions. XL1 series is equipped with RS232 port, RS485 port, USB port and supports the networking function of X-NET fieldbus. No expansion, high-speed processing function.

① Program capacity 256KB
② I/O sequential control
③ Max I/O 16 points
④ Basic instruction 0.02~0.05μs
⑤ RS232, RS485
⑥ X-NET fieldbus
⑦ USB port high speed download (max 12Mbps)

*Note: ①The "-" in the table indicates that this model doesn't have this function; ②Special refers to system occupancy, cannot be used for other purposes.

Standard type

XL3 series

It has complete functions. In addition to the general data processing function, it also has special functions such as high-speed pulse output, high-speed counting function, pulse width modulation, frequency measurement and accurate timing. It supports the connection of right expansion module and left expansion module, which can meet various use needs.

① Program capacity 256KB
② I/O sequential control
③ Max I/O 352 points
④ Basic instruction 0.02~0.05μs
⑤ RS232, RS485
⑥ X-NET fieldbus
⑦ USB port high speed download (max 12Mbps)
⑧ 3 channels high speed counter (single phase up to 80K, AB phase up to 50K)
⑨ 2-4 channels 100KHz pulse output

*Note: ①The "-" in the table indicates that this model doesn't have this function; ②Special refers to system occupancy, cannot be used for other purposes.

Enhanced type

XL5 series

In addition to all the functions of standard PLC, it has faster processing speed (about 15 times of XC series), larger internal resource space, 2 ~ 4 channels high-speed pulse output, supports the connection of right expansion module and left expansion ED module, and can meet various use requirements.

① Program capacity 512KB
② I/O sequential control
③ Max I/O 576 points
④ Basic instruction 0.02~0.05μs
⑤ RS232, RS485
⑥ X-NET fieldbus
⑦ USB port high speed download (max 12Mbps)
⑧ 3~4 channels high speed counter (single phase up to 80K, AB phase up to 50K)
⑨ 2~10 channels 100KHz pulse output

Ethernet communication type

XL5E series

In addition to all the functions of XL5 series, it has faster processing speed (about 2 ~ 3 times that of XDM series), larger internal resource space (1M), RS232, RS485 and Ethernet ports, supports 2 ~ 10 channels pulse output, and supports the connection of right expansion module and left expansion module.

① Program capacity 1MB
② I/O sequential control
③ Max I/O 576 points
④ Basic instruction 0.01~0.03μs
⑤ RS232, RS485, RJ45
⑥ X-NET fieldbus
⑦ 2~10 channels 100KHz pulse output
⑧ 3~10 channels high speed counter (single phase up to 80K, AB phase up to 50K)
⑨ Online downloading
⑩ Bipolar input

CAN communication type

XL5N series

Compatible with most functions of XL5E series, it has built-in two-channel independent CAN communication, equipped with RS232, RS485, RJ45 port, supports two-channel pulse output, three-channel high-speed counting, and supports the connection of right expansion module and left expansion module.

① Program capacity 1MB
② I/O sequential control
③ Max I/O 544 points
④ Basic instruction 0.01~0.03μs
⑤ RS232, RS485, Rj45
⑥ 2 channels CAN communication, support CANopen and CAN free format communication
⑦ Support Ethernet communication
⑧ 2 channels 100KHz pulse output
⑨ 3 channels high speed counter (single phase up to 80K, AB phase up to 50K)
⑩ Online downloading

EtherCAT bus type

XLH series

Compatible with most functions of XLME, it has larger program capacity and faster processing speed, supports Ethernet communication, EtherCAT bus, motion control commands such as interpolation and follow-up, can connect expansion module and left expansion ED module.

① Program capacity 2~4MB
② Max I/O 542 points
③ Basic instruction 0.01~0.05μs
④ RS232, RS485, RJ45
⑤ Ethernet communication
⑥ X-NET fieldbus
⑦ EtherCAT bus control
⑧ 4 channels 100KHz pulse output
⑨ 4 channels high speed counter (up to 200KHz)
⑩ Follow-up function
⑪ 3 axes linear/acr interpolation
⑫ 16 channels electronic cam (XLH-24A16L/XLH-30A32L not supported)
⑬ Bipolar input

EtherCAT bus type

XL5H series

It is compatible with most functions of XL5E, supports EtherCAT bus, is equipped with RS232, RS485 and RJ45 ports, supports 2-channel pulse output, 3-channel high-speed counting, and supports the connection of right expansion module and left expansion module.

① Program capacity 1M
② Max I/O 536 points
③ Basic instruction 0.01~0.05μs
④ RS232, RS485, RJ45
⑤ Ethernet communication
⑥ X-NET fieldbus
⑦ EtherCAT bus control
⑧ 2 channels 100KHz pulse output
⑨ 3 channels high speed counter (single phase max 80K, AB phase max 50K)
⑩ Follow-up function
⑪ Online downloading
⑫ Bipolar input

General specification

Item	Specification
Insulation voltage	Above DC500V 2MΩ
Anti-noise	Noise voltage 1000Vp-p 1us pulse 1 minute
Air	No corrosive and combustible gas
Ambient temperature	0°C~55°C
Ambient humidity	5%RH~95%RH (no condensation)
Installation	Directly mounted on the guide rail
Grounding	The third kind of grounding (not common grounding with strong current system)

Power supply specification

■ DC power supply

Item	Specification
Rated voltage	DC24V
Allowable voltage range	DC21.6V~26.4V
Rated frequency	120mA DC24V
Allowable instantaneous power off time	10ms DC24V
Impact current	10A DC26.4V
Max power consumption	15W (16 points) / 30W (24 points and up)
Power supply for sensor	24VDC±10% 16 points max 200mA, 32 points max 400mA

Input specification

■ NPN mode

Item	Specification
Input signal voltage	DC24V±10%
Input signal current	7mA/DC24V
Input ON current	Above 4.5mA
Input OFF current	Below 1.5mA
Input response time	About 10ms
Input signal format	Contactor input or NPN open collector transistor
Circuit insulation	Photoelectric coupling insulation
Input action display	LED lights when input is ON

■ PNP mode

Item	Specification
Input signal voltage	DC24V±10%
Input signal current	7mA/DC24V
Input ON current	Above 4.5mA
Input OFF current	Below 1.5mA
Input response time	About 10ms
Input signal format	Contactor input or PNP open collector transistor
Circuit insulation	Photoelectric coupling insulation
Input action display	LED lights when input is ON

■ Differential mode

Item	Specification
Input signal	5V differential signal
Input max frequency	1MHz
Circuit insulation	Photoelectric coupling insulation
Input action display	LED lights when input is ON

Note: XL5/XL5E/XLME series 64 points models have no "input ON current", "input OFF current", and its input ON voltage is below 9V, input OFF voltage is above 19V.

Output specification

■ Relay output

External power supply	Below AC250V, DC30V	
Circuit insulation	Mechanical insulation	
Action indicator	LED light	
Max load	Resistive load	3A
	Inductive load	80VA
	Lamp load	100W
Min load	DC5V 10mA	
Response time	OFF→ON	10ms
	ON→OFF	10ms

■ Transistor output

External power supply	DC5~30V	
Circuit insulation	Optocoupler insulation	
Action indicator	LED light	
Max load	Resistive load	0.3A
	Inductive load	7.2W/DC24V
	Lamp load	1.5W/DC24V
Min load	DC5V 2mA	
Open circuit leakage current	Below 0.1mA	
Response time	OFF→ON	Below 0.2ms
	ON→OFF	Below 0.2ms

■ High speed pulse output

Model	T	T4	T6	T10
High speed pulse output terminal	Y0~Y1	Y0~Y3	Y0~Y5	Y0~Y11
External power supply	Below DC5~30V			
Action indicator	LED light			
Max current	50mA			
Pulse max output frequency	100KHz			

Serial port (RS232/RS485) communication parameter specification

Item	Parameter
Communication mode	Half duplex
Baud rate	4800bps，9600bps，19200bps(default)，38400bps，57600bps，115200bps
Data type	Data bit: 5, 6, 7, 8 (default), 9. Stop bit: 1 (default), 1.5, 2. Parity bit: none, odd, even (default)
Mode	RTU (default), ASCII, free format
Station no.	1~255 (default 1)
Delay before sending	1~100ms (default 3ms)
Reply timeout	1~1000ms (default 300ms)
Retry count	1~20 times (default 3 times)

Expansion unit

In order to meet the application requirements of more occasions, XL series PLC can be equipped with rich I/O expansion module, analog input and output module, temperature control module and left expansion module. The main body can expand 10~16 different type of right expansion modules and one left expansion ED module.

[Up to 16 modules can be expanded]

Left expansion ED module

Analog and temperature expansion module

With D/A, A/D conversion and temperature measurement function.

Communication module

PLC can realize CANopen, RS232, RS485 communication.

Right expansion module

I/O expansion module

To expand the I/O points, the points include 8~32 points. The basic unit can extend to 512 points.

The output type includes transistor (T) and relay (R).

Analog and temperature expansion module

It has D/A and A/D conversion functions. XD/XL series PLC can be applied to temperature, flow, liquid level, pressure and other process control systems by expanding analog input/output module and temperature control module.

Adding PID regulation function, it has wider and more flexible use and higher control accuracy. Only four parameters need to be set.

Each channel of the temperature control module can carry out PID control independently, which can be self-tuning, and exchange information with the main body through FROM and TO instructions.

General specification

Item	Specification
Using environment	No corrosive gas
Ambient temperature	0°C ~ 55°C
Storage temperature	-20 ~ 70°C
Ambient humidity	5 ~ 95%RH
Storage humidity	5 ~ 95%RH
Installation	It is directly installed on the guide rail of DIN46277 (35mm width)

Expansion unit

Right expansion module

I/O expansion module

When the number of main body points cannot meet the use requirements, this type of expansion module can be used to expand the I/O points to 576 points at most.

European terminal: 16/32 points   Horn terminal: 16/32 points   External terminal strip is required

Digital input module

Model		Function description	Specification
NPN input	PNP input		
XL-E16X	XL-E16PX	16 channels digital input	DC24V power supply Input filter time 1~50ms optional External wiring method: 16X, 32X: built-in terminal strip 32X-A, 32PX-A: external terminal block is required The wiring method is same to PLC main body
XL-E32X	XL-E32PX	32 channels digital input	
XL-E32X-A	XL-E32PX-A	32 channels digital input, horn terminals	

Digital output module

Model	Function description	Specification
XL-E16YR	16 channels relay output, no power supply required	R: output relay T: output transistor R response time is below 10ms T response time is below 0.2ms R max load: resistive 3A inductive 80VA T max load: each point max output current is 0.3A External wiring method: 16YR, 16YT, 16PYT3, 2YT: built-in terminal strip 16YT-A, 32YT-A: external terminal block is required The wiring method is same to PLC main body
XL-E16YT	16 channels transistor output, no power supply required	
XL-E16YT-A	16 channels transistor output, no power supply required, horn terminals	
XL-E32YT	32 channels transistor output, no power supply required	
XL-E32YT-A	32 channels transistor output, no power supply required, horn terminals	
XL-E16PYT	16 channels transistor output, DC24V power supply	

Digital I/O module

Model		Function description	Specification

Analog and temperature expansion module

It has D/A and A/D conversion functions. XD/XL series PLC can be applied to temperature, flow, liquid level, pressure and other process control systems by expanding analog input/output module and temperature control module.

Adding PID regulation function, it has wider and more flexible use and higher control accuracy. Only four parameters need to be set.

Each channel of the temperature control module can carry out PID control independently, which can be self-tuning, and exchange information with the main body through FROM and TO instructions.

Temperature control module (PT&TC type)

Model	Channel	Input signal	Specification
XL-E4PT3-P	4	Pt100, PT1000 platinum thermistor (three-wire system) Measurement temperature range -100°C~500°C	Analog power supply DC24V±10%, 50mA; Resolution: 0.1°C Comprehensive accuracy: ±0.5% (relative maximum value) Conversion speed: 450ms/4 channels Filter coefficient: 0~254 Each channel is independently PID controlled and supports self-tuning function Capable of detecting power outages, disconnections, and exceeding the range
XL- E4TC-P	4	Temperature measurement range of K, S, E, N, B, T, J, and R-type thermocouples: K-type 0.0°C~1300.0°C E-type 0.0°C~600.0°C B-type 250.0°C~1800.0°C J-type 0.0°C~800.0°C S-type 0.0°C~1700.0°C N-type 0.0°C~1200.0°C T-type 0.0°C~400.0°C R-type 0.0°C~1700.0°C	Analog power supply DC24V±10%, 50mA Resolution: 0.1°C Comprehensive accuracy: ±1% (relative maximum value) Conversion speed: 420ms/4 channels Each channel is independently PID controlled and supports self-tuning function Capable of detecting power outages, disconnections, and exceeding the range
XL- E4PT3-P-H	4	1.PT100, PT1000, CU50, CU100 thermistor temperature measurement range: -200.0°C~850.0°C (PT100, PT1000) -50.0°C~150.0°C (CU50, CU1000)	Analog power supply DC24V±10%, 50mA; Resolution: 0.1°C, 0.01°C optional Comprehensive accuracy: 0.2% (relative maximum value) Conversion speed: 50ms/all channels; Filter coefficient: 0~254 Each channel is independently PID controlled and supports self-tuning function Capable of detecting power outages, disconnections, and exceeding the range Isolation between channels

Analog input module (AD type)

Model	Channel	Input signal	Specification
XL-E4AD	4	Current input: 0~20mA/4~20mA/-20~20mA Voltage input: 0~5V/0~10V/-5~5V/-10~10V	Power supply for analog DC24V ±10%, 150mA Conversion speed 2ms/channel Resolution: XL-E4AD, XL-E8AD-A, XL-E8AD-V: 1/16383 (14-bit) XL-E8AD-A-S, XL-E8AD-V-S: 1/65536 (16-bit) Comprehensive accuracy ±1% AD filter coefficient 0~254 Channel enable bit is added AD channel has the functions of short circuit, open circuit and over range detection
XL-E8AD-A	8	Current input: 0~20mA/4~20mA/-20~20mA	
XL-E8AD-V	8	Voltage input: 0~5V/0~10V/-5~5V/-10~10V	
XL-E8AD-A-S	8	Current input: 0~20mA/4~20mA/-20~20mA	
XL-E8AD-V-S	8	Voltage input: 0~5V/0~10V/-5~5V/-10~10V	

Analog output module (DA type)

Model	Channel	Output signal	Specification
XL-E4DA	4	Voltage output: 0~5V/0~10V/-5~5V/-10~10V (external load resistor 2kΩ~1MΩ) Current output: 0~20mA/4~20mA (external load resistor less than 500Ω)	Power supply for analog DC24V ±10%, 150mA Conversion speed 2ms/channel Resolution 1/4095 (12-bit) Comprehensive accuracy ±1% Channel enable bit is added

Analog output module (DA type)

Model	Channel		Input/output signal	Specification
	Input	Output		
XL-E4AD2DA	4	2	Current input: 0~20mA/4~20mA/-20~20mA Voltage input: 0~5V/0~10V/-5~5V/-10~10V Voltage output: 0~5V/0~10V/-5~5V/-10~10V (external load resistor 2kΩ~1MΩ) Current output: 0~20mA/4~20mA (external load resistor less than 500Ω)	Power supply for analog DC24V ±10%, 150mA Conversion speed 2ms/channel Input resolution 1/16383 (14-bit) Output resolution 1/4095 (12-bit) Comprehensive accuracy ±1% AD filter coefficient 0~254 Channel enable bit is added AD channel has the functions of short circuit, open circuit and over range detection

IoT Industrial Controller

Expansion unit

Weighing extension module

It is used to convert the analog signal of the load cell into digital signal. The weighing module has the characteristics of dynamic weighing, small volume, stable performance, simple and applicable operation.

It can be widely used in seed, chemical industry, grain, feed weight control and other occasions.

① New algorithm, comprehensive optimization of hardware system, faster and more accurate weighing control
② Up to 4 analog voltage signals of load cells can be collected at the same time
③ High performance AD conversion, sampling speed up to 450 times/s
④ Display accuracy up to 1/300000
⑤ Automatic zero tracking function
⑥ The real-time data communicates with PLC at high speed through the bus, which does not affect the conversion speed

XL-E1WT-D/XL-E2WT-D   XL-E4WT-D

Item	Specification
Model	XL-E1WT-D,XL-E2WT-D,XL-E4WT-D
Analog input range	DC-20～20mV
AD actual resolution	1/8388607（23Bit）
Max display resolution	1/500000
Nonlinear	0.01%F.S
Conversion speed	150 times/s, 300 times/s, 450 times/s
Power supply	DC24V±10%
Sensor excitation power supply	5VDC/120mA, four 350Ω load cells can be connected in parallel

Left expansion ED module

XL series left expansion ED module has the type of DA, AD conversion, temperature measurement, RS232, RS485 communication.
XL series basic unit can connect 1 ED module (XL1 cannot support).

Analog and temperature expansion ED module

Model	Input/output signal	Specification
XL-4AD-A-ED	4 channels current input: 0~20mA/4~20mA	Power supply of module: DC24V±10%, 150mA Conversion speed: 10ms (all the channels)
XL-4AD-V-ED	4 channels voltage input: 0~5V/0~10V	
XL-4DA-A-ED	4 channels current output: 0~20mA/4~20mA	
XL-4DA-V-ED	4 channels voltage output: 0~5V/0~10V	AD/DA: Current/voltage input resolution: 1/4095 (12-bit) Current/voltage output resolution: 1/1023 (10-bit) AD/DA conversion comprehensive accuracy: ±1% AD filter coefficient: 0~254
XL-2AD2DA-A-ED	2 channels current input: 0~20mA/4~20mA 2 channels current output: 0~20mA/4~20mA	
XL-2AD2DA-V-ED	2 channels voltage input: 0~5V/0~10V 2 channels voltage output: 0~5V/0~10V	
XL-2AD2PT-A-ED	2 channels current input: 0~20mA/4~20mA 2 channels temperature input: PT100 platinum thermistor	PT: Temperature measurement range: -100~500°C Digital output range: -1000~5000 PT filter 0~254 Temperature input resolution: 0.1°C PT channel comprehensive accuracy: ±0.8% of the full scale
XL-2AD2PT-V-ED	2 channels voltage input: 0~5V/0~10V 2 channels temperature input: PT100 platinum thermistor	
XL-2PT2DA-A-ED	2 channels current output: 0~20mA/4~20mA 2 channels temperature input: PT100 platinum thermistor	
XL-2PT2DA-V-ED	2 channels voltage output: 0~5V/0~10V 2 channels temperature input: PT100 platinum thermistor	

Communication expansion ED module

Model	Description
XL-NES-ED	For the XL series PLC left side to expand RS232 or RS485 port. Only one can be used between RS232 and RS485, serial port is COM3
XL-COBOX-ED	CANopen communication module. ① The communication speed can up to 1Mbps ② 64 communication nodes ③ Support master station and slave station mode ④ The reliability of the system is improved ⑤ Heartbeat protection ⑥ Simple wiring

Accessories

Special power supply module

■ XL-P50-E

XL independent power supply ensures the normal operation of PLC in a good and reliable power supply system, which can prolong the service life of PLC.

Specification
AC85-265V
DC24V
2A
No corrosive and combustible gas
0°C~60°C
5%RH~95%RH (no condensation)
Directly mounted on the guide rail
The third kind of grounding (not common grounding with strong current system)

XL series terminal resistance

■ XL-ETR

XL series terminal resistance module is required when external right expansion module is connected. Only for expansion module hardware version H3.1 and up.

XL series external terminal block

Some basic units and expansion modules need external terminal blocks,
Xinje provide adapter terminal and connecting cable required by the following products.

Product model	Terminal block model	Adaptive connecting cable
XL5-64T10	JT-E32X+JT-E32YT	
XL5E-64T6	JT-E32X+JT-E32YT	
XL5E-64T10	JT-E32X+JT-E32YT	
XLME-64T10	JT-E32X+JT-E32YT	
XL-E32X-A	JT-E32X	JC-TE32-NN05 （0.5m） JC-TE32-NN10 （1.0m） JC-TE32-NN15 （1.5m）
XL-E32PX-A	JT-E32X	
XL-E16X16YT-A	JT-E16X16YT	
XL-E16PX16YT-A	JT-E16X16YT	
XL-E32YT-A	JT-E32YT	
XL-E16YT-A	JT-E16YT-A	

*Note: ① When connecting, the end closing to the transparent heat shrinkable tube and wrapping the model is connected to the PLC or module, and the other end is connected to the terminal block, which can not be reversed!!!
② One 64 points basic unit needs 2 special terminal blocks and 2 adaptive connection cables.

EtherCAT motion control type

XG2 series

The motion control type of medium-sized PLC provides customers with an ideal solution in bus motion control.

① 16MB program capacity
② 4 channels 100KHz pulse output
③ Max IO 1050 points
④ Basic instruction 0.005~0.01μs
⑤ RS232&RS485 port
⑥ Linear/arc interpolation
⑦ Ethernet communication
⑧ EtherCAT communication
⑨ Follow up function
⑩ Support differential input
⑪ 3 axes linear, arc interpolation
⑫ 16 channels electronic CAM

Performance specification

Product series XG2-		26T4
Main body I/O	Total points	26
	Input points	18
	Output points	8
Max I/O points		1050
High speed positioning	Normal pulse output	4 axes
	Differential pulse output	-
High speed input	Single/AB phase mode	4 channels, max 200KHz
	Input mode	Differential input
Expansion capability	Right expansion module	16
	Left expansion module	-
	BD BOARD	-
Interruption	External interrupt	12
	Timing interrupt	20
	Other interrupts	High speed counting interrupt, pulse interrupt
Communication function	Communication port	1 RS232 port, 2 RS485 ports, 2 RJ45 ports
	Communication protocol	Standard Modbus ASCII/RTU communication, free format communication, Ethernet communication、Ethernet/IP communication, TCP communication, UPD communication
Bus function		EtherCAT bus control
PWM pulse width modulation		-
Frequency measurement		-
Precise timing		-
Multi-station control		Support
Program execution mode		Cyclic scanning mode
Programming mode		Command, ladder chart, C language
Power failure holding		Use FlashROM

		General C	50000 points C0~C49999
		Power-off retentive HC	8000 points HC0~HC7999
		High speed counter	40 points HSC0~HSC39
	Special coil for WAIT instruction		32 points SEM0~SEM31
Word soft component	Data register	General D	700000 points D0~SD699999
		Power-off retentive HD	100000 points HD0~SD99999
		Special SD	10000 points SD0~SD9999
	FlashROM register	Power-off retentive FD	65536 points FD0~FD65535
		Special SFD	10000 points SFD0~SFD9999
		Security register FS	48 points FS0~FS47

*Note: ①Only the PLC with transistor output has high speed positioning function；②The "-" in the table indicates that this function is not available；
③Special use refers to being occupied by the system and cannot be used for other purposes.

Basic unit general specification

General specification

Item	Specification
Insulation voltage	Above DC500V 2MΩ
Anti-noise	Noise voltage 1000Vp-p 1us pulse 1 minute
Air	No corrosive and combustible gases
Ambient temperature	0℃~60℃
Ambient humidity	5%~95% (no condensation)
Installation	It can be fixed with M3 screws or directly installed on the rail
Grounding (FG)	The third kind of grounding (not common grounding with strong current system)

Power supply specification

Item	Specification
Rated voltage	DC24V
Voltage allowable range	DC21.6V~26.4V
Input current (only for basic unit)	120mA DC24V
Allowable instantaneous power off time	10ms DC24V
Impact current	10A DC26.4V
Maximum power consumption	12W
Power supply for sensor	24VDC±10%

Input specification

XG2series PLC input specification
XG2 series PLC supports NPN and differential signal input mode.

NPN mode specification

Item	Specification
Input signal voltage	DC24V±10%
Input signal current	7mA/DC24V
Input ON current	Above 4.5mA
Input OFF current	Below 1.5mA
Input reponse time	About 10ms
Input signal format	Contact input NPN open collector transistor (X2, X5, X10, X13, X14, X15, X16, X17, X20, X21)
Circuit insulation	Photoelectric coupling insulation
Input action display	LED lights when input is ON

Differential signal mode specification

Item	Specification
Input signal voltage	DC5V±10%
Input signal current	12mA/DC5V
Input ON current	Above 4.5mA
Input OFF current	Below 1.5mA
Input response feature	Max 200KHz
Input signal format	Differential input (X0, X1, X3, X4, X6, X7, X11, X12)
Circuit insulation	Photoelectric coupling insulation
Input action display	LED lights when input is ON

*Note: X0+, X0-, X1+, X1-; X3+, X3-, X4+, X4-; X6+, X6-, X7+, X7-; X11+, X11-, X12+, X12-
are four groups of differential signal, which can be high speed counting
terminals. To receive the collector signal, first convert the differential signal
into collector signal through differential to collector board (DIFF-OC).

Output specification

Transistor output

External power supply		Below DC5~30V
Circuit insulation		Optocoupler insulation
Action indicator		LED indicator
Max load	Resistive load	0.3A
	Inductive load	7.2W/DC24V
	Light load	1.5W/DC24V
Min load		DC5V 2mA
Open circuit leakage current		Below 0.1mA
Response time	OFF→ON	Below 0.2ms
	ON→OFF	Below 0.2ms

High speed pulse output

Model	T4 type
High speed pulse output terminal	Y0~Y3
External power supply	Below DC5~30V
Action indicator	LED indicator
Max current	50mA
Pulse max output frequency	100KHz

*Note: ① When using the high-speed pulse output function, the PLC can output
pulses up to 200kHz, but it can not ensure the normal operation of all
servos. Please connect a resistance of about 500Ω between the output
end and 24V power supply；

② PLC is generally equipped with plug-in spring connector when leaving the
factory, which is convenient for wiring. The length of wire peeling off is
required to be at least 1.5cm. When wiring, press the yellow spring switch
with a small screwdriver, insert the wire into the corresponding socket,
and release the spring switch.

Expansion unit

XG series medium-sized PLC can connect 1~16 different type and model of expansion modules.

General specification

Item	Specification
Using environment	No corrosive gas
Ambient temperature	0°C ~ 60°C
Storage temperature	-20 ~ 70°C
Ambient humidity	5 ~ 95%RH
Storage humidity	5 ~ 95%RH
Installation	Directly installed on the guide rail of model XG-EB-Length (mm)
Dimension	130.0mm×40.0mm×133.4m

XG series I/O expansion module

When the number of main body I/O points cannot meet the use requirements, the I/O expansion module can be used.

Digital input module

Model	Function	Specification
XG-E16X	16 channels digital input	Compatible with NPN&PNP input The module does not need external power supply Input filtering time 1 ~ 50ms optional External wiring mode: 16X, 32X body include terminal strip 64X requires external terminal block Terminal wiring mode: the same to PLC body
XG-E32X	32 channels digital input	
XG-E64X	64 channels digital input	

Digital output module

Model	Function	Specification
XG-E16YR	16 channels relay output	The module does not need external power supply R: output relay T: output transistor R response time: below 10ms T response time: below 0.2ms R max load: resistive 3A inductive 80VA T max output current: each point 0.3A External wiring mode: 16YR, 16YT, 32YT body include terminal strip 64YT requires external terminal block Terminal wiring mode: the same to PLC body
XG-E16YT	16 channels transistor output	
XG-E32YT	32 channels transistor output	
XG-E64YT	64 channels transistor output	

Digital input output mixed module

Model	Function	Specification
XG-E8X8YR	8 channels digital input 8 channels relay output	Compatible with NPN&PNP input The module does not need external power supply Input filter time 1~50ms optional R: output relay T: output transistor R response time: below 10ms T response time: below 0.2ms R max load: resistive 3A inductive 80VA T max output current: each point 0.3A External wiring mode: the body include terminal strip Terminal wiring mode: the same to PLC body
XG-E8X8YT	8 channels digital input 8 channels transistor output	
XG-E16X16YT	16 channels digital input 16 channels transistor output	

Expansion unit

XG series analog expansion module

① By expanding analog input/output module and temperature control module, XG series PLC can be applied to process control systems such as temperature, flow, liquid level and pressure.

② With the addition of PID regulation function, it has wider application, more flexible use and higher control accuracy.

③ XG-E8TC-P, XG-E8PT3-P module each channel can do independently PID controlling and self-tuning, and exchange information with the main body through FROM and TO instructions.

Analog input module (AD type)

Model	Input channel	Input signal	Specification
XG-E8AD-A-S	8	Current input: 0~20mA/4~20mA/-20~20mA	Power supply for analog DC24V±10%, 150mA Conversion speed 2ms/channel Resolution 1/65535 (16-Bit) Comprehensive accuracy ±1% AD filter coefficient 0~254 AD channel has the functions of short circuit, open circuit and over range detection Channel enable bit is added
XG-E8AD-V-S	8	Voltage input: 0~5V/0~10V/-5~5V/-10~10V	

Analog I/O mixed module (nADmDA type)

Model	Channel Input	Channel Output	Input/output signal	Specification
XG-E4AD2DA	4	2	Voltage input: 0~5V/0~10V/-5~5V/-10~10V Current input: 0~20mA/4~20mA/-20~20mA Voltage output: 0~5V/0~10V/-5~5V/-10~10V (external load resistor 2KΩ~1MΩ) Current output: 0~20mA/4~20mA (external load resistor less than 500Ω)	Power supply for analog DC24V±10%, 150mA Conversion speed 2ms/channel Input resolution 1/16383 (14-Bit) Output resolution 1/4095 (12-Bit) AD filter coefficient 0~254 AD channel has the functions of short circuit open circuit and over range detection Comprehensive accuracy ±1% Channel enable bit is added

Analog output module (DA type)

Model	Output channel	Output signal	Specification
XG-E4DA-S	4	Voltage output: 0~5V/0~10V/-5~5V/-10~10V (external load resistor 2KΩ~1MΩ) Current output: 0~20mA/4~20mA (external load resistor less than 500Ω)	Power supply for analog DC24V±10%, 150mA Conversion speed 2ms/channel Resolution 1/65535 (16-bit) Comprehensive accuracy ±1% Channel enable bit is added

Temperature control expansion module

Model	Channel	Input signal	Specification
XG-E8PT3-P	8	Pt100 platinum thermistor (three wire system with compensation) Measuring temperature range -100°C~500°C (digital output range -1000~5000, signed 16-bit, binary)	Power supply for analog DC24V±10%, 50mA Control precision ±0.5% Resolution 0.1°C Comprehensive accuracy ±1% (relative max value) PT conversion speed 650ms/8 channels TC conversion speed 450ms/8 channels PT filter coefficient 0~254 8 groups of independent PID parameters, support self-tuning function
XG- E8TC-P	8	K, S, E, N, B, T, J and R type thermocouple Measuring temperature range 0°C~1300°C （K type) (digital output range 0~13000, signed 16-bit, binary)

Accessory

Special power supply module XG-P75-E

XG independent power supply ensures the operation of PLC in a good and reliable power supply system, which can prolong the service life of PLC.

Item	Content
Rated voltage	AC100V~240V
Allowable voltage	AC90V~265V
Rated frequency	50Hz~60Hz
Allowable instantaneous power off time	Interruption time≤0.5 AC cycle, interval≥1s
Impact current	Max 40A below 5ms/AC100V
	Max 60A below 5ms/AC200V
Max consumption power	75W

External terminal block

XG2-26T4, XG-E64X, XG-E64YT module need external terminal block, the following is suitable terminal and wiring cable for the module.

Product model	Terminal block model	Wiring cable model
XG2-26T4	JT-G26	JC-TG26-NN05 (0.5m) JC-TG26-NN10 (1.0m) JC-TG26-NN15 (1.5m)
XG-E64X	JT-E32X	JC-TE32-NN05 (0.5m) JC-TE32-NN10 (1.0m) JC-TE32-NN15 (1.5m)
XG-E64YT	JT-E32YT	

*Note：① When connecting, one end near the transparent heat shrinkable tube which wrapped the model name is connected to XG-E64YT, and the other end is connected to the terminal block, which cannot be reversed.
② One XG-E64X, XG-E64YT module need 2 special terminal blocks and 2 wiring cables.

U-shaped connector XG-EUC-1、XG-EUCT-1

XG-EUC-1
The U-shaped connector is used to connect the medium-sized PLC with the expansion module, or the connection between expansion modules.

XG-EUCT-1
Based on the XG-EUC-1, the built-in terminal resistance is inserted into the expansion port of the last expansion module to improve the signal quality.

*Note: ① When more than 10 expansion modules are connected, XG-EUCT-1 is required. It is also recommended for occasions with strong electromagnetic interference；
② When connecting multiple expansion modules, XG-EUCT-1 can only be used in the last expansion location, and XG-EUC-1 can still be used in other locations.

Basic unit communication port accessories

Name	Model	Description	Product drawing
Communication/ programming cable	JC-EL-Length	Elbow XVP cable is only applicable to XG2, series PLC. Three specifications are available: JC-EL-25 (2.5m), JC-EL-50 (5m), JC-EL-100 (10m)	
USB convertor	USB-COM	For the interface conversion of DB9 female port and USB port	
USB printer cable	JC-UA-15	Special USB cable for Xinje products, black with double magnetic rings to improve anti-interference ability	
EtherCAT communication cable	JC-CB-Length	EtherCAT bus cable, for the second Ethernet port of XG2, XDH, XLH series PLC. Nine specifications are available: JC-CB-OP1 (0.1m), JC-CB-OP2 (0.2m), JC-CB-OP3 (0.3m), JC-CB-OP5 (0.5m), JC-CB-1 (1m), JC-CB-3 (3m), JC-CB-5 (5m), JC-CB-10 (10m), JC-CB-20 (20m)	

Mounting plate XG-EB series

XG-EB series guide rail is selected for the installation of basic unit, expansion module and power module.
The following six specifications are available:
XG-EB-170(170mm),XG-EB-260（260mm）
XG-EB-385(385mm), XG-EB-590（590mm）
XG-EB-880(880mm),XG-EB-1500（1500mm）

Bus distributed remote IO

High real-time performance, compact structure, diversified combination, meeting the application scenarios of different user needs

The new generation of Xinje distributed IO system is suitable for common bus networks, compatible with mainstream brand PLC master stations, and uses high-speed backplane bus between adapters and modules. It can quickly respond to external excitation signals for high-speed and high-precision field applications. According to different application scenarios and customer needs, the types of remote IO modules are constantly improving and enriching, providing a better experience for the "combination" needs of different customers and applications.

Distributed IO system

Features

■ Multi-system composition

Support Modbus TCP communication protocol and communication with master devices using EtherCAT and Profinet bus protocols.

■ High reliability and real-time performance

Utilize a self-developed high-speed backplane bus to achieve microsecond-level fast response in data acquisition, meeting the field requirements for high-speed and high-precision control.

■ Rich IO models

Support the expansion of digital, analog, temperature, communication, pulse, process and other unit modules.

■ Convenient maintenance

The detachable terminal block allows for the replacement of modules of the same model without the need for complex wiring and disconnection actions, saving on-site maintenance time and costs.

Newly upgraded

• Large capacity expansion, supporting 32 expansion modules.

• Blade type structural design saves more installation space and is suitable for applications with strict volume requirements.

LF series distributed remote IO

| LFC3-AP

High performance EtherCAT communication coupler

① Blade style expansion, diversified combinations
② Compact structure, saving installation space
③ Direct insertion terminal, easy and reliable wiring
④ Support network port firmware upgrade
⑤ Support hardware static station number setting
⑥ High speed bus microsecond level response
⑦ Support up to 32 IO expansion modules
⑧ Channel and backplane fault diagnosis, quickly obtain fault diagnosis information
⑨ Seamless compatibility with mainstream PLC master stations on the market

*Note: LFC3-AP can be used in conjunction with the XF right expansion modules

| Performance specification

Model	LFC3-AP
Rated voltage	DC 24V
Voltage allowable range	DC 21.6V~26.4V
Input current	120mA DC24V
Allow instantaneous power outage time	10ms DC24V
Impact current	10A DC26.4V
Network protocol	EtherCAT
Cascade method	Follow the principle of 'bottom in, top out'
Single AP process data	Input maximum 1024 bytes, output maximum 1024 bytes
Network interface	2 RJ45 ports
Physical layer	100BASE-TX
Synchronization cycle	Support 250us, 500us, 1000us, 2000us, 4000us
Connection rate	100Mbps, full duplex
Transmission distance	Less than or equal to 100M between two nodes
Topology	Linear
Transmission medium	Cat5e and above
No configuration required when replacing equipment	Support (EtherCAT modules of the same type)
Number of expansion modules	Support 32 modules
Firmware upgrade	Support
Address setting	Configure by dip switch (1-255) or assigned by the main station

LFP3-AP

High performance PROFINET communication coupler

① Blade style expansion, diversified combinations
② Compact structure, saving installation space
③ Direct insertion terminal, easy and reliable wiring
④ Support RT and IRT transmission modes
⑤ Support MRP and MRPD redundancy
⑥ Compatible with Siemens and TIA portal
⑦ Support up to 32 expansion IO modules
⑧ Channel and backplane fault diagnosis, quickly obtain fault diagnosis information

*Note: LFP3-AP can be used in conjunction with the XF right expansion modules

Performance specification

Model	LFP3-AP
Rated voltage	DC 24V
Voltage allowable range	DC 21.6V~26.4V
Input current	120mA DC24V
Allow instantaneous power outage time	10ms DC24V
Impact current	10A DC26.4V
Power protection	Anti reverse protection, overcurrent protection, surge absorption
Network protocol	Profinet
Single AP process data	Input maximum 1440 bytes, output maximum 1440 bytes
Communication mode	RT mode, IRT mode
Media redundancy (MRP)	Support
Media path redundancy planning (MRPD)	Support
Network interface	2 RJ45 ports
Connection rate	10/100Mbps adaptive, full duplex
Transmission distance	Less than or equal to 100m between two nodes
Topology	Support line type, star type, tree type, etc
Transmission medium	Cat5e and above
Number of expansion modules	Support 32 modules
Alarm, diagnosis, status information	Support, the main body supports uploading error codes to PLC
Profinet switch function	Support networking function
Firmware upgrade	Support

LFI3-AP

XF series I/O expansion module

Module Type	Model	Number of channels	Input/Output signal	Specification
Digital input module	XF-E16X	16	Digital input module	Rated input DC 24V Positive/Negative logic configurable Input filter time selectable 0ms~128ms NPN & PNP input compatible
	XF-E32X	32	Digital input module	
Digital output module	XF-E8YR	8	Dry contact relay output	DC24V ±10% power supply Positive/Negative logic configurable Response to CPU fault/STOP mode configurable
	XF-E16YT	16	Transistor output, NPN type	
	XF-E16PYT	16	Transistor output, PNP type	
	XF-E32YT	32	Transistor output, NPN type	
Digital input output mixed module	XF-E8NX8YT	16	8-channel digital input, 8-channel transistor output, NPN input, NPN output	DC24V ±10% power supply Positive/Negative logic configurable Input filter time selectable 0ms~128ms Response to CPU fault/STOP mode configurable
	XF-E16X16YT	16	16-channel digital input, 16-channel transistor output, NPN & PNP bipolar input, NPN output	
Temperature acquisition module	XF-E4RTD	4	Support PT100, PT1000, CU，CU00，NTC-K，NTC-0K sensor types, and measurement temperature range: PT100: -200.0~850.0°C PT1000: -200.0~850.0°C CU50: -50.0~150.0°C CU100: -50.0~150.0°C NTC-5K (B value 2000~6000): 40000Ω~400Ω NTC-10K (B value 2000~6000): 40000Ω~400Ω	DC24V ±10% power supply Resolution selectable: 0.1°C or 1°C Conversion speed (all channels): 250ms, 500ms, 1000ms selectable Accuracy: ±0.1% (at room temperature 25±5°C), ±0.2% (full temperature range -20~55°C) Filtering method selectable: first-order filter, time average, count average, moving average Features: power-off detection, thermocouple break detection, over-range detection
	XF-E4TC	4	Temperature measurement range of K, S, E, N, B, T, J and R type thermocouples: K-type: -200.0~1300.0°C S-type: -50.0~1768.0°C E-type: 200.0~1000.0°C N-type: -200.0~1300.0°C B-type: 250.0~1820.0°C T-type: -200.0~400.0°C J-type: -210.0~1200.0°C R-type: -50.0~1768.0°C Supprt -100mV~100mV voltage acquisition	
Analog input module	XF-E4AD	4	Current input: 0~20mA, 4~20mA, -20~20mA Voltage input: 0~5V, 0~10V, 1~5V, ±5V, ±10V	DC24V ±10% power supply Resolution: 16Bit Conversion speed: 60μs/channel Response speed: 60μs Accuracy: ±0.1% (at room temperature 25±5°C), ±0.2% (full temperature range -20~55°C) Filtering method selectable: first-order filter, time average, count average, moving average Features: power-off detection, thermocouple break detection, over-range detectiondetection, over-range detection
Analog output module	XF-E4DA	4	Current input: 0~20mA, 4~20mA Voltage input: 0~5V, 0~10V, 1~5V, ±5V, ±10V	DC24V ±10% power supply Resolution: 16Bit Conversion speed: 60μs/channel Response speed: 60μs Accuracy: ±0.1% (at room temperature 25±5°C), ±0.2% full temperature range -20~55°C)
Serial port	XF-E2COM24	2	independent 232/485 serial communication ports	Supports selectable 232/485 per port Supports Modbus Master, Slave, and free-format communication Channels are isolated from internal circuits, providing strong anti-interference capability
High speed counting module	XF-E1HSC	1 channel supports single-ended or differential input; features 2 input channels and 4 output channels	Supports encoder single-ended input (bipolar) or differential input (A/B/Z) on one channel 2 high-speed inputs and 4 high-speed outputs	A/B phase supports 1×, 2×, and 4× multiplier selection Differential/single-ended selectable Maximum frequency 2 MHz Supports pulse frequency measurement and pulse width measurement Supports 2 probe inputs Supports 4 comparison outputs (flying shooting function)
Pulse positioning module	XF-E2HSP	2	Two high-speed pulse outputs 8 high-speed inputs (bipolar) 6 high-speed outputs (NPN)	Pulse + direction, A/B phase 1× frequency, PWM output CW/CCW mode selectable Maximum frequency supports 200 kHz
Relay power supply module	XF-EP24	7	7-channel DC24V power supply	DC24V ±10% power supply supports short-circuit protection and overload protection

LF series coupler dedicated expansion modules

▲ Communication coupler   ▲ Digital input   ▲ Digital output   ▲ Digital input/output   ▲ Digital output   ▲ Digital input

Model		Function Description
NPN type	PNP type	
LF-E16X		16-channel digital bipolar input
LF-E8YR		8-channel digital dry contact relay output
LF-E16YT	-	16-channel transistor NPN output
-	LF-E16PYT	16-channel transistor PNP output
LF-E8NX8YT	-	8-channel digital NPN transistor input; 8-channel digital NPN transistor output
LF-E32X		32-channel digital bipolar input
LF-E32YT	-	32-channel digital NPN output
LF-E16X16YT	-	16-channel digital bipolar input; 16-channel digital NPN transistor output

*Note: LF series modules are dedicated for use with the LF series coupler and do not support direct connection to XSF series PLCs. Their performance and functional parameter configuration are identical to the corresponding XF series module of the same type when used with the LF series coupler.

L series distributed remote IO

LC3-AP

EtherCAT communication coupler

① Card based expansion and diversified combinations
② Compact structure, saving installation space
③ Direct insertion terminal, easy and reliable wiring
④ Support network port firmware upgrade
⑤ Support up to 16 expansion IO modules
⑥ Adopt a 45-degree angled Ethernet port design to reduce stress on the port and enhance product reliability
⑦ Seamless compatibility with mainstream PLC master stations on the market

*Note: LC3-AP can be used in conjunction with the XL right expansion modules

Performance specification

Model	LC3-AP
Rated voltage	DC 24V
Voltage allowable range	DC 21.6V~26.4V
Input current	120mA DC24V
Allow instantaneous power outage time	10ms DC24V
Impact current	10A DC26.4V
Network protocol	EtherCAT
Cascade method	Follow the principle of 'bottom in, top out'
Single AP process data	938 bytes
Network interface	2*RJ45 ports
Physical layer	100BASE-TX
Synchronization cycle	Support 500us, 1000us, 2000us, 4000us
Connection rate	100Mbps, full duplex
Transmission distance	Less than or equal to 100m between two nodes
Topology	Line type
Transmission medium	Cat5e and above
No configuration required when replacing equipment	Support (EtherCAT modules of the same type)
Number of expansion modules	Support 16 modules
Firmware upgrade	Support (only for hardware versions H5.6 and above)
Address setting	Master station allocation
Termination resistor	When the number of expansion modules exceeds 5, it is necessary to cooperate with the terminal resistance module XL-ETR

EtherCAT bus type

LC5E series

It is compatible with most functions of XL5E, supports EtherCAT slave station. It can interact with the master station and supports Ethernet communication, EtherCAT bus, supports the connection of expansion module and ED module.

① Program capacity 1M
② Max I/O 544 points
③ Basic instruction 0.03μs
④ RS232, RS485, RJ45
⑤ Ethernet communication
⑥ X-NET fieldbus
⑦ EtherCAT bus control
⑧ 4 channels 100KHz pulse output
⑨ 4 channels high speed counter (single phase max 80K, AB phase max 50K)
⑩ Online downloading

EtherCAT switch

EtherCAT switch

Introducing the EtherCAT switch (AS-C6) allows for a change from a simple linear topology to a complex multi-level star topology, achieving a one-in-multi-out effect. When a device on a specific port branch in the star topology is disconnected or replugged, it does not affect the normal operation of devices on other star ports.
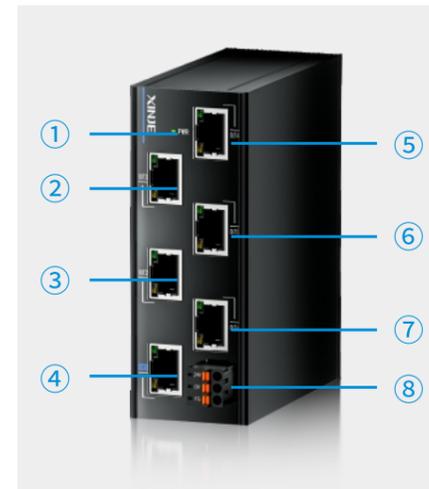

Interface definition

No.	Interface name	Mark	Explanation
①	Power indicator light	PWR	Green: illuminates when power on
②	EtherCAT input port	IN1	Port1, EtherCAT input port, connect to the previous EtherCAT master station
③	EtherCAT output port	OUT2	Port2, EtherCAT output port, connect to the next EtherCAT slave station
④		OUT3	Port3, EtherCAT output port, connect to the next EtherCAT slave station
⑤		OUT4	Port4, EtherCAT output port, connect to the next EtherCAT slave station
⑥		OUT5	Port5, EtherCAT output port, connect to the next EtherCAT slave station
⑦		OUT6	Port6, EtherCAT output port, connect to the next EtherCAT slave station
⑧	24V power input terminal	24V、0V	Module power supply input

General specification

Item	Specification
Communication protocol	EtherCAT industrial real time bus protocol
EtherCAT channel	1 channel input, 5 channels output
Communication interface	6*RJ45 ports
Maximum communication speed	100Mbps
Network port/Ethernet cable	Standard Ethernet port with Cat5e Ethernet cable, cable length not exceeding 100m
Operation temperature	-20-65℃
Storage temperature	-30-70℃
Humidity	10-95%, no condensation
Installation	M35 rail fixation
Grounding (FG)	The third type of grounding (cannot be connected to the common grounding of the high-voltage system)※

EtherCAT communication specifications

Item	Specification
Communication protocol	EthereCAT industrial real time bus protocol (CIA402, 5001)
Synchronous mode	DC - distributed clock
Duplex mode	Full duplex
Physical layer	100BASE-TX (IEEE802.3)
Maximum communication speed	100 Mbit/s
Topology	Star topology
Switch cascading	Support
Network cable recognition	Auto MDI/MDIX
Cyclic time (DC communication cycle)	125,250,500,1000,2000,4000[μs]

111.7

Features

- 1 channel EtherCAT input, 5 channels EtherCAT outputs, capable of achieving star and tree topologies.

- The data flow priority of the switch output ports is: OUT2>OUT3>OUT4>OUT5>OUT6, meaning that any slave on the OUT2 branch has priority over all slaves on the OUT3 branch, and this priority is maintained during multi-level topologies.

- The switch can achieve multi-level topologies, with the connection status of each branch being mutually non-interfering. If any branch of the switch encounters a fault, it will not impact the working status of other branches.

- Each switch occupies two EtherCAT slave station numbers.

- Switch supports cascading, and the number of cascades is not related to the functionality of the switch itself, but only to the maximum number of nodes supported by the master station.

PLCopen standard controller

Faster speed, stronger motion control ability

XS series PLCopen standard controller has faster operation speed, stronger motion control ability, and supports multiple programming languages, which can significantly improve the programming efficiency. The process library and instruction library continue to improve and upgrade, providing more solutions for customers and creating greater value.

Function features

■ More types

• The XS series contains four sub-series XSA, XSF5, XSLH, XSDH, with multiple appearances and richer use scenarios.

■ Higher performance

• Support up to 256 nodes

■ Faster operation speed

• Based on Inter X86 processor, which can meet the requirements of high-speed operation. The minimum exeution time of bit operation is 2ns, the minimum execution time of word operation is 2ns, and the minimum execution time of floating point operation is 2ns.

■ More communication modes

• Support multiple communication protocols including Modbus TCP/RTU ,TCP/IP, UDP, Ethernet/IP, OPC_UA, etc.

| XSA series

The self-developed XS Studio programming platform, which can reference many standard function libraries, adopt the IEC61131-3 programming standard, support six programming languages (ST, SFC, FBD, CFC, LD, IL), and develop Xinje proprietary function blocks, instruction libraries and system libraries, which can significantly improve user programming efficiency.

① 128M program capacity
② Dual EtherCAT master control
③ EtherCAT remote IO
④ Ethernet communication
⑤ Virtualization technology
⑥ Built-in UPS
⑦ Optional Windows or Linux operating system
⑧ High reliability: Exceeds IPC standards

HMI model distribution

The Xinje HMI mainly includes two major series, TS and TG. The TS series is a new generation of HMI, which based on Linux system and equipped with an efficient A7 dual core processor, make touch screen operations more efficient and fast, which is beneficial for users to process data on the touch screen. Simultaneously retaining the original features of high protection and low failure rate, it has a wider range of applications. Current TS series include 4.3 inches, 7 inches, 10 inches, and 15.6 inches.more sizes are under development. Stay tuned.

The TG series general models cover sizes from 4.3 inches to 15.6 inches, with 8 sub-series that maintain consistent high protection and low failure rates. They are suitable for various occasions, as well as in trusses, robots, logistics and other industry projects.

Function

TS series

TG series

Cost-effective models	General models	IoT models	Special models

TS2 series 4.3", 7"

TS3 series 7", 10"

TS5 IoT series 4.3", 7", 10"

Performance

TS series high performance HMI

## Adopting Linux system and equipped with efficient dual core A7 processor, the human-machine experience is smoother

TS5D series - Metal IoT HMI
• Market with high structural requirements for IoT demand

TS5 series - IoT HMI
• Targeting the IoT market

TS3 series - Standard HMI
• Targeting the general automation market

TS2 series - Entry-level HMI
• Targeting the small single machine and electrical market

■ High performance processors
Adopting ARM Cortex-A7 dual core processor, 1GHz main frequency, built-in 128MB memory, expandable USB storage.

■ Efficient system
Based on the Linux system, the multitasking mechanism significantly improves system response speed, making operations more efficient and efficient.

■ Multi-directional installation at will
Support free installation in four directions, meeting the needs of different occasions.

Horizontal - Normal display

Horizontal - Rotate 180°

Vertical - Rotate 90° clockwise

Vertical - Rotate 90° counterclockwise

■ Rich device connectivity

USB-A
Import project through USB drive, import/export csv file, support mouse, keyboard, scanning gun, printer.

RJ45
Upload/download HMI program, connect PLC and other devices, remote desktop.

USB-B
Program upload/download.

COM1
RS232/RS485, connect PLC, servo, meter and micro printer, scanning gun, etc.

COM2
RS232/RS485/RS422, connect PLC, servo, meter and micro printer, scanning gun, etc.

Power supply
DC24V power supply

IoT type metal HMI

TS5D series　12", 15.6"

- Adopting Cortex-A7 dual core processor, with a main frequency of 1.2GHz
- Covering mainstream information exchange protocols, supporting MQTT and TCP/IP
- The metal structure of the entire machine enhances anti-interference and heat dissipation
- Support streaming media and video playback, with better performance when used in conjunction with audio
- Support network cameras for remote monitoring
- Relying on TouchWinPro software, it is easy to use and run efficiently

TS5D-1200 series

TS5D-1500 series

IoT type HMI

TS5 series　10.1" 7" 4.3"

- Remote functions: remote desktop (remote control of HMI real-time screen on PC), remote transparent transmission (remote upload/download PLC program), remote download (updating HMI program)
- Support audio output and can output various types of audio through external speakers
- Covering mainstream information exchange protocols and supporting MQTT/TCP IP
- Standard network port, networking through optional WIFI/4G module
- Edge computing, conducive to data analysis and statistics

Standard type HMI

TS3 series   `10.1" 7"`

- Adopting Cortex-A7 dual core processor, with a main frequency of 1GHz and built-in 128MB memory
- Rich in functions, suitable for various occasions
- Stronger sealing performance, providing better protection against dust, water vapor, and debris
- The product structure conforms to lightweight design, making it lighter and thinner
- New TouchWinPro software with comprehensive feature upgrades

TouchWin Pro software

■ Tag Communication

TS series products support standard tag communication such as Codesys and PLC handler, as well as proprietary tag communication like Siemens and Inovance, enabling faster and more efficient programming.

■ Multilingual Tags

Supports mainstream foreign languages (English, Korean, Japanese, Arabic, etc.), with up to 16 languages usable simulta-neously. Features table editing, import/export support, and batch one-click switching for multilingual texts.

■ Powerful Recipe Management

The new recipe management is simple and easy to edit. It supports editing recipe data on the touch screen, including inserting, deleting, importing, exporting and other operations.

■ Detailed Report Management

The report management method supports the display of tables in forward order/ reverse order. You can query data or alarm records by date and keyword. It can be imported/exported to USB flash disk.

■ Traceable Operation Records

Record user login and operation contents, which can be exported to USB flash disk to help analyze process flow and troubleshooting.

■ Multi-screen Download

Supports simultaneous project download to up to 10 touch screens within the same local area network (provided there are no devices with identical IPs in that network).

■ Schedule

With timer function, it can set the time and execute it regularly, making the on-site operation more efficient.

■ PDF File Preview

Combined with the file browsing function, allows direct preview and viewing of PDF files from a USB drive on the screen, with page turning and zoom operations supported.

■ Remote Desktop

Also known as VNC functionality, supports synchronizing the touch screen's display and data on a PC or mobile device, enabling real-time HMI monitoring and remote control of the touch screen without being on-site.

■ Multiple Program Download Methods

Supports uploading and downloading touch screen programs via USB drive, local area network, or remotely.

■ Remote Passthrough

Supports remote upload and download of PLC programs, solving issues like not finding the download cable or insufficient ports. Programs can be downloaded to the PLC via network connection using 4G or WiFi modules.

Covers mainstream information interaction protocols, supporting MQTT/TCP IP.

■ Optional WIFI/4G Communication Expansion Board

The device comes standard with an Ethernet port and supports an optional WIFI/4G communication expansion board, which integrates seamlessly with the TS5 without occupying extra space. Users can freely switch between the 4G or WiFi communication expansion board based on the usage scenario.

■ Multimedia Function

Supports streaming media and preset video playback, with enhanced effects when used in conjunction with audio.

■ Real-time Monitoring

Supports connecting to network cameras for remote monitoring.

Wide temperature metal HMI

TGM（D）series   10.1" 7"

- New appearance and structure design, centralized interface
- Ultra thin body
- The metal cover of the whole machine greatly improves the anti-interference and heat dissipation
- The temperature range is -20℃~70℃, suitable for the site environment with high temperature requirements
- More industrial chips are adopted, and the performance is more stable

General HMI

TG series   10.1" 8" 7" 4.3"

- Covering complete display size, the product lineup is abundant
- It has various functions and is suitable for most industrial sites
- USB-A front port design, easy to use (GA62 support)

■ USB-A front interface design, more convenient operation   TGA62support

USB-A interface is used for data import and export. This interface is designed on the front of the panel. When transmitting data, there is no need to open the control cabinet. It is easy to operate and greatly improves the work efficiency.

Embedded without border HMI

TGM(B) series   10.1" 7" 4.3"

- No front cover, rear installation, greatly reducing the installation space
- It fits closely with the surface of the equipment for better fusion
- Users can design their own mask to meet the needs of personalized customization
- It is especially suitable for vehicle, medical, testing and other applications

TouchWin

Rich functional components

C language function block, operation, command and communication are omnipotent

- C language function block meets more complex computing and communication needs, give full play to the system functions and better serve customers.

■ Support most standard C functions

■ The function can be encrypted separately. You need to enter a password to view the function content, which protects the rights and interests of usersguage

The function block identifier is written in full accordance with the standard C language

The function block identifier is written in full accordance with the standard C language

Strong data processing capability

■ Process control data acquisition function, and the trend chart display is more intuitive

■ The alarm function allows the system to recover quickly

■ The storage and bidirectional transmission of recipe data greatly improve the work efficiency

Processing A today
Processing B today
Processing C today

Store the PLC data in the HMI

Transfer the recipe data in the HMI to the PLC

■ Export CSV format data through USB flash disk, backup important data

PLC
HMI
Industrial information
Servo system
Frequency system
Stepping system
Vision system
IOT industrial controller

■ FTP File Transfer

Enables file transfer between the touch screen and a PC, allowing access to sampled data, alarm logs, and operation logs from within the touch screen. User permissions and recipe data can be modified via the FTP file replacement method.

■ Flexible Alarm Configuration

Features a new alarm function supporting configurable flashing of alarm text and customizable background colors for alarm bars by priority level. Alarm data sorting and querying methods are more diverse.

■ Batch Copy, Edit, Conversion

Supports batch copying and editing of components, as well as batch address conversion. Dramatically improves efficiency—the more components, the greater time saved.

TG series general HMI

4.3-10.1inches full coverage, 8 branch products to meet a variety of interaction needs of your industrial site

■ Suitable for many occasions

- TG general model
- TG(G) gray ultrathin model
- TG(S) black ultrathin model

■ Suitable for harsh environment

- TGM(D) Site environment with severe temperature requirements

■ Suitable for special occasions

- TGM(B) Vehicle, medical, testing

■ Suitable for handheld operation

- MTG handheld wireless operation, built-in mobile power supply
- RT can be operated with one hand and two hands, which is convenient for field test equipment

■ Suitable for basic occasions

- TG(S/G)-XT Cost effective

■ High hardware configuration for higher performance

CPU	Memory	Storage	Color	Capacity
ARM9 core Main frequency 400MHz	128MB/64MB	128MB	16.77 million	4 million words Power off holding area

■ Download, start and run trinity ultra-high speed response

Download	Start	Run
USB high-speed data transmission can greatly reduce the program download time and facilitate debugging	Greatly improve the startup speed and reduce the waiting time	Smoother screen switching and animation effect

■ Flexible installation and free choice

Vertical installation or horizontal installation can be freely selected according to the actual needs of the site.

4G・WIFI・Ethernet・Protocol-agnostic Transparent Transmission

Xinje Cloud

No programming | no professional skills | create an exclusive IOT platform

■ Industrial informatization solutions

Xinje Cloud is an industry application platform for remote data acquisition based on years of deep cultivation in the industry and extensive product applications. Its functions include: device access, device management, data storage, graphic configuration, data display, data analysis, user management and other parts. It supports the simultaneous monitoring of PC and mobile app.

The platform is free of programming and software installation. Without professional skills, it can quickly realize the connection between products and systems and create an exclusive IOT platform. At any time, the remote data monitoring, parameter setting and function control of the equipment can be realized through web and app.

■ Application scenario

Equipment manufacturer

OEM supplier

End user

Smart agriculture　　Warehousing logistics　　Energy management　　Animal husbandry　　Smart home　　Manufacturing

Equipment fault remote diagnosis and real-time monitoring

After sales reliability maintenance of equipment, such as after-sales mainte-nance of air compressor

Ensure the authenticity of test and detection equipment data, such as lithium battery test

Smart city construction, such as sewage treatment, waste recycling, cold storage

Smart agriculture, smart home, smart RV and other industries

Cloud V4.2.6

Overall upgrade | New functions | New experience

Remote VNC Function
Cloud-screen synchronization, enabling flexible and efficient remote control.

Alarm push
Supports SMS alarm push, app push, official account push.

Maintenance work order
Work order creation and distribution, closed-loop management of equipment operation and maintenance.

Data Analysis
Historical data, report analysis, customizable tables.

Permission management
User management, multi-level permission assignment.

Integration with Third-Party Systems
Provides interfaces for HTTP, MQTT, and other protocols, supports integration with MES, ERP, and other systems.

Cloud recipe distribution
Recipe customization, multiple methods of remote distribution.

Staging management
Staging tasks, machine locking upon expiration, convenient management.

SIM Card Management
Centralized management of IoT cards, convenient query/re-charge/invoicing.

Personalized Customization
Supports local deployment of cloud platform, provides customized services.

■ Multiple login methods for quick registration

Add Wechat applet Cloud or scan the QR code below

Focus on Wechat official account, click Cloud menu, download app according to mobile phone system.

The PC side accesses the website http://-cloud.xinje.net/ through the browser, enters the login interface, and quickly registers through the mobile phone number to log in the Cloud platform.

Cloud V4.2.6

■ TS5 system HMI access

VNC Cloud and HMI synchronization control

TS5 IoT model is added to the platform access equipment, which supports VNC remote control, cloud HMI synchronization, and more flexible control.

Server deployment

The Xinje Cloud local inheritance deployment supports self-built servers and public cloud deployment. Cloud can be ported to the client's own server, we can provide customized services. Customers can build their own servers or rent third-party servers such as Alibaba cloud, Tencent cloud and Huawei cloud.

Self-built server: users need to build their own computer room, network deployment and purchase server hardware. Xinje does not provide hardware purchase, hardware installation or debugging services.The reference configuration of Xinje cloud deployment environment is shown in the following table:

Public cloud deployment: 188.take Alibaba cloud server as an example. It is connected to about 200 devices. The recommended configurations are as follows:

Self-built server	
CPU	Intel E5 and up
Memory	8GB
Hard disk	500GB
Bandwidth	Fixed IP bandwidth 10M and up
System environment	Windows Server 2016 and above

Public cloud deployment	
CPU	4-core
Memory	8GB
Hard disk	500GB
Bandwidth	5M
System environment	Windows Server 2016 and above

XDATA

"Data-Chart" Interconnection, Empowering Intelligent Manufacturing

What is XDATA?

XDATA (xdata.xinje.net) is a quick BI and data visualization tool platform launched by Xinje. It adopts BS architecture and is committed to solving the problems of data BI analysis and visualization on large screen and liberating the development manpower of data visualization system.

Data visualization through XDATA is more convenient and fast. Users don't need any programming foundation. They just need to drag and drop, which saves a lot of programming work.

| Advantages of XDATA

Direct data source

Support direct connection Xinje SQL to get cloud data, uploading local Excel/csv file or connect the data through API. It can complete multi-source interaction analysis.

Rich charts

Provide 30 + Echarts visualization charts based on Xinje cloud and 10 + filtering components, support professional GIS visualization and custom icon effects, and fully meet your diversified visualization needs.

Drag and drop editing

Use the visual editor, what you see is what you get, drag and drop to generate a visual page, so that you can easily edit without writing code.

Cool big screen

We integrate BI report and large screen functions, and provide multiple sets of cool large screen templates, guiding users to quickly build an intelligent data dashboard.

BI self service analysis

Both the report and the large screen support data table modeling, dragging fields to bind data, as well as flexible interaction such as filtering, drilling and linkage, so that you can easily conduct in-depth data mining.

Authority control

Enterprise organization level management, including project space isolation, role and user-based authorization mechanism, flexible setting of resource operation authority and data authority, so as to fully ensure your data security.

| How to use XDATA

Add the data source
[data mangement]-[data source]
Connect to Xinje cloud database or local csv file

Create data model
[data mangement]-[data model]
Secondary processing and visual modeling of all data tables under the data source

Make large screen
[data large screen]-[new data large screen]
All kinds of data visualization components build a large screen with low cost and high efficiency

Preview/share
[large screen space]
Build a large screen and share it with other users through public/private connection

A-BOX series

ALL in one

Full coverage of 4G, WIFI, Ethernet, Powerful functions

| Function features

Various Internet access modes

Support 4G, WIFI, Ethernet modes to access Internet.
It is equipped with 4G routing function, supports WiFi,
Ethernet port equipment to access the Internet.

Support Remote Transparent Transmission & Data Monitoring

In the remote transparent transmission mode, it
supports the function of upload/download programs
for PLC, HMI and other devices.
In the data monitoring mode, it supports more
devices to access the cloud platform to realize data
remote monitoring.

Stronger compatibility and support multiple device access

Support Siemens, Mitsubishi, Omron and other
mainstream brands PLC.
Support industrial control equipment to access through
serial port, Ethernet port and USB port to realize
networking communication between various devices.
Support multiple serial communication modes: RS232,
RS485, RS422.
Support MQTT, OPC DA, Modbus TCP Server, etc.

Humanized design, easy to use

Long lasting online, with disconnection redial and
watchdog functions.
Support GPS and base station assisted positioning.
Support Modbus-TCP Server, easy to be networking.
Support two-way read-write function and machine
locking function.
Support MQTT protocol and message caching
function.

| Application scenario

After sales service of remote equipment	HVAC refrigeration	Manufacturing	Warehousing logistics
Smart agriculture, breeding	Sewage disposal	Smart building	Power monitoring

| Network topology

■ Achieve remote monitoring and program upload/download for controllers via ABOX

S-BOX-HT

Protocol free, ultra short distance transmission

The S-BOX-HT series wireless transparent transmission module is a short-range wireless communication module based on wireless RF technology. The equipment data is transmitted transparently and supports the controller brands including Xinje, Delta, Mitsubishi, Omron, PPanasonic etc. It is widely used in field equipment networking communication and wireless HMI communication to realize short-distance wireless communication of automation system. The supporting wireless HMI model is MTG765-HT.

Panasonic

FATEK®

Product features

Carrier frequency rang
The radio frequency module S-BOX-HI is based on 433MHz Carrier Frequency Band, and the farthest communication distance can reach 2km

Rich interface modes
Support RS232, RS485, RS422, can connect various brands of PLC

Multi-channel optional
84 channels are available, which can be adjusted by users according to the actual situation on site

Communication parameters
Serial port parameters can be set according to different PLC

Multi-section adjustable speed
In order to meet the needs of on-site transmission distance, the air rate (4800~62500bps) can be adjusted conveniently through external dialing

I/O mode
Short distance calling and answering can be realized through I/O mode

Application scenario

Container information management

Wireless meter reading, wireless sensor

Power high temperature and high voltage monitoring

Automatic data acquisition

Industrial control, telemetry, remote sensing

POS system, asset management

Building community automation and security

IoT Industrial Controller

IOT card

IOT card is a special flow card provided by telecom operators for the Internet of things. It adopts the special signal segment and special network element equipment of the Internet of things, which has the characteristics of safer and more efficient communication.

Xinje IOT card is applicable to all Xinje gateway products of 4G communication. It can provide functions such as querying the binding information of IOT card serial number, IOT card renewal, traffic usage, order invoicing and so on.

Product features

Basic service
IOT card supports China mobile, China telecom and China unicom telecom operators, and the basic traffic package is 2G/12G every year

Exclusive card number
Click on a single device and the SIM card information of a single device will be displayed. The card does not belong to Xinje account name cannot be queried

Flow alarm
The threshold of flow can be set. When the remaining flow drops to the threshold, an alarm can be sent through SMS or software

Renewal query
When the balance in the card is insufficient, you can recharge/renew it, with a variety of plans to choose from.

Invoice center
Users can query the recharge status of the card in the management tool and issue invoices

Batch query
Users can check the binding relationship between the gateway and the card number/ICCID, card status, network status and flow usage on the SIM card management page

Machine card binding, directional IP
When the card is inserted and activated, it can be bound with the equipment. Replace the equipment and stop the card to ensure the safety of the equipment. Exclusive orientation, access to Xinje server only

Scope of use
Go through in China, please consult us for other regions

Application scenario

| Sewage disposal | Smart agriculture | Remote meter reading | Sluice management |
| Equipment positioning | Water quality monitoring | Smart city | Mechanical heavy industry IoT |

Distributed multi-site operation and maintenance solution

Traditional distributed site operation and maintenance commonly faces problems such as difficult equipment management, high reliance on personnel, and data silos., Xinje combined with modern sensing technology, automatic control technology, network transmission technology, data information and so on, launched a multi-site operation and maintenance solution. The solution integrates data acquisition, remote monitoring, intelligent alarms, equipment control, operation and maintenance management, data traceability, and BI analysis into a centralized management system.This effectively achieves the core objectives of unattended operation and cost reduction with increased efficiency.

Currently, the solution has been widely applied in multiple fields such as, smart agriculture, breeding and animal husbandry, water valve monitoring, fog pile monitoring, salt farm management, HVAC station management, etc.

Ethernet controller   Ethernet   Gateway   Server   Mobile phone app   WEB monitoring

Xinje Cloud application

Multiple background variables
The same screen can be used for the control of multiple stations to reduce the difficulty and workload of screen structure. All field devices can be listed on the left and click switch to view the status of each station.

Combined control
Combined with the operation habits of on-site users, it provides the function of secondary structure screen, and implements the combined control of remote operation and local operation. It is simple and easy to understand, and the operators can learn it as soon as they learn. There is no hardware conflict between local and remote.

Multi-screen monitoring
On the same page, the on-site operation environment of multiple stations can be monitored at the same time through the SCADA and camera.

Intelligent early warning
Real time monitor the key indicators. Abnormal alarm has alarm prompts of web page voice, mobile phone messages, WeChat official account and so on. Remote operation of equipment and remote reset can be done.

Multilevel management
Realize the distribution management of equipment by region or personnel, and realize the management stations of mobile phone, computer and applet.

Standard protocol
It can provide the third party with data of equipment operation, maintenance, processing results and so on. including on-site collected data,

PLC | HMI | Industrial informatization | Servo system | Frequency system | Stepping system | Vision system | IoT Industrial Controller

Workshop multi-equipment centralized operation and maintenance management scheme

Precisely associate devices with specific production lines, and the system automatically counts device data per line. Accurately track and compare the output data of each line, integrate equipment and production performance, and identify high-efficiency, high-quality production lines to support lean management.

Xinje Cloud application

Device management
Precisely associate devices with specific production lines, and the system automatically counts device data per line. Accurately track and compare the output data of each line, integrate equipment and production performance, and identify high-efficiency, high-quality production lines to support lean management.

Production Capacity Analysis
Create, edit, and save project tasks. Subsequently, based on custom distribution conditions, distribute the projects to machines and save key information.

Operation and Maintenance Management
Create and maintain equipment maintenance plans. Generate repair work orders upon failure, track the entire handling process, forming a traceable closed loop.

Task Dispatch
Support the creation, editing, and storage of project tasks. Users can preset dispatch rules, and the system automatically dispatches tasks as work orders to specified devices, recording key process data for later traceability.

Data monitoring
Customize data dashboards, integrate with real-time video, achieving centralized monitoring and flexible presentation of various production line equipment status.

Alarm Records
Immediate fault alarms, automatic data recording, in-depth analysis of downtime causes, precise bottleneck identification, building an improvement loop from passive response to active optimization.

04
Servo System

DS6 High-performance Servo | DS5□2 General-purpose Servo
DM6C Multi-axis Servo Drive | DL6 Direct-drive Servo
iMF5N Integrated Low-voltage Servo Drive | MS6 Motor

Servo system overview

High-Performance Servo System

The compact servo system currently has 6 subseries of products, including pulse type and bus type. In addition to all the functions of the universal series, its outstanding advantage lies in integrating minimalist commissioning, a compact structure, and multiple safety protections to achieve high-precision, high-response, and high-reliability intelligent control.

Suitable for fields such as 3C, lithium battery, photovoltaic, and semiconductor.

Compatible motor: MS6 series.

Bus type	DS6C	0.1kW~7.5kW	EtherCAT.
	DS5C2	0.1kW~32kW	EtherCAT.
	DS5P	0.1kW~7.5kW	PROFI NET®
Pulse type	DS6K	0.1kW~7.5kW	Modbus
	DS5L2	0.1kW~3kW	Modbus
	DS5K2	0.1kW~32kW	Modbus

Linear drive servo system

The linear drive servo system currently has one subseries, equipped with long line drive, frequency division output, position comparison output, probe function, motor temperature sampling and other functions. It comes standard with multiple protection functions such as dynamic braking, STO safety torque off, overcurrent protection, etc. The introduction of a new gantry synchronization algorithm ensures the high synchronization of the two axes during operation. The new TYPE-C debugging port and positioning accuracy compensation function help achieve higher absolute positioning accuracy.

Suitable for applications such as lithium battery stacking, die bonder, optical inspection platforms, UV printing, etc.

Suitable motor: Linear motor.

| Bus type | DL6 | 2.8A~6A | EtherCAT. |

Multi-Machine Drive Servo System

DM6C   0.4kW~160kW

The multi-axis servo system currently has one subseries, which has multiple advantages such as high dynamic response, space saving, high efficiency and energy saving, flexible configuration, and high protection. It comes standard with STO function and independent supply of 24V control electricity, making it safer and more reliable.

Suitable for fields such as printing and packaging, forging machines, wire cutting, silicon semiconductor, laser cutting, etc.

Compatible motor: MS6 series.

| Rectifier Unit | DM6 | 22kW~160kW |

Inverter Unit

| Bus type | DM6C | 0.4kW~120kW | EtherCAT. |

Low voltage servo system

The iMF5N series is a highly integrated low-voltage servo drive and motor unit, designed specifically for automation scenarios with stringent requirements on space, reliability, and integration convenience. It combines advanced servo control technology with a compact physical structure, delivering outstanding motion control performance under low-voltage DC power supply.

| Bus type | iMF5N | 0.1kW~0.75kW | CANopen |

*Note: For currently produced models, refer to the subsequent model list. Some models are under development, stay tuned.

High performance servo system

Excellent performance, safe and reliable, convenient and easy to use, compact size

DS6 Series High-performance Servo Drive

Analysis of Industry Pain Points

Frequent Failures and Low Reliability
Difficulty in troubleshooting failures impacts Overall Equipment Effectiveness (OEE) and production continuity, leading to significant economic losses.

编码器故障
过流、过载、过压

Limited Space Restricting Design
Bulky electrical components often become a bottleneck in equipment structural design, limiting innovation in miniaturization and modularity.

Complex Wiring and Low Efficiency
This has become one of the main bottlenecks affecting production cycle time and installation reliability.

Complex and Lengthy Commissioning
Tight delivery schedules and high labor costs mean lengthy commissioning cycles directly impact equipment delivery and payment collection.

Harsh Environment Poses Significant Challenges
Standard drives are prone to failure due to dust and moisture ingress, reducing equipment reliability.

Lack of Certification Hinders Export
Equipment manufacturers targeting overseas high-end markets or specific industries (e.g., automotive, lithium battery) may fail to obtain whole-machine certification, losing market access.

Product Features

👍 Outstanding Performance

Ultra-fast Response, Precision That Shadows Your Every Move
3.5kHz speed loop bandwidth and 125μs high-speed synchronization cycle enable precise multi-axis motion control.

Advanced control algorithms, paired with self-developed 23-bit/26-bit high-resolution absolute encoders, balance high-speed operation with positioning accuracy, delivering ultra-fast response and exceptionally smooth, jerk-free motion.

DS6 Series High-performance Servo Drive

⚒ Simplified Operation and Maintenance

One-touch Commissioning, Intelligent and Precise Control

Integrating advanced self-tuning, adaptive control, automatic inertia identification, and automatic vibration suppression functions, making commissioning smarter and more efficient.

30% Reduction

DS6 Series

DS5*2 Series

⚒ Human-centric Design

Second-level Installation, Efficiency Revolutionized

Utilizing cage-clamp, tool-less terminals significantly improves wiring efficiency, saving time and effort during installation and maintenance.

Standard Type-C interface supports parameter reading/writing and firmware upgrade in USB power supply mode, offering convenience and peace of mind.

⚒ Full-feature Integration

One Machine, Multiple Capabilities, Flexible Application

Bus Models: Feature frequency division output as standard.

Pulse Models: Integrate long-line driver, frequency division output, full-closed loop, and analog interface to meet diverse requirements.

3C Lithium Battery Photovoltaic (PV) Semiconductor

▥ Compact Structure

Small Size, Saves More Space

The 750W model's volume is reduced by 20% (compared to the previous generation), saving equipment installation space and facilitating high-density production line integration.

Volume Reduced by **20%**

DS5C2 Series   DS6C Series

♡ Safety Guardian

Multiple Protections, Worry-free Operation

Equipped with dynamic braking as standard and optional STO (Safe Torque Off), reducing the risk associated with emergency stops.

Multiple protection mechanisms (overvoltage, overcurrent, overheating, etc.) and an ultra-low failure rate ensure continuous and stable equipment operation.

Inverter Module Servo Motor Dynamic Brake Braking Resistor Control Signal

Speed STO Command Speed Torque Output Actual Speed Torque Shutdown Time

The Black Box Traceability System automatically captures operational data at the moment of failure, pinpoints issues, and assists technicians in rapid diagnosis.

❶ Upon detecting a fault, the drive automatically stores the fault data.

❷ Reset the fault to resume production.

❸ The technician reads the black box data to address the problem.

⛨ Comprehensive Certifications

The DS6 series servo drive standard model supports CE certification (for the EU) by default. Functional safety models additionally support UL certification (for the USA) and STO certification.

⚘ Quality Assurance

Three-year Warranty, Worry-free After-sales Service

ServoWpf PC Software（DS6/DL6）

Simplify the Complex, One-stop Servo Commissioning Platform

■ Configuration Interface

Parameter Table

Supports parameter read, modify, save, and download, covering all P-group parameters and U-group monitoring parameters with detailed descriptions. Parameters are categorized by function into Overview, Control Mode, and Gain Tuning for easy management.

Drive, Motor Information

Supports motor parameter configuration and linear motor calibration to ensure precise system matching.

■ Wizard Setup Interface

Drive Motor Wizard

Guides users through speed, torque limit, and motor direction settings.

Simple Tuning

Guides inertia identification, rigidity selection, mechanical characteristic measurement, and filter configuration, simplifying the tuning process.

Auto-Tuning Settings

Automatically optimizes gain configuration based on parameters such as device operating state matching method, mode, and load type.

Application Settings

After the user selects pulse or bus mode, the system automatically filters and displays corresponding parameters for rapid location and configuration.

ServoWpf PC Software（DS6/DL6）

■ Control Interface

Real-time Dynamic Curve Observation

Provides an intuitive gain tuning environment for speed loop, position loop, and current loop, assisting users in achieving precise control.

■ Oscilloscope Function Interface

Real-time Observation

Real-time collection of key data such as speed, torque, position, and bus voltage, aiding dynamic monitoring and parameter optimization.

Curve Acquisition

High-precision acquisition of data such as rotational speed, position, and current for comprehensive analysis of servo operating status.

Black Box

Automatically records data at the moment of failure, pinpointing issues and improving diagnostic efficiency.

■ Motion Interface

Simple and Feasible Jogging Debugging

Supports position jogging and speed jogging operations, facilitating equipment debugging and operational verification.

■ Communication Interface

Supports quick communication with Xinje servo drives via Type-C interface, automatically identifying drive and motor information, compatible with rotary and direct-drive servos for convenient and efficient connection and data interaction.

■ Monitoring

Rich and Comprehensive Real-time Monitoring

Real-time display of servo operating status, alarm information, and I/O status, ensuring full visibility and control throughout system operation.

■ Tuning Interface

Precise and Subtle Gain Identification

Integrates inertia identification, rigidity selection, mechanical characteristic measurement, and resonance suppression functions. Users can configure parameters based on actual equipment operating conditions to achieve optimal gain tuning and dynamic adjustment.

■ Tools

Motor Selection

Based on device component selection and motion model establishment, automatically recommends matching motor models.

Electronic Gear Ratio Conversion

Automatically calculates pulses per revolution and electronic gear ratio based on mechanical structure (e.g., lead screw, disk, pulley).

Parameter Comparison

Supports pairwise comparison between preset values, current drive values, file values, and interface parameters for easy parameter management and version control.

DS5L2 series Basic Pulse-Type Servo Driver

■ Excellent performance

High dynamic response

• The speed loop response bandwidth of up to 2.8kHz can meet the requirements of devices with fast response speed and high accuracy.

Speed loop comparison chart

Resonance suppression

• The resonance suppression control algorithm can effectively shorten the setting time, eliminate mechanical resonance, and make path tracking smooth and accurate.
• Resonance frequency automatic inspection, with stronger usability.
• Improved vibration frequency recognition accuracy by 50% (compared to DS5L1).
• 50% reduction in resonance frequency analysis time (compared to DS5L1).

High precision positioning

• Equipped with 19-bit magnetic encoder and 23-bit optical encoder with high resolution, it can help servo motors improve low-speed vibration suppression ability, reduce speed fluctuations, and make the servo system run more smoothly and accurately.

■ Safe and reliable

Standard dynamic braking

• When the motor is running, in the event of a power outage or alarm, the servo will be turned off and the three-phase circuit of the motor will be short circuited. The servo motor will quickly stop, ensuring the safety of operators and machine equipment.

Inverter module

P- overcurrent protection

■ Stable and easy to use

S-shaped acceleration and deceleration curve

• The S-shaped acceleration and deceleration curve can effectively overcome mechanical vibrations caused by sudden speed changes, making operation smoother and more stable.

Speed
Target speed
Before filtering
After filtering
Tacc Ts Tdec Ts Time

Note: Only the speed mode is effective.

Quick adjustment to shorten positioning time

• Load inertia estimation, search for optimal gain, and complete positioning within 20ms.
• Driver panel offline adjustment.
• The rigidity level can reach up to level 41.

Parameter setting ➡ Inertia estimation ➡ Rigidity level

*Note: DS5L2 covers 32 levels of rigidity.

Convenient and easy to use

• Easy to operate terminal design improves wiring efficiency and saves maintenance time.
• Gain adjustment free, strong parameter applicability. Users do not need complex gain tuning, debugging is simple and convenient, and can greatly shorten debugging time.

■ Stable and easy to use

Easy to wiring and quickly debug

- Easy to operate terminal design improves wiring efficiency and saves maintenance time.
- Adopting standard RJ45 industrial Ethernet fast interface, greatly improves wiring efficiency.
- Gain adjustment free, strong parameter applicability.
- Users do not need complex gain tuning, debugging is simple and convenient, and can greatly shorten debugging time.

SI bidirectional optocoupler | Plug in power terminal | European terminal

The system runs more smoothly and has higher positioning accuracy

- Suitable for MS6-B3 series high protection single/multi turn integrated motors, with simpler and more convenient selection.
- Lower speed and torque fluctuations assist in the smooth operation of torque control equipment.

Compatible in size and accessible for machine replacement

- The DS5C2 series is fully compatible with the DS5C1 series (same power range), ensuring worry free replacement.

Fully compatible in size

DS5C1　　　　　　　DS5C2

MS1 Series Servo Motor

Miniaturization | High Performance | Flexible Configuration

■ Compact Body

- Designed for narrow installation spaces, featuring a small volume and compact structure; easily handles space-constrained scenarios, enhancing equipment layout flexibility.

-25%

750W-B4　　　750W MS1

*Note:Take 750W as an example

■ High Power Density

- Optimized electromagnetic design achieves higher power density, delivering strong power output in a compact space to meet the demands of equipment miniaturization and high performance.

MS1H-80CM30B3-20P7 Magnetic Flux Density Cloud Diagram

■ Rated Operating Point
(Rated Speed - Rated Torque Point)

■ Overload Operating Point
(Rated Speed - 3x Torque Point)

■ Flexible Configuration

- Standard with single-turn/multi-turn integrated encoder. When switching between single-turn and multi-turn, only the encoder cable (battery box) needs to be replaced.

■ CE Certification Compliant

- The entire product series complies with CE certification standards, ensuring electromagnetic compatibility and safety, assisting customers in rapidly expanding into the EU and global markets.

MS6-B3 series servo motor

High protection level│lightweight design│high-precision positioning

■ Excellent Texture and Touch

- Black body with a matte texture, effectively reducing the perceived temperature of the motor.

■ Low Noise, Low Temperature Rise

- Low noise and low temperature rise; maximum winding temperature rise can be reduced by up to 20°C.

■ High Protection

- Optimized structure achieves a protection rating of up to IP67.

■ Motor Miniaturization

- The MS6 series motor body is further shortened, with a maximum reduction of up to 18% compared to the MS5 series motor.

Comparison of characteristics between 60 flange MS5 and MS6

■ MS5　■ MS6

Torque [N•m] / Speed [rpm]

*Note: Comparison of instantaneous operation zone between MS6S series and MS5S series 400W motors with a temperature rise of 70°C under the same specification requirements.

■ Lightweight motor

- The body of the MS6 series motor is further shortened, with a maximum reduction of 18% compared to the MS5 series motor.

-18%

MS6-B1　　MS6-B3

*Note: Taking 400W as an example.

■ Encoder resolution

- The entire series comes standard with 17-bit, 19-bit, and 23-bit encoders to choose from.
- Realize higher precision position control and stable low-speed operation.
- The magnetic encoder has enhanced resistance to oil stains and vibration.

2500p/r → 131072p/r　524288p/r　8388608 p/r

Previous models　DS5 series　DS5 series　DS5 series

■ Flexible configuration to meet different needs

- Offers low inertia and high inertia motor options, suitable for a wider range of equipment scenarios.
- Optional power-off brake, oil seal, oil-resistant cable; configurable with connector to AMP adapter cable; forward/reverse cable exit optional.

Forward outlet mode

Reverse outlet mode

MS6S-130 series servo motor

Instantaneous response│precision control│efficient and stable

■ High Precision

- 19-bit/23-bit absolute encoder optional.

■ High Protection

- IP67 protection rating, dustproof and waterproof

■ High Reliability

- Front cover bearing mounting design uses larger bearings, resulting in higher battery life.

■ Lower inertia, higher response

- Stronger acceleration and deceleration rapid response capability, higher motor overload capacity.

Torque current feedback(A) / Torque current command(A) / ms

■ Flexible Configuration and Easy Installation/Removal

- Standard single/multi turn integrated encoder, when switching between single/multi turn, only the encoder cable (battery box) needs to be replaced.

■ Higher speed

- The rated speed of the MS6S series 130 flange motor has been increased to 3000rpm, and the maximum speed has been increased to 6000rpm.

MS6S-130□□□30B□2-45P0　　MS6S-130□□□30B□2-43P0

Torque N.m / Speed rpm

—— Continuous operation zone　—— Short term operation zone

■ Optimized design for greater stability

- To enhance the overall strength and vibration resistance of the motor, a new body structure design has been adopted. Measures such as potting the stator, optimizing the rotor bearing fixation method, improving the aviation plug fixation method, and reducing the height of the aviation plug have been implemented to make the motor more stable and reliable.

》》

Improve the aviation plug fixation structure and potting

Enhance the overall strength vibration resistance of the motor

Stepping system

Vision system

IoT Industrial Controller

MS6G-130 series servo motor

The best choice for compact device scenarios

■ Reliable operation

• By integrating the end cap and body, improving the fixed structure of the aviation plug and potting, the overall strength and vibration resistance ability of the motor can be enhanced.

End cap and body integration, improve the aviation plug fixation structure and potting

Enhance the overall strength vibration resistance of the motor

• 17-bit/19-bit/23-bit absolute value encoders are optional.

• Low temperature rise and low noise.

Adapt to multiple encoders

17-bit, 19-bit, 23-bit absolute value encoders are optional

■ Shorter body

• Compared with the MS6H series high inertia servo motor, the MS6G series has a shorter body, about 10% shorter, making it more suitable for compact equipment scenarios.

• Black body, matte texture, effectively reduces the tactile temperature on the surface of the motor body.

*Note: Taking 1.5kW as an example.

10%

MS6H-130   MS6G-130

■ Ultra protection

• The protection level of the MS6H-130 series B2 motor is IP65, and the MS6G-130 series has optimized the motor structure, raising the protection level to IP67, dustproof and waterproof, and is not afraid of harsh environments.

IP67

MS6G-180 series servo motor

Short body │ High reliability │ More precise positioning

■ Lightweight Design, Shorter Body

• Compared to the MS6H series servo motor, the MS6G series body length is reduced by approximately 25%, making it more suitable for compact equipment scenarios;

• Black body with a matte texture, effectively reducing the perceived temperature on the motor body surface.

*Note: Taking 3kW as an example

25%

MS6H-180   MS6G-180

The body length of the 3kW non-brake motor is only **162mm**
The body length of the 4.4kW non-brake motor is only **185mm**

■ Ultra-high overspeed capability

• The motor has an ultra-high weak magnetic field expansion capability, increasing the maximum operating speed to 4500rpm.

*Note: Taking MS6G-180CN15B2-47P5 as an example.

■ Flexible Configuration

• The MS6G-180 series motor is standard with a single-turn/multi-turn integrated encoder. When switching between single-turn and multi-turn, only the encoder cable (battery box) needs to be replaced.。

■ High Protection Rating

• Optimized motor structure with an IP67 protection rating, providing dust and water resistance to withstand harsh environments.

■ High precision encoder for more accurate positioning

• 19-bit and 23-bit absolute value encoders can be selected for higher positioning accuracy.

Compatible with various encoders
19-bit / 23-bit

■ Improved vibration resistance and more reliable operation

• To enhance the overall strength and vibration resistance of the motor, a new body structure design has been adopted, along with measures such as stator potting, optimizing the rotor bearing fixation method, improving the fixation method for aviation plug, and reducing the height of the aviation connectors. These measures make the motor more stable and reliable.

Improve the aviation plug fixation structure and potting

Enhance the overall strength and vibration resistance of the motor

Liquid cooled servo motor

High precision | Low temperature rise
High reliability | High protection

■ High reliability

- Using a cross-coupling installation method for the encoder enhances vibration and impact resistance.
- The rotor features a built-in structure, significantly improving the motor's resistance to demagnetization.

■ Low temperature rise

- An axial Z-shaped water channel structure design is used, with cooling fluid for heat dissipation, significantly reducing the motor's temperature rise.

■ High power density

- Compact structural design, with a body length shortened by about 16% compared to air-cooled motors of the same power.

■ High-precision

- Standard 23-bit high-precision absolute value optical encoder.

MS6G-200TH17B2-413P0-F   MS6G-200TH17B2-413P0-Y

16%

■ High performance

- New electromagnetic scheme design, compatible with DS5C2/DM6C series high-performance servo drivers to meet high dynamic response requirements.

■ High energy efficiency

- By optimizing the motor's magnetic circuit design and selectively using materials with low losses, such as silicon steel sheets and oil seals, the overall losses of the motor are effectively controlled, achieving a high-efficiency motor design.

Typical applications

■ Mechanical arm

The robotic arm is the most widely used automated mechanical device in the field of robotics technology, and its presence can be seen in industrial manufacturing, medical treatment, entertainment services, military, semiconductor manufacturing, and space exploration. Although they have different forms, they all share a common feature of being able to receive instructions and accurately locate a certain point in three-dimensional (or two-dimensional) space.

■ High speed cutting machine

High speed cutting machine combines ultrasonic welding technology with traditional cutting. When the ultrasonic generator is working, the ultrasonic energy is transmitted to the welding head through the ultrasonic transducer and violently vibrates and rubs against the cutting die, thereby achieving the cutting effect, making the cut products more beautiful, sturdy, and efficient in production.

■ Rotary die cutting machine

The rotary die cutting machine performs die cutting processing with the continuous rotation of a rotary cutter and is one of the most efficient types of die cutting machines. The circular blade die cutting achieves the purpose of die cutting by compressing the material between the cutting edge and the anvil roll. This improves both the speed and precision of die cutting. Additionally, it can achieve one-time product forming through multi-axis registration die cutting, overcoming the disadvantages of traditional multiple die cutting processes.

■ 16-axis high-speed winding machine

A high-speed winding machine is equipment used to wind linear objects onto specific workpieces, commonly used for winding copper wire. Traditionally, high-speed winding was achieved by combining a variable frequency motor with a tension control system. However, with the increasing demand for efficiency in modern industry, servos can replace the original variable frequency motors to achieve high-speed and highly efficient production.

■ Three-servo packaging machine

Packaging machinery refers to machines that can complete all or part of the packaging process for products and goods. The packaging process includes main operations such as filling, wrapping, and sealing, as well as related pre- and post-operations like cleaning, stacking, and disassembling. Additionally, packaging can involve operations such as measuring and stamping on the package. Using machinery to package products can improve productivity, reduce labor intensity, accommodate the needs of large-scale production, and meet cleanliness and hygiene standards.

XINJE SERVO software（DS5 series）

Help users better understand the operation of the equipment

■ Servo communication interface

Efficient and fast communication identification

Xinje servo software can do Modbus-RTU communication with servo driver through RS232, and can automatically read motor parameters without viewing motor code.

■ Parameter setting interface

Intuitive and understandable parameter setting

Xinje servo software has the functions of reading, modifying, saving and downloading, and is equipped with detailed parameter description. The parameter list directly indicates the effective time of parameters with different colors, which makes the distinction more eye-catching.

■ Curve acquisition interface

Convenient and practical curve acquisition

Xinje servo software has powerful servo data acquisition function, including speed, position, current, bus voltage and other basic information acquisition. Help you have a deeper and comprehensive understanding of servo operation and improve the control scheme.

XINJE SERVO software （DS5 series）

■ Real time observation interface

Real time dynamic curve observation

Xinje servo software can collect basic information such as speed, torque, position and bus voltage to help you understand the servo operation in real time and adjust the control scheme efficiently and timely.

■ Parameter comparison interface

Simple and clear parameter comparison

The parameter comparison function of Xinje servo software allows customers to easily compare preset values, current driver values, file values, and pairwise comparison of the current upper computer interface.

■ Mechanical property measurement interface

Precise resonance recognition

Xinje software has the function of mechanical characteristic measurement, which can automatically measure the resonance frequency according to the operation of mechanical load. It is equipped with five notch filters to ensure the stable and reliable operation of the equipment and sweep away the load vibration.

■ Gain adjustment interface

Fast adjustment

The fast adjustment / self-tuning mode can identify the inertia. The user can configure the appropriate mode, method, load type, foundation and other parameters according to the equipment operation status for the upper computer to set the best gain parameters, or adjust the rigidity level according to the equipment operation status.

■ Monitor interface

Rich and comprehensive real-time monitoring

Xinje servo software has real-time status, alarm monitor and servo operation status, which are all under your control.

Self-turning interface

■ Tool interface

Motor selection tool

Xinje servo software has its own motor selection tool, which automatically matches the best motor model through the selection of equipment components and the establishment of motion model.

Electronic gear ratio conversion

Xinje servo software can accurately calculate the number of pulses per revolution and electronic gear ratio of screw, disc and pulley mechanical structures according to the mechanical specifications.

Peripheral device wiring

DS5 series

Power supply

Three-phase 220VAC   Three-phase 380VAC

Display and setting
Monitor and display parameter alarms. Use buttons to set parameters, monitor displays, etc.

Wiring circuit breaker
In order to take protective measures for the wiring and machine, it is necessary to connect a circuit breaker.

Noise filter
Used to suppress noise from power cables.

DS5 series servo driver

PC/HMI

Electromagnetic contactor
Used to cut off the power supply of the servo drive when an alarm occurs.

Fuse
To protect the machine, please make sure to use.

PLC/motion controller

External regeneration resistor
Note: When an external regeneration resistor is required, please remove the P+ and D short connectors and set the relevant parameters.

For motor transfer

Power cable connected to PEPE

Servo motor   Encoder connector

Safety precautions:
1. Check if the power supply and wiring of L1/L2/L3 are correct.
2. Confirm whether the phase sequence of the servo motor output U/V/W terminal is correct.
3. When using an external regeneration circuit, please disconnect the P+ and D terminals, and connect the external regeneration resistor to the P+ and C terminals. If using a built-in regenerative resistor, short-circuit the P+ and D terminals and disconnect the P+ and C terminals.

Naming rule

MS6 servo motor naming rule

MS6H - 80 C N 30 B Z 3 - 2 0P7 - □
① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑩ ⑪

① Inertia type

Symbol	Inertia
MS6L	Ultra-low inertia motor
MS6S	Low inertia motor
MS6G	Medium inertia motor
MS6H	High inertia motor

② Frame

Symbol	Frame
25	Frame 25
40	Frame 40
60	Frame 60
80	Frame 80
100	Frame 100
110	Frame 110
130	Frame 130
180	Frame 180
200	Frame 200
220	Frame 220
265	Frame 265

③ Encoder structure

Symbol	Type
C	Magnetic encoder
T	Optical encoder

④ Encoder specification

Symbol	Specification
M	Multi turn 17-bit
N	Single/multi turn integrated 19-bit
L	Multi turn 23-bit
H	High performance multi turn 23-bit

⑤ speed

Symbol	Rated speed(rpm)
15	1500
20	2000
25	2500
30	3000

⑩ Rated power

Symbol	Rated power(kW)
0A5	0.05
0P1	0.1
0P2	0.2
0P4	0.4
0P7	0.75
0P8	0.85
1P0	1
1P3	1.3
1P5	1.5
1P8	1.8
2P0	2.0
2P3	2.3
3P0	3.0
4P4	4.4
5P5	5.5
7P5	7.5
11P0	11
13P0	13
17P0	17
21P0	21
27P0	27
30P0	30
48P0	48
60P0	60
75P0	75

⑥ Motor shaft specification

Symbol	Shaft specification
A	With key, no oil seal, with threaded hole
B	With key, with oil seal, with threaded hole
C	No key, no oil seal, with threaded hole
D	No key, with oil seal, with threaded hole
E	Special shaft specifications (length, shaft diameter, etc.)

⑦ Power-off brake

Symbol	Power-off brake
Z	With brake
empty	Without brake

⑧ Motor connector type

Symbol	Connector type
2	Aviation connector
3	Connection form
4	Amp plug (motor body IP67)

⑨ Power supply voltage

Symbol	Power supply voltage
2	220V
4	380V

⑪ Motor heat dissipation method

Symbol	Heat dissipation method
Default	Natural heat dissipation
F	Air cooling
Y	Liquid cooling

*NOTE: The provided explanation is only an example, please refer to the detailed parameters of the motor for specific models. Our company provides combination models of CM, CN, TL, and TH. Currently, only the MS6 series 130 flange 2.3kW and 180 flange 5.5kW and

Motor driver specification list

*Note: 1. Choose either forward outlet or reverse outlet.
2. Select either CMT or CMBT for connection cables, choose CMT for non-brake models and CMBT for brake models.
3. CPT-SCT-M-length refers to the encoder cable length, where "T" in CPT stands for high-flex encoder cable, and "T" in SCT stands for encoder aviation plug with threaded hole.
4. If using an adapter cable, purchase the corresponding B1 motor encoder cable and power cable.
5. For forward outlet, optional oil-resistant cable materials include CPG-SE-M/BM-length, CMG-E03A-length, and CMG-E05A-length.
6. High protection models can choose FH series drivers.

Selection and configuration list

I MS6 series

DS5 series is compatible with MS6-B2 series motors

*NOTE: E2 motor is a special shaft diameter motor. The special shaft diameter for 2.3kW motor is 22mm, and for 5.5kW and 7.5kW motors, it is 35mm.

Product accessories

Quick connector
• Provide convenient wiring terminals
• For 100W~15kW drivers.

Absolute value battery box
• Battery box model: CP-B-BATT
• The battery is not rechargeable

JC-CB bus cable
• EtherCAT motion bus dedicated communication cable
• Adopting industrial grade Category 5e four-core Ethernet cable

Adapter cable
• Power cable
• Encoder cable

CMT-EP03   CMBT-EP05   CPT-EP

Power cable   Encoder cable

Power cable
• Provide standard cable length specifications: 2/3/5/8/10/12/16/20/25/30 meters
• Customizable length
• Optional purchase of cable connectors (excluding cables)

Encoder cable
• Provide standard cable length specifications: 2/3/5/8/10/12/16/20/25/30 meters
• Customizable length
• Optional purchase of cable connectors (excluding cables)

Regenerative resistor
• Release bus capacitor regeneration voltage
• Please refer to the user manual for the selection of regeneration resistors

DB9F side cable
• Provide cable specifications of 1.5 meters
• Can be connected to a PC to achieve control of the servo upper computer

DM6C series multi-axis servo driver

Powerful performance | precise intelligent control | quality choice

EtherCAT

Product characteristics

■ Safe and reliable

Standard STO function

◆ Support STO. When the safe torque function is enabled, the internal hardware circuit of the drive will trigger, forcibly shutting down the power transistor of the drive, causing the motor to stop running and protecting personal and equipment safety.

24V control power supply independent supply

◆ The panel supports independent 24V control power supply, and can still communicate with the upper computer even when the main circuit is not powered.

Speed

Time

■ Space saving, convenient wiring, flexible configuration

◆ The design of equal-height and equal-depth book-style modular units allows for compact side-by-side installation, maximizing cabinet space utilization.

◆ Only one set of power cables is needed. Inside, a reliable connection between modules is achieved through a common bus with copper bars and screw locking.

◆ Inverter modules of 15KW and below use plug-in power terminals, saving approximately 30% in wiring time.

DM6-4110P0-R+3*DM6C-415P0-M

Flexible combination

◆ By using a combination of rectifier and inverter modules, taking the 110kW rectifier unit as an example, the following inverter module combinations are possible:

Rectifying unit | Inverter module

110kW + 15kW 15kW 15kW 3kW 750W 400W

Rectifying unit | Inverter module

110kW + 7.5kW 7.5kW 7.5kW 7.5kW 7.5kW 7.5kW

Product characteristics

■ Efficient and energy-saving

DC common busbar, energy-saving and environmentally friendly

- Using common DC bus technology for energy exchange, reducing energy loss of the driver, expected to save up to 30% electricity, more energy-efficient.

Up to **30%**

■ High protection

- Independent air duct design to prevent dust or foreign objects from entering the control circuit.
- Enhance the three proofings to improve the environmental resistance of the driver.

■ High dynamic response, vibration suppression, and efficient tuning

- 3kHz speed loop response bandwidth. Synchronization cycle 250μs. High dynamic response, improving production efficiency.

- Advanced control algorithms provide the optimal solution for achieving fast and flexible results in fast positioning systems.

Speed loop:

Gain (dB)

3kHz

-3

-10

Frequency (Hz)   2200   3000

Resonance suppression

- The resonance suppression control algorithm can effectively shorten the tuning time, eliminate mechanical resonance, and make path tracking smooth and accurate.
- Resonance frequency automatic inspection, with stronger usability.
- The accuracy of vibration frequency recognition has been improved by 50%.
- The resonance frequency analysis time is reduced by 50%.

Resonance suppression **OFF**   Resonance suppression **ON**

— Feedback speed
— Torque command

Mechanical end vibration suppression

- By using advanced control algorithms, vibration and noise suppression at the mechanical end can be achieved. Effectively solve the vibration at the end of the cantilever beam mechanism, shorten the tuning time, and improve product accuracy.

No mechanical end vibration suppression function

Enable mechanical end vibration suppression function

Technical specification

	Model	Inverter unit
Specification		DM6C-M series
Basic specification	Power range (KW)	0.4KW-75KW
	Input power supply	DC537V-679V
	Control circuit power supply	DC24V
	Encoder feedback	19-bit/23-bit communication encoder
	Control mode	PWM control, sine wave current drive mode
	Using environment — Ambient temperature	Operation:-10℃~40℃ (no condensation)/Storage:-20℃~60℃ (no condensation)
	Ambient humidity	Operation/Storage: Below 90%RH (no condensation)
	Vibration/impact resistance	4.9m/s²/19.6m/s²
	Function — Protection function	Overvoltage, undervoltage, overheating, overcurrent, overload, overspeed, excessive position deviation, output short circuit, encoder abnormality, overtravel protection, oscillation protection, etc.
	STO	Standard configured
	Communication interface	USB Type-C，RS-485，EtherCAT
	Display and operation	6-digit LED indicator light, power indicator light, 5 buttons operation
	Position output — Frequency division function	Yes
	Collector Z-phase output	Yes
	Analog input	No
I/O signal	Digital input (SI)	6 channels
		Servo enable, alarm clear, prohibit forward rotation, prohibit reverse rotation, torque limit selection, internal speed selection, mode switching
		Pulse input prohibition, zero speed locking, position deviation clearing, internal position step change signal, internal control mode direction switching
	Digital output (SO)	4 channels
		Positioning completed, servo ready, alarm output, torque limit output, same speed detection, rotation detection, speed reached
		Brake release output, warning output
Position control mode	Pulse command mode	Not support
	Control mode	Internal position/EtherCAT motion bus
	Feedforward compensation	0~100% (set the resolution to 1%)
	Positioning completed width setting	1~65535 instruction units (set resolution to 1 instruction unit)
	Electronic gear ratio	1/65530≤B/A≤65535
Speed control mode	Control method	Internal three-segment speed, external speed mode
	Instruction smoothing method	Low-pass filter, smoothing filter
	Analog input — Voltage range	NO
	Input impedance	NO
	Torque limit	Internal parameters
	Speed change rate	When the rated external load changes from 0% to 100%: below ±0.01% (at rated speed)
		Rated voltage ±10%: 0.01%(at rated speed)
		Environmental temperature of 20 ± 25℃: below ±0.01% (at rated speed)
Torque control mode	Control mode	Internal torque
	Analog input — Voltage range	NO
	Input impedance	NO
	Speed limit	Internal parameters
Bus control mode	Communication protocol	EtherCAT protocol

	Model	Rectifying unit
Specification		DM6-R series
Basic specification	Power range (KW)	22KW，45KW，75KW，110KW，160KW
	Input power supply	Three phase AC380V~440V, 50Hz/60Hz
	Control circuit power supply	DC24V
	Control mode	Three phase full wave rectification IPM, PWM control, sine wave current drive mode
	Using environment — Ambient temperature	Operation:-10℃~40℃ (no condensation)/Storage:-20℃~60℃ (no condensation)
	Ambient humidity	Operation/Storage: Below 90%RH (no condensation)
	Vibration/impact resistance	4.9M/S²/19.6M/S²
	Protection function	Overvoltage, undervoltage, overheating, oscillation protection, phase loss protection, etc

DL6 series
fully functional linear drive servo driver

High positioning accuracy

Reliable operation

Newly debugging serial port

Efficient tuning

High dynamic response

Fully functional

Gantry function

XINJE DL6 AC220V-2.8A

XINJE DL6 AC220V-6.0A

Product features

High dynamic response

- 3.8kHz speed loop response bandwidth. Synchronization period 250μs. High dynamic response improves production efficiency.

- Advanced control algorithms provide the optimal solution for achieving fast and flexible results in fast positioning systems.

Speed loop

Gain（dB）

3,5kHz

Frequency（Hz）　　　　2200　3500

Suppress vibration, Efficient tuning

Resonance suppression

- The resonance suppression control algorithm can effectively shorten the tuning time, eliminate mechanical resonance, and make path tracking smooth and accurate.
- Resonance frequency automatic inspection, with stronger usability.
- The accuracy of vibration frequency recognition has been improved by 50%.
- The resonance frequency analysis time is reduced by 50%.

Resonance suppression **OFF**　　Resonance suppression **ON**

— Feedback speed
— Torque command

Mechanical end vibration suppression

- By using advanced control algorithms, vibration and noise suppression of mechanical ends can be achieved. Effectively solve the vibration at the end of the cantilever beam mechanism, shorten the tuning time, and improve product accuracy.

No mechanical end vibration suppression function　　Enable mechanical end vibration suppression function

Fully functional

- The DL6 series is equipped with long line drive, frequency division output, position comparison output, probe function, motor temperature sampling and other functions.

■ Reliable operation

Dynamic braking

◆ When there is a power outage or alarm during the operation of the motor, the servo will be turned off, and the three-phase circuit of the motor will be short circuited. The servo motor will quickly stop, thus protecting the safety of people and machines.

Inverter module

Servo motor

Dynamic brake

Control signal

Brake resistor

STO function

◆ Support STO. When the safety torque function is enabled, the internal hardware circuit of the driver will trigger, forcibly shutting down the power transistor of the driver, causing the motor to stop running and protecting personal and equipment safety.

Speed

STO

Torque output

Command speed

Actual speed

Time

Torque off

Multiple protection functions

◆ Support multiple protection functions, such as ground short circuit protection, P- overcurrent protection, etc., with ultra-low failure rate, users can use it with more peace of mind.

・Ground short circuit protection

・ P- overcurrent protection

■ Higher positioning accuracy

◆ The positioning accuracy compensation function helps achieve higher absolute positioning accuracy.

■ Equipped with a brand new upper computer debugging serial port

◆ Standard Type-C debugging port.

■ Gantry function

◆ Introducing a new gantry synchronization algorithm, the two axes are highly synchronized during motion, ensuring high response and synchronization performance even at high speed.

Technical specification

	Item		DL6 series linear drive servo driver
Basic specification	Input current		Single phase/three-phase AC200~240V, 50Hz/60Hz;three-phase AC380V~440V,50Hz/60Hz
	Encoder feedback		ABZ incremental encoder, absolute Biss-c encoder
	Control method		Three phase full wave rectification IPM, PWM control, sine wave current drive mode
	Control mode		Position mode, speed mode, torque mode
	Using environment	Ambient temperature	Operation:-10℃~40℃ (no condensation)/Storage:-20℃ ~60℃ (no condensation)
		Ambient humidity	Operation/storage: below 90% RH (no condensation)
		Vibration/impact resistance	4.9m/s² / 19.6m/s²
		Installation site	A place without dust, dry, vibration, or corrosive substances
		Installation method	Vertical or horizontal installation
	Function	Protection function	Overvoltage, undervoltage, overheating, overcurrent, overload, overspeed, analog input abnormality, excessive position deviation, output short circuit, encoder abnormality, regeneration abnormality protection, overtravel protection, oscillation protection, phase loss protection, etc
		Dynamic brake	Standard configured
		Communication function	EtherCAT bus communication
		Braking resistor	Built-in braking resistor, external braking resistor available
		Display and operation	5-digit LED indicator light, power indicator light, 4 buttons operation
I/O signal	Digital input		7 channels input
			Two channels of high-speed SI support probe function
	Digital output		4 channels digital output
			Positioning completed, servo ready, alarm output, speed reached, rotation detection, torque limit output, same speed detection, brake release output

Low voltage servo system

iMF5 Series
Integrated Low-voltage Servo Drive Motor

iMF5 Series Integrated Low-voltage Servo Drive Motor

■ Comprehensive Protection

Built-in overvoltage, undervoltage, short circuit, and dual over-temperature protection (built-in thermistor), creating multiple safety barriers.

■ Strong Overload Capacity

Triple overload capacity ensures stable operation during heavy load startup and instantaneous impacts.

■ Worry-free Wiring

Built-in 24V brake power supply simplifies wiring, saving time and effort.

■ Integrated and Compact

Integrated drive and control design, compact structure, effectively saving space and installation wiring.

■ Wide-range Power Supply

24-60VDC wide voltage input, adaptable to various industrial environments, reducing power supply configuration complexity.

■ Multi-protocol Integration

Integrates CANopen and Modbus RTU for easy system integration and networking.

DF3 series low voltage servo driver

■ Appearance innovation
New appearance design, rich interfaces, compact size, lightweight body, meeting the equipment installation requirements of the AGV industry

■ Powerful functionality
Support multiple control modes, built-in 24V brake output, alarm synchronous braking and other functions to meet customer usage requirements

■ Diverse communication
Support multiple communication protocols such as CANopen and MODBUS to meet different communication function requirements of users

■ Easy debugging
Gain adjustment only requires three steps, greatly reducing equipment debugging time and greatly improving on-site debugging efficiency

MF series low voltage servo motor

■ The body is shorter
Optimize magnetic circuit structure, further shorten motor size, MF5H has a 30% reduction in body compared to MF3S

■ Overload capacity
The entire series comes standard with triple overload, making it faster and more stable to start and stop under overload conditions

■ Accuracy guarantee
The motor comes standard with a self-developed 17-bit magnetic encoder, greatly improving positioning accuracy

■ Excellent performance
The insulation level has reached the highest F level in the industry, fully ensuring the stability of on-site applications

■ Protective capability
The protection level reaches IP67, making it easy to cope with harsh environments such as oil, water vapor, and dust, ensuring the reliability of the motor

Adjust the communication station number of the low-voltage servo by using the DIP switches SW1-SW4 (Excluding DF3E-0410-A, DF3E-0206)

Station number	SW1	SW2	SW3	SW4
1	ON	OFF	OFF	OFF
2	OFF	ON	OFF	OFF
3	ON	ON	OFF	OFF
...	...	...	...	...
15	ON	ON	ON	ON
16	OFF	OFF	OFF	OFF

SW7 and SW8 control whether the internal terminal resistance of RS485 is turned on

| RS485 internal terminal resistance		
SW7=ON	SW8=ON	Turn ON
SW7=OFF	SW8=OFF	Turn OFF

SW9 and SW10 control whether the internal terminal resistance of CAN is turned on

CAN internal terminal resistance		
SW9=ON	SW10=ON	Turn ON
SW9=OFF	SW10=OFF	Turn OFF

Typical wiring diagram

The interface circuit for open collector/differential signal pulse input is shown in the wiring diagram below:

Open collector type (24V)

PLC, CNC, SCM, etc | Servo driver

Y0, COM0, +24V, Y1, COM1, 0V | P-, P+5V, P+24V, R=3.3K, D-, D+5V, D+24V, R=3.3K

Shield layer

When the higher-level device adopts open collector output, please note to suspend P+5V and D+5V when using this connection method.

*Note: ① The power supply voltage range for P-/P+24V and D-/D+24V is 18V~28V. If it is below 18V, there may be pulse and direction abnormalities.
② To resist interference, please make sure to use twisted pair shielded wires.

Differential type (5V)

PLC, CNC, SCM, etc | Servo driver

PUL-, PUL+, DIR-, DIR+, 0V | P-, P+5V, P+24V, 150Ω, D-, D+5V, D+24V, 150Ω

Shield layer

When the higher-level device uses 5V differential signal output, use the diagram connection method. Please note to suspend P+24V and D+24V.
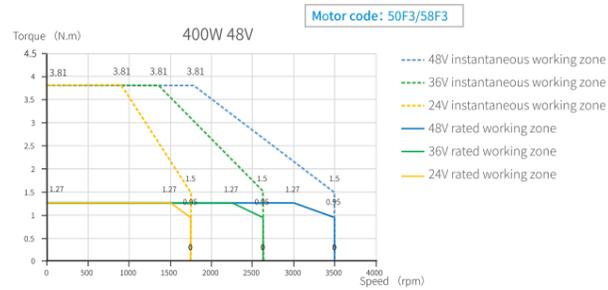

*Note: ① The power supply voltage range for P-/P+5V and D-/D+5V is 3.3V~5V. If it is lower than 3.3V, there may be pulse and direction abnormalities.
② To resist interference, please make sure to use twisted pair shielded wires.
③ The servo pulse input port is conducting at 10mA.

VH6 | VH1 | VHL | VH5

VH6 fully functional closed-loop vector inverter

VH6 series is a fully functional closed-loop vector converter developed by Xinje company. The product adopts vector control technology, which realizes the open-loop and closed-loop vector control of asynchronous and synchronous motors, and also strengthens the reliability and environmental adaptability of the product. In addition, the product provides a wealth of expansion cards for customers to choose from to meet customers' diversified needs.

It is suitable for machine tools, air compressors, papermaking, oil fields, municipal engineering, plastic machinery industry, metal processing, textile industry, printing and packaging, ceramic machinery, wood processing, cable processing, sewage treatment, and other fields.

Multifunctional Network Port

• Connect the LCD panel to realize dialogue interaction
• Connect the debugging software, observe the motion waveform and effectively analyze the problem
• The inverter software is easy to upgrade

Panel

• Chinese/English LCD display keyboard and LED keyboard are rich in information and convenient for debugging
• It has multi-functional combination keys, which can realize remote and local switching,emergency shutdown, etc
• The LCD panel contains a parameter storage chip, which is convenient for users to store,upload and download parameters. It is especially suitable for batch supporting customers, which can greatly save debugging time and improve installation efficiency
• Support up to 5m extension cable

Appearance and protection

• The new narrow book body design saves installation space
• EMC and high protection design, stable operation of equipment
• The built-in circuit board has enhanced protection, which can effectively resist the harsh environment such as humidity, corrosion and dust
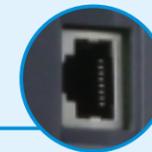

I/O Expansion Card

• I/O terminals with different functions are designed in different colors, which greatly reduces the probability of user wiring errors
• The terminals are pluggable for easy maintenance and replacement
• Quick wiring of spring terminals, no need to worry about screw slip

PG card feedback

• Support photoelectric encoder and rotary encoder, suitable for high-precision driving occasions
• PG card supports 0 to 255 arbitrary frequency division multiple output
• Support differential, collector and push-pull signal input

Motor adaptability

• Support asynchronous motor, synchronous motor
• Support three control modes VF / open loop vector / closed loop vector

## Networking function

• Optional communication card CANopen，EtherCAT,Profinet, thernet/IP networking with control products
• Modbus communication is equipped with 32 groups of customer free mapping addresses to realize continuous reading of parameters
• The two-channel network ports are in from the bottom and out from the top, with switch function, and the wiring is clean and concise
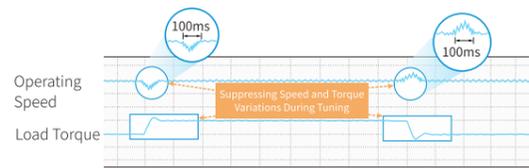

Outstanding Product Performance

High-speed Operation

The maximum output frequency of the VH6 series has been increased to 1000Hz, suitable for applications requiring high-speed rotation and maximum control over speed and torque variations. High-frequency output is a primary focus of Xinje's long-term research.

frequency（Hz）	100	250	400	550	700	850	1000	1000Hz
V/F Control								
Vector Control with Speed Sensor								
Vector Control without Speed Sensor								

*Note: Maximum output frequency is 1000Hz for asynchronous motors, 600Hz for synchronous motors.
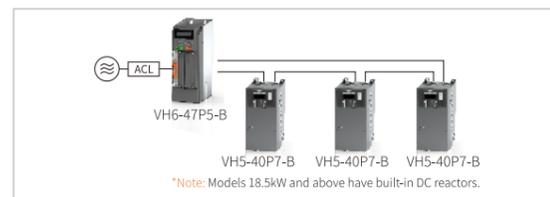

Enhanced Adaptability to Impact Loads

- Achieves the highest level of torque response to sudden, severe load changes.
- Using the motor's current feedback, the motor rotor's speed and position are used to regulate the motor's output current and torque, thereby minimizing changes in the motor's operating speed, which can suppress vibration.

100ms   100ms

Operating Speed

Suppressing Speed and Torque Variations During Tuning

Load Torque

Energy Saving and Environmental Protection

- The DC reactor not only improves the power factor to achieve energy-saving effects but also weakens the initial power-on impact and reduces harmonic interference.
- Using a common DC bus allows multiple inverters to be connected. During deceleration, the regenerative energy is shared and can be consumed by other inverters, thereby achieving energy savings.

ACL

VH6-47P5-B

VH5-40P7-B   VH5-40P7-B   VH5-40P7-B

*Note: Models 18.5kW and above have built-in DC reactors.

Braking Unit Power Range Expanded

The standard configuration power range has been expanded, making the control cabinet structure more compact and cost-saving.

Power Range

Output (kW)	0.75	3.7	15	30	45	55	75	90	110	110kW
Three-phase 380V Series	Stay tuned									

## High Speed Regulation Accuracy

Expanded speed control range helps stabilize speed fluctuations and improves the precision of mechanical actions.

Speed Control Range (consistent with technical specifications)

|	Control Method	Speed Ratio	Base Speed
Asynchronous Motor	V/F Control	1：50	90rpm~1500rpm
	Vector Control without Speed Sensor	1：100	9rpm~1500rpm
	Vector Control with Speed Sensor	1：2000	3rpm~1500rpm

More Advanced Torque Vector Control

- The VH6 series is equipped with IGBT integrated modules, achieving up to 180% torque output when starting at 0.5Hz, while also supporting 150% heavy-duty output for 1 minute and 180% overload for 3 seconds every 300 seconds.
- Low frequency 0.5Hz — Starting torque 180%.

Torque Characteristic Example (Representative Model: 22kW)

扭矩 (%)   180 150 100 50 0 -50 -100 -150 -200 -250

150 250 500   750   1000 1250 1500 1750 2000

Optional External Panel

In addition to the standard 7-segment LED 5-digit display operator panel, optional operator panels with LCD screens and knob speed adjustment are also available.

LCD Panel VH6-PC100   Knob Panel VH6-PE200

1 Text Display
Equipped with an LCD screen of excellent clarity. Supports Chinese and English display and switching. Monitors inverter operating status.

2 USB Interface
Powers the LCD panel using a 5V power supply, e.g., a power bank. The inverter does not need to be powered on to perform operations such as adjusting parameters and downloading parameter sets.

3 Built-in MCU Storage Chip
One-click download and upload of backup parameters, supporting up to 10 sets of parameter backups. Allows parameter adjustments guided by Chinese prompts without the manual.

1 Indicator Light Display
Newly added current, voltage, and frequency display indicator lights for comprehensive monitoring of inverter operating status.

2 Easy Operation
The panel uses a potentiometer knob for speed adjustment, facilitating inverter debugging.

Multiple Communication Methods

- Standard built-in isolated 485 communication interface supports Modbus-RTU communication protocol.ncy, energy utilization, and safety of mechanical equipment.
- Supports expansion with various mainstream bus communications.

Optional Communication Card Types

1 CANopen：VH6-CN100
2 EtherCAT：VH6-CC100
3 Profinet：VH6-CP100
4 Ethernet/IP：VH6-CE100
5 Modbus-TCP *Coming soon

Convenient and Fast PC Debugging

- Using Xinje USB-to-serial converter and JC-EV-15 to connect the inverter to a PC, debugging through "Xinje Inverter Debugging Software" is more convenient,Improves debugging efficiency, and has file saving functionality.
- As a software accessory for the inverter, it enhances the product's overall capabilities.

Xinje Inverter Debugging Software

Life Diagnosis and Maintenance Functions

As standard, all inverters have internal temperature monitoring and can detect ambient temperature. Furthermore, the machine's status can be easily confirmed through the operator panel and PC software, allowing for early detection of potential faults, effectively reducing production equipment maintenance time and downtime.

Technical Specifications

Item name	VH6 high performance closed loop vector frequency inverter specification		
Input — Power range	3.7kW~450kW		
Rated voltage, frequency	Three-phase 380V: three-phase 380V, 50/60Hz		
Allowable voltage fluctuation range	Three-phase 380V: 320~440V		
Output — Voltage	0~input voltage		
Frequency	0~1000Hz		
Control performance — Control motor type	Asynchronous motor, permanent magnet synchronous motor, variable frequency motor		
Control mode	Vector control with speed sensor (FVC)	Vector control without speed sensor (SVC)	V/F control (VF)
Speed precision	±0.2%	±0.5%	±1%
Speed fluctuation	±0.2%	±0.3%	±0.5%
Speed regulation range	1:2000	1:100	1:50
Startup torque	0Hz:180%	0.5Hz:150%	1.0Hz:150%
Torque accuracy	±5% rated torque	±10% rated torque	/
Torque response	≤10ms	≤20ms	/
Overload ability	150% rated current 60s		
Frequency precision	Low frequency operation mode: 0.01Hz, high frequency operation mode: 0.1Hz		
Frequency resolution	Low frequency operation mode: digital setting-- 0.01Hz, analog setting - - max frequency ×0.1% High frequency operation mode: digital setting - - 0.1Hz, analog setting - - max frequency ×0.1%		
Control terminal input — Digital input channel	Up to 7-channel digital input X, card A has 4-channel (X1~X4), resolution is less than 2ms, card B has 3-channel (X5~X7), X4 can support max 50kHz high speed pulse input		
Analog input channel	Up to 3-channel analog input AI, card A has 2-channel (AI1, AI2), resolution is less than 20mV, card B has 1 channel (AI3). AI1, AI2 support 0~10V or 0~20mA input , AI3 support -10~10V input, can support PT100 input		
Control terminal output — Digital output channel	Up to 4-channel digital output Y, card A has 1 channel (Y1) + 1 channel (TA1TB1TC1), card B has 1 channel (Y2) + 1 channel (TA2TB2TC2).Y2 can support max 50kHz high speed pulse output		
Analog analog channel	Up to 2-channel analog output AO, card A has 1 channel (AO1), card B has 1 channel (AO2) AO1, AO2 support the output 0~10V or 0~20mA		
Product performance — Start command given mode	Communication given (Modbus、CANopen、EtherCAT、Profinet、Ethernet/IP), operate panel given, terminal given		
Frequency given mode	Communication given (Modbus, CANopen, EtherCAT), operate panel given, terminal given, analog AI given, multi-speed given, simple PLC given, PID main and auxiliary given		
Typical function	Frequency main and auxiliary operation, no reverse rotation, torque increase, nine VF curve settings, five section AI curve settings, acceleration and deceleration curve settings, terminal delay and filtering, terminal multi-functional input and output, DC braking, dynamic braking, jog operation, 16-section speed, built-in two-channel PID, speed tracking restart, carrier modulation, fault recording, fault self reset, pre-excitation start, 30 groups of user-defined parameters		
Important function	Carrier modulation, torque control, motor self-tuning, current limiting control, overvoltage control, undervoltage control, speed tracking, droop control, oscillation suppression, overvoltage overcurrent stall control, automatic voltage regulation (AVR), automatic energy-saving operation, etc		
Protection function	Power on motor short circuit detection, input and output phase loss protection, overcurrent protection, overvoltage protection, undervoltage protection, overheat protection, overload protection, underload protection, overcurrent overvoltage stall protection, relay pull in protection, terminal protection, instantaneous power failure nonstop, etc		
Dynamic braking	380V level driver: brake unit braking voltage: 650~750V. 3.7kW~110kW models have built-in brake unit, please connect brake resistor between P+ and PB		
DC reactor	18.5kw and above models are built-in DC reactors		
Common DC bus	Share the regenerative energy when the frequency converter decelerates, improve the braking capacity, achieve the purpose of energy saving and save the additional space and cost required by the resistance		
Features function — Multiple bus support	Standard Modbus, can expand EtherCAT、CANopen、Profinet、Ethernet/IP		
Multiple encoder support	Incremental Encoder/Tamagawa Serial Encoder		
LCD panel	LCD display, parameter setting, status monitoring, parameter copy, fault analysis and location, program download, mass storage of parameters		
Instant stop nonstop	In case of instantaneous power failure, the load feedback energy compensates for the reduction of voltage to maintain the continuous operation of the frequency converter in a short time		
Timing control	Timing control function: time range 0.1min~6500min		
Multi-motor switching	Two groups of motor parameters can realize the switching control of two motors		
Motor overheating protection	AI3 supports PT100 sensor signal input		
Flexible and diversified terminal functions	There are 51 kinds of multifunctional terminals X, 41 kinds of terminals Y, and 19 kinds of logic function options AO, which meet the requirements of general frequency converter control functions		
Communication customization parameters	It is convenient for users to read and write the parameters of the frequency converter continuously		
Software	Rich background monitoring functions to facilitate on-site data acquisition and debugging		
Display and keyboard — Keyboard display	It can display the set frequency, output frequency, output voltage, output current, input and output status and other parameters		
Key lock	Realize partial or full locking of keys to prevent false triggering		
Parameter copy	Standard LED display digital potentiometer keyboard, optional LCD English display keyboard (parameter upload/download)		
Optional accessories	LCD keyboard, communication card (EtherCAT, CANopen,Profinet,Ethernet/IP), encoder PG card (incremental pulse, resolver)		
Environment — Place of use	Indoor, free from direct sunlight, no dust, corrosive gas, combustible gas, oil mist, water vapor, drip or salt		
Altitude	Less than 1000m (When it is higher than 1000m, the output current needs to be reduced by about 10% of the rated current for each increase of 1000m)		
Ambient temperature	-10℃~+40℃(please derate to use or enhance the heat dissipation when ambient temperature is 40℃~50℃)		
Ambient humidity	Less than 95%RH, no condensation of water droplets		
Vibration	Less than 5.9m/s2 (0.6g)		
Storage temperature	-40℃~+70℃		
Protection level	IP20		
Cooling mode	Forced air cooling		
Installation mode	Wall mounted and embedded

Accessory Description

Standard I/O card
VH6-A100

1 channel RS485 communication + 2 channels AI +1 channel AO + 4 channels bipolar input + 1 channel YT + 1 channel YR

Expansion I/O card
VH6-B100

1 channel AI + 1 channel AO + 3 channels bipolar input + 1 channel YT + 1 channel YR

CANopen communication card
VH6-CN100

The expansion interface card specially designed for CANopen protocol is suitable for Xinje frequency converter. Xinje frequency converter can be connected to CANopen network and exist as a slave station through this card.

EtherCAT communication card
VH6-CC100

The expansion interface card specially designed for EtherCAT protocol is suitable for Xinje frequency converter. Xinje frequency converter can be connected to EtherCAT network and exist as a slave station through this card.

Profinet Communication Card
VH6-CP100

This is an expansion interface card specifically designed by Xinje for the Profinet protocol, tailored for Xinje inverters. Through this card, Xinje inverters can be connected to the industrial Ethernet communication standard led by Siemens, enabling efficient and reliable data communication between devices.

Ethernet/IP Communication Card
VH6-CE100

This is an expansion interface card specifically designed by Xinje for the Ethernet/IP protocol, tailored for Xinje inverters. Through this card, Xinje inverters can be connected to the Ethernet-based communication protocol, mainly used for communication between industrial automation devices. The specific implementation mechanism of the Ethernet/IP protocol is primarily based on the combination of CIP (Control and Information Protocol), TCP/IP, and Ethernet.

Simple incremental encoder PG card
VH6-DM200

It is used for receiving and detecting motor encoder signal by frequency converter. The frequency converter can control the motor speed and torque more accurately. The types of encoder signals that this PG card can receive are: differential type, NPN collector open circuit, push-pull type. However, this PG card does not support frequency division output function.

Multi-function Incremental Encoder PG Card
VH6-DM100

This is an upgraded version of VH6-DM200, supporting incremental encoder signals with signal types: differential, NPN open-collector output.Key Upgrade: Receives pulse input signals from the host PC (Pulse+Direction, AB Phase, CW/CCW pulse forms), enabling the inverter to perform position control, while the motor encoder signal can be output externally through the frequency division function.

Simple Tamagawa Protocol Communication-type Encoder PG Card
VH6-DC200

Can adapt to Tamagawa communication protocol absolute encoders, supporting 17-bit/21-bit/23-bit resolution. Does not support pulse input + frequency division output function.

LCD panel
VH6-PE100

The panel is LED display, which can set parameters, monitor the operation status of the frequency converter and operate the frequency converter.

Knob panel
VH6-PE200

The panel uses a knob to adjust the speed, which can set parameters, monitor the operation status and facilitate the speed control of the frequency converter.

LCD panel
VH6-PC100

The panel adopts LCD display, which can set parameters, upload and download parameters, monitor the operation status of the frequency converter, and facilitate the debugging of the frequency converter.

Upper computer connection cable
JC-EV-15

To connect the frequency inverter and PC, to connect the frequency inverter software and update the firmware.

Panel expansion cable
JC-RD-30

The extension cable of the operation panel is a standard network cable, which only provides 2 or 3 meters. Users can also make other lengths of network cables by themselves.

Mounting base
VH6-DPANEL

Base of VH6 frequency converter operation panel during extension installation. Model: VH6-DPANEL

Expansion card protection cover
VH6-A100-PC

It can be used for protection of VH6 converter A/B expansion card.

Optional Mounting Base
VH6-PE200-DPANEL-HC

Optional base for VH6-PE200 knob panel external mounting VH6-PE200-DPANEL-HC

VH1 open-loop vector VFD

The VH1 series is a single-phase 220VAC and three-phase 380VAC open-loop vector frequency converter launched by Xinje Company based on the market demand for small power, small volume, and simple speed regulation. As an economical frequency converter with small volume and large capacity, the VH1 series has significant advantages such as high EMC specification design and high protection. It can be widely used in small automated application machinery represented by woodworking carving, food canning, automated production lines, packaging equipment, logistics conveyor lines, edge banding machines, etc.

Operate panel

- Adjustable knob design for simpler speed regulation
- Multifunctional indicator light, rich in information and impressions

Appearance and protection

- Small volume, compact and exquisite design
- Guide rails side by side installation, saving time and effort
- Strengthening the coating to improve product protection, easily facing oil mist, moisture, and corrosion environment

- The entire series is equipped with built-in RFI filters, effectively reducing EMC external interference and ensuring stable equipment operation
- Standard RS485 communication, building a multi-axis control system
- Full range of modular machines to enhance product stability
- A brand new ARM platform system that supports both asynchronous and synchronous motors
- Supports external LCD panels, enabling one click parameter download and upload
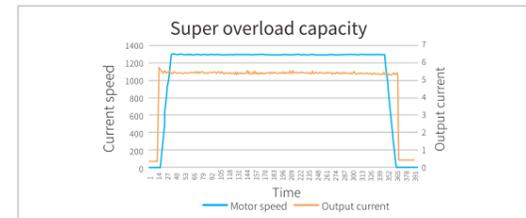

Excellent product performance

■ Integrated and versatile

- Support VF and SVC algorithms.
- Based on a brand new ARM platform, it supports synchronous and asynchronous simultaneously. (2.2KW and above support).

Support multiple algorithms
☑ VF   ☑ SVC

Vh1 VFD

Asynchronous motor   Synchronous motor

■ High specification EMC design

The entire series is equipped with built-in RFI filters, effectively reducing EMC external interference and meeting precision control requirements.

Amplitude/dBμV

Frequency/MHz

■ Debugging is easy and fast

- The potentiometer type adjustable knob makes speed regulation easier.
- Support external LCD panel for one click parameter download upload.
- Support upper computer software debugging, making on-site frequency converter debugging and monitoring more convenient and efficient.

Adjustable knob   External LCD panel   Debugging software

■ The air duct is completely isolated from the PCB board

Independent air duct design, smooth heat dissipation, ensuring long-term stable operation of electronic components.
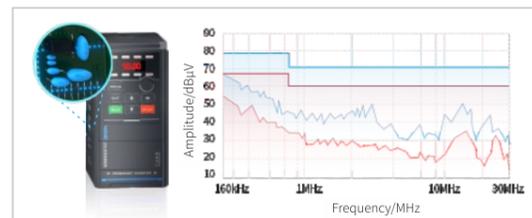

■ Heavy load output

- The VH1 series comes standard with an IGBT integrated module, achieving 150% overload output for 1 minute.
- The VH1 series comes standard with braking function to ensure stable equipment shutdown for a long time.

Super overload capacity

Current speed

Output current

Time
— Motor speed — Output current

■ Compact design

- Optimal power density design to minimize product volume.
- Support seamless parallel installation in the smallest space (ambient temperature below 40°C).
- Support screw installation and rail installation.

Technical specification

Item		VH1 open-loop vector VFD
Power range		0.4kW～75kW
Input	Rated voltage, frequency	3AC 380V；50/60Hz 1AC 220V；50/60Hz
	Permissible voltage fluctuation range	±15%
Output	Voltage	0~input voltage
	frequency	0～600Hz
Control performance	Control motor type	Asynchronous motor, synchronous motor
	Control mode	V/F control (VF), vector
	Speed accuracy	±1%
	Speed fluctuations	±0.5%
	Speed regulation range	1：50
	Starting torque	1.0Hz：150%
	Torque accuracy	/
	Torque response	/
	Overload capacity	G-type 150% rated current 60 seconds, P-type 120% rated current 60 seconds
	Frequency accuracy	Low frequency operation mode: 0.01Hz, High frequency operation mode: 0.1Hz
	Frequency resolution	Digital setting -0.01Hz, analog setting - maximum frequency × 0.1%
Control terminal input	Digital input channel	Standard configuration: 5 digital inputs X, supports NPN and PNP inputs
	Analog input channel	Standard configuration: 2 analog inputs AI, AI1 supports 0-10V and 0-20mA, AI2 supports 0-10V
Control terminal output	Digital output channel	Standard configuration: 1 digital output Y and 1 relay output (supports one pair of normally open)
	Analog output channel	Standard configuration: 1 analog output AO, supports 0-10V voltage output
Function	Starting command setting mode	Setting through communication(Modbus), operate panel and terminals
	Frequency setting mode	Setting through communication(Modbus), operate panel, terminals, analog input, multi-speed, simple PLC, PID, main and auxiliary
	Typical functions	Frequency main and auxiliary operation, reverse run prohibition, torque improving, nine V/F curve settings, five segments AI curve settings, acceleration and deceleration curve settings, terminal delay and filtering, terminal multifunctional input and output, DC braking, energy consumption braking, jog operation, 16 multi-speeds, built-in two channels PID , speed tracking restart, carrier modulation, fault recording, fault self reset, preexcitation start, 30 sets of user-defined parameters
	Key functions	Carrier modulation, torque control, motor self-tuning, current limiting control, overvoltage control, undervoltage control, speed tracking, droop control, oscillation suppression, overvoltage overcurrent stall control, automatic voltage regulation (AVR), automatic energy-saving operation, etc
	Protection function	Power on motor short circuit detection, input/output phase loss protection, overcurrent protection, overvoltage protection, undervoltage protection, overheating protection, overload protection, underload protection, overcurrent and overvoltage stall protection, relay excitation protection, terminal protection, instantaneous power failure without stopping, etc
	Energy consumption braking	under 37kW Built in braking unit, suitable braking resistor needs to be selected
Feature	Fieldbus	Modbus
	LCD panel	LCD display, parameter setting, status monitoring, parameter copying, fault analysis, program download, and high-capacity storage of parameters
	Instantly stop without stopping	During an instantaneous power outage, the reduction in voltage is compensated through load feedback energy to maintain the frequency converter's continued operation for a short period of time
	Timing control	Timing control function: Set the time range from 0.1Min to 6500.0Min
	Multi-motor switching	Two sets of motor parameters can achieve switching control between two motors
	Diversified terminal functions	The multifunctional terminals X have 51 types, Y has 41 types, and AO has 19 logical function options, meeting the conventional control function requirements of general VFD
	Communication customization parameters	Convenient for users to continuously read and write VFD parameters
	Software	Rich backend monitoring functions, convenient for on-site data collection and debugging
Display and keyboard	Keyboard display	It can display various parameters such as set frequency, output frequency, output voltage, output current, input/output status, etc
	Key lock	Implement partial or complete locking of buttons to prevent accidental triggering
	Parameter copying	Standard LED digital potentiometer keyboard, optional LCD display keyboard (parameter download)
	Optional accessories	LCD keyboard
Environment	Place of use	Indoor, not exposed to direct sunlight, without dust, corrosive gases, flammable gases, oil mist, water vapor, dripping water or salt, etc
	Altitude	Below 1000 meters. (When the height exceeds 1000 meters, it needs to be used with a reduced rating. For every additional 1000 meters of height, the output current will decrease by about 10% of the rated current.)
	Surrounding temperature	-10℃~+40℃ (ambient temperature between 40℃~50℃, please reduce the rating or enhance heat dissipation)
	Surrounding humidity	Less than 95% RH, no water droplet condensation
	Vibration	Less than 5.9m/s2(0.6g)
	Storage temperature	-40℃~+70℃
	Protection level	IP20
	Cooling method	Forced air cooling
Installation		Wall-mounted and DIN-rail mount (2.2 kW and above), DIN-rail mount (below 2.2 kW). The DIN-rail width is 35 mm.

Accessory

Knob panel VH1-PE100

The panel adopts a knob for speed regulation, which can set parameters, monitor the VFD operation status, and facilitate VFD debugging.

VHL general open-loop vector converter

VHL series is a general open-loop vector converter developed by Xinje Company. With the book structure design, the volume is greatly reduced compared with the previous generation of products, and at the same time, the appearance value and protection level are significantly improved. The internal coating is strengthened, which conforms to the 3C3 standard. The whole system is equipped with IGBT integrated module, which can achieve 150% heavy load output. It can be widely used in wire drawing machines, air compressors, livestock farms, grinders, wire cutting, edge banding machines and other application machinery.

Operation Panel

- Shuttle keyboard design, easy for customers to adjust speed
- Silicone key design, greatly improved touch feeling
- White LED and blue indicator light, full of sense of technology

Motor terminal UVW

- Support 150% 60s interval 300s overload
- Support asynchronous synchronous motor control

Appearance and protection

- Book structure design, saving installation space
- Independent air duct design can prevent dust from entering the inverter to cause short circuit and other faults, and improve reliability
- Close the body to prevent foreign matters and ensure the long-term stable operation of electronic components
- The coating is strengthened to prevent oil mist and moisture corrosion, meeting 3C3 standard

Control terminals

- Quick wiring of spring terminals, no need to worry about screw slipping

Excellent Product Performance

Overload capacity

VHL-20P7-B SVC mode 1.5 times overload curve

Time unit: 200ms

Current A

— Actual output current   — Rated current

VHL inverter 1.5 times overload time 60s

Debugging is easy and quick

- The flywheel keyboard design makes speed adjustment easier.
- Silicone keyboard design, significantly enhancing the tactile sensation and making it more effortless to use;
- Supports imported LCD liquid crystal panels and enables one-click download of parameters.

Shuttle keyboard design   Silicone keyboard design   Support for imported LCD liquid crystal panels

Book-style structural design

- Book-style structure design, reducing the volume by 30%.
- The installation area has been reduced by 70%.

Technical Specification

Item name		VHL general open-loop vector converter	
	Power range	0.4kW~5.5kW	
Input	Rated voltage, frequency	3AC 380V;50/60Hz 1AC 220V;50/60Hz	
	Allowable voltage fluctuation range	±15%	
Output	Voltage	0~input voltage	
	Frequency	0~600Hz	
Control performance	Control motor type	Asynchronous motor, synchronous motor	
	Control mode	Vector control without speed sensor (SVC)	V/F control (VF)
	Speed precision	±0.5%	±1%
	Speed fluctuation	±0.3%	±0.5%
	Speed regulation range	1:100	1:50
	Startup torque	0.5Hz:150%	1.0Hz:150%
	Torque accuracy	±10% rated torque	/
	Torque response	≤20ms	/
	Overload ability	150% rated current 60s	
	Frequency precision	0.01Hz	
	Frequency resolution	Digital setting-- 0.01Hz, analog setting - - max frequency ×0.1%	
Control terminal input	Digital input channel	Standard: 5 digital bipolar input X terminal	
	Analog input channel	Standard: 2 analog input AI1/AI2, support 0~10V voltage input or 0~20mA current input	
Control terminal output	Digital output channel	Standard: 1 multi-functional Y1 output terminal, 1 group of TA TB TC relay output terminal	
	Analog analog channel	Standard: 1 analog output terminal AO1, support 0~10V voltage output or 0~20mA current output	
Product performance	Start command given mode	Communication given (Modbus), operate panel given, terminal given	
	Frequency given mode	Communication given (Modbus), operate panel given, terminal given, analog AI given, multi-speed given, simple PLC given, PID main and auxiliary given	
	Typical function	Frequency main and auxiliary operation, no reverse rotation, torque increase, nine VF curve settings, five section AI curve settings, acceleration and deceleration curve settings, terminal delay and filtering, terminal multi-functional input and output, DC braking, energy consumption braking, jog operation, 16-section speed, built-in two-channel PID, speed tracking restart, carrier modulation, fault recording, fault self reset, pre-excitation start, 30 groups of user-defined parameters	
	Important function	Carrier modulation, torque control, motor self-tuning, current limiting control, overvoltage control, undervoltage control, speed tracking, droop control, oscillation suppression, overvoltage overcurrent stall control, automatic voltage regulation (AVR), automatic energy-saving operation, etc	
	Protection function	Power on motor short circuit detection, input and output phase loss protection, overcurrent protection, overvoltage protection, undervoltage protection, overheat protection, overload protection, underload protection, overcurrent overvoltage stall protection, relay pull in protection, terminal protection, instantaneous power failure nonstop, etc	
	Dynamic braking	Built-in brake unit, please select suitable brake resistor	
Features function	Multiple bus support	Standard Modbus	
	Multiple encoder support	LCD display, parameter setting, status monitoring, parameter copy, fault analysis and location, program download, mass storage of parameters	
	Instant stop nonstop	In case of instantaneous power failure, the load feedback energy compensates for the reduction of voltage to maintain the continuous operation of the frequency converter in a short time	
	Timing control	Timing control function: time range 0.1min~6500min	
	Multi-motor switching	Two groups of motor parameters can realize the switching control of two motors	
	Flexible and diversified terminal functions	There are 51 kinds of multifunctional terminals X, 41 kinds of terminals Y, and 19 kinds of logic function options AO, which meet the requirements of general frequency converter control functions	
	Communication customization parameters	It is convenient for users to read and write the parameters of the frequency converter continuously	
	Software	Rich background monitoring functions to facilitate on-site data acquisition and debugging	
Display and keyboard	Keyboard display	It can display the set frequency, output frequency, output voltage, output current, input and output status and other parameters	
	Key lock	Realize partial or full locking of keys to prevent false triggering	
	Parameter copy	Standard LED display digital potentiometer keyboard, optional LCD English display keyboard (parameter upload/download)	
	Optional accessories	LCD keyboard	
Environment	Place of use	Indoor, free from direct sunlight, no dust, corrosive gas, combustible gas, oil mist, water vapor, drip or salt	
	Altitude	Less than 1000m (When it is higher than 1000m, the output current needs to be reduced by about 10% of the rated current for each increase of 1000m)	
	Ambient temperature	-10°C~+40°C (please derate to use or enhance the heat dissipation when ambient temperature is 40°C~50°C)	
	Ambient humidity	Less than 95%RH, no condensation of water droplets	
	Vibration	Less than 5.9m/s2 (0.6g)	
	Storage temperature	-40°C~+70°C	
	Protection level	IP20	
	Cooling mode	Forced air cooling	
Installation mode		Wall mounted and embedded	

Installation Dimension Drawing （unit: mm）

VHL-20P4/20P7/40P4/40P7/41P5-B

VH5 general type open loop vector frequency inverter

VH5 series is a general-purpose open-loop vector frequency converter developed by Xinje company. It has the remarkable characteristics of small volume, better cost performance and high reliability. At the same time, VH5 series can be combined with communication expansion card to realize EtherCAT, CANopen and other high-speed bus networking.

VH5 can be widely used in automatic production lines, textile, woodworking, engraving machines, logistics equipment, food filling, food packaging and other miniaturized mechanical equipment.

Operate panel

Communication expansion card

The communication expansion card supports EtherCAT, CANopen.

**Power supply terminal RST**

Control terminal
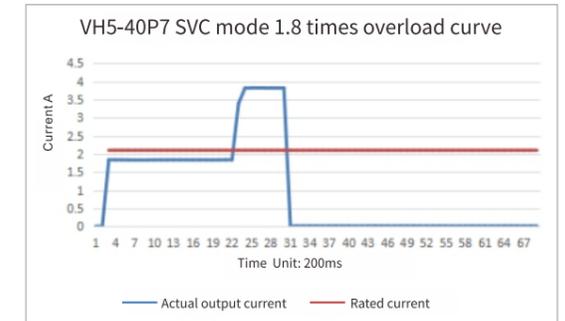

Motor terminal UVW

EMC grounding terminal

VH5 frequency converter is equipped with one RS485 communication port as standard. In addition,it can be added to EtherCAT and CANopen networks through the special communication expansion card and exist as a slave station.

Excellent Product Performance

Overload ability

VH5-40P7 SVC mode 1.5 times overload curve

Time Unit: 200ms

— Actual output current   — Rated current

VH5 frequency converter 1.5 times overload time 60 seconds

VH5-40P7 SVC mode 1.8 times overload curve

Time Unit: 200ms

— Actual output current   — Rated current

VH5 frequency converter 1.8 times overload time 1 second

Speed fluctuation

VH5-40P7 SVC mode speed fluctuation curve

Time Unit: 200ms

VH5 frequency inverter speed fluctuation ±0.3%

Built-in Braking Transistor

Further expands the standard configuration power range, helping to make the control cabinet structure more compact and save costs.

Item	Output (kW)	0.75	1.5	2.2	3.7	5.5
VH5	Single-phase 220V					
	Three-phase 220V					
	Three-phase 380V					

2.2kW   5.5kW

Rich Network Functions

- Standard built-in 485 communication interface supports Modbus communication protocol.
- Supports expansion with various mainstream bus communications.

Optional Communication Card Types

1 CANopen：VH5-CN100
2 EtherCAT：VH5-CC100

Globally Applicable

Complies with various standard certifications and meets overseas safety standards.

🌐 European Region   🇺🇸🇨🇦 North America / Canada

EC Directive (CE Mark)   UL Standard / CUL Standard

CE   ETL Intertek

Note: VH5 series 0.75~3.7kW inverters comply with ETL certification, supporting equipment export to North America. Please contact us if needed.

HSV6 Series Ring Spinning Machine Specific Inverter

This is a specialized product developed by Xinje for the application characteristics of the textile industry. Through a through-wall structural design, it reduces the secondary pollution of the inverter, thereby improving the temperature and air flow inside the electrical cabinet. The product adopts vector control technology and provides expansion cards for customer selection, maximizing the customer's product competitiveness.

Excellent Product Performance

■ Enlarged Heat Sink

The use of heat pipe process heat sinks and phase-change material thermal grease provides stronger heat dissipation and ensures long-term stable operation under temperature. The increase in heat dissipation area helps improve heat port flow, thereby increasing heat dissipation and allowing it to easily handle fanless situations.
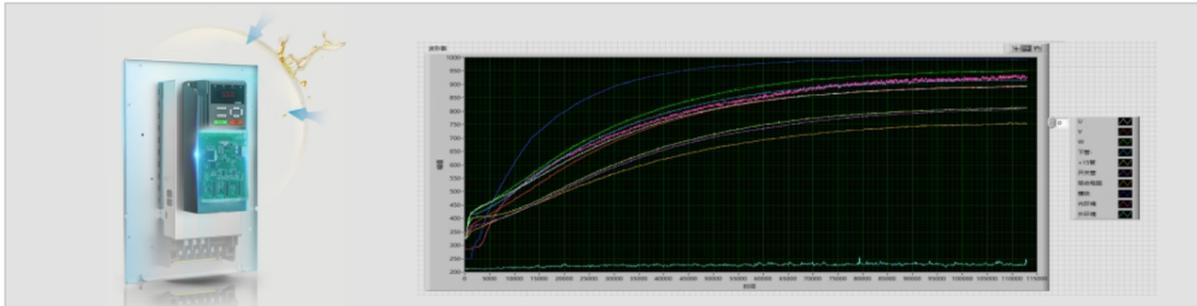

■ Capacitor Capacity Doubled

- To meet the textile dust and lint protection requirement, the inverter's fan has been removed.
- To meet the high-temperature environment application requirement in textiles, capacitor temperature resistance is rated for 125°C for 3000 hours.
- To meet the heat dissipation requirement in textiles, the inverter's reactor has been removed, and the capacitor capacity is suitable for stable shutdown in common bus power failure scenarios.

■ Triple-protection Enhanced

Based on the IP20 protection rating, triple-protection is enhanced. All components are temperature resistant to 125°C, allowing it to easily handle high-temperature and humid conditions in the textile industry.

■ Common Bus System

- The adoption of common bus technology can reduce the number and cost of equipment while also lowering maintenance costs.
- The inverter integrates a power failure ride-through function. In the event of an unexpected system power outage, the inverter can use feedback energy to operate without stopping for an effective period, while ensuring the equipment shuts down steadily, thereby improving the production efficiency of textile equipment.

Stepper System

Fieldbus Stepper | RS485Integrated Drive & Control Stepper

Pulse-type Stepper | Stepper Motor

Bus type stepping driver

DP3C closed-loop bus stepping driver

- Integrating EtherCAT bus technology
- Fast response
- Strong anti-interference ability
- Significantly improved performance

DP3CL open loop bus stepping driver

- Excellent value
- Low cost while retaining the high performance and stability of DP3C

■ Integrating EtherCAT bus technology, the communication is faster

Support COE (CANopen over EtherCAT) protocol, conform to the CiA402 standard and support 32 axes. Support the master stationwith standard EtherCAT protocol. The communication cycle between the master station and the slave station can reach 32 axes 1ms at most.

■ Simple wiring and convenient equipment maintenance

A network cable replaces the traditional pulse direction signal cable, and is equipped with power cable and encoder cable, making the wiring simpler. It can greatly reduce the cable cost, labor cost and maintenance cost.

■ Higher reliability and anti-interference

Relying on the low bus load and point-to-point physical layer of EtherCAT bus, it can greatly suppress the generation of interference and clutter, and significantly improve the reliability and anti-interference ability of the system.

■ A new generation of control algorithm with better performance

EtherCAT bus technology combined with the latest control algorithm, greatly improves the performance

The torque is increased, which significantly improves the high-speed performance of the motor, up to 2000rpm.

Bus-type Stepper Drive

DP3C1 Series Closed-loop EtherCAT Bus Stepper Drive

- **Compact Design, Space-saving:**
  Thin and compact body, effectively saves control cabinet installation volume, better suited for high-density layout requirements.

- **Convenient Wiring, Efficient Maintenance:**
  Optimized wiring method, significantly improves wiring efficiency, reduces maintenance time, and lowers operating costs.

- **Intelligent Current Regulation, Stable Temperature Control:**
  Real-time current adjustment based on load and speed for smoother operation and significantly reduced motor heating.

- **Rich Interfaces, Flexible Configuration:**
  Equipped with 6 input and 2 output signal interfaces, supporting various function settings such as probe, limit, home, alarm, and brake to meet diverse application needs.

- **EtherCAT Bus, Strong Anti-interference:**
  Relies on low bus load and point-to-point physical layer architecture to effectively suppress interference and noise, enhancing system reliability and anti-interference capability.

- **Encoder Feedback, Eliminates Lost Steps:**
  Uses real-time encoder position feedback and deviation compensation to fundamentally solve the lost-step problem of traditional stepper motors for more precise positioning.

DP3CL1 Series Open-loop EtherCAT Bus Stepper Drive

- **Compact Structure, Flexible Layout:**
  The new generation product is significantly optimized in size. Taking the DP3CL1-705 as an example, the body thickness is only 28mm, reducing volume by about 20% compared to the previous generation, effectively saving control cabinet installation space and providing greater flexibility for equipment structural design.

- **Bus Communication, Stable and Reliable:**
  EtherCAT bus communication based on the CIA402 standard, paired with shielded network cable connection, offers stronger anti-interference capability compared to traditional pulse interfaces, adapts to complex industrial electromagnetic environments, making system operation more stable and reliable.

- **Intelligent Temperature Control, Lower Heat Generation:**
  Features dynamic current adjustment function, automatically adjusting output current based on load, significantly improving motor temperature rise during medium to high-speed operation. Supports automatic half-current and 128 micro-stepping technology, reducing current to 50% during standstill or low speed, minimizing vibration and loss, and extending motor and drive lifespan.

- **Integrated Wiring, Cost-saving:**
  Uses bus-type connection, where one network cable replaces multiple pulse wires, greatly simplifying wiring work, reducing cable and labor costs. Supports hot-plug functionality for easy troubleshooting and maintenance, effectively lowering the total lifecycle cost.

Application Scenarios

Wire strippers, marking machines, plotters, medical equipment, electronic processing, engraving machines, laser machines, cutting machines, etc.

RS485 Integrated Control Stepper Driver

DP3S Series Closed-loop RS485 Communication Stepper Driver

- Featuring isolated RS485 design for reliable communication
- Built-in single-axis controller (PR) saves pulse output points of PLC
- Closed-loop control prevents missed steps
- Configurable 16-segment motion paths, supporting homing/position limit/positioning/speed/JOG functions
- Supports IO control for multi-speed control
- Supports broadcast control, one master multiple slaves

DP3SL Series Open-loop RS485 Communication Stepper Driver

- Featuring isolated RS485 design for reliable communication
- Built-in single-axis controller (PR) saves pulse output points of PLC
- Supports station number settings for up to 31 axes
- Configurable 16-segment motion paths, supporting homing/position limit/positioning/speed/JOG functions
- Supports IO control for multi-speed control.

Application Scenarios

DP3S and DP3SL series drivers are suitable for conveyor systems, transfer stations, textile industry, etc.

Pulse type stepping driver

DP3F1 closed-loop pulse stepping driver

- ■ Closed loop control and torque lifting to prevent step loss
- ■ Higher running speed and acceleration
- ■ More stable operation at low speed
- ■ The plug-in wiring is simple and fast
- ■ Pulse and direction input voltage support 5V and 24V
- ■ Comprehensive overvoltage,overcurrent, undervoltage and short circuit protection functions

Applicable occasions: various small and medium-sized automation equipment and instruments, such as engraving machine, stripping machine, cutting machine, etc.

DP3L1 open loop pulse stepping driver

- ■ Smaller size and space saving
- ■ Reliable quality and excellent performance
- ■ Large output, fast speed, stable operation and low temperature rising
- ■ Pulse direction supports 5~24V
- ■ New open loop IO stepping driver:
  Dial code speed regulation, IO trigger, stable start and stop, uniform speed, widely used in conveying equipment, docking station, PCB feeder

Applicable occasions:all kinds of small and medium-sized automation equipment and instruments, such as labeling machine,3C, photovoltaic, lithium battery, bearing, labeling canned, winding machine

DP3L high voltage open loop pulse stepping driver

- ■ Supply voltage 220~240VAC
- ■ Pulse and direction input voltage support 5V and 24V
- ■ New control algorithm, significantly improved performance
  The medium and high speed torque is 10 ~ 30% higher than the original product

Applicable occasions: slicer, clothing packaging machine, non-woven bag making machine, glove machine, etc.

Vision System

XINJE VISION STUDIO | Vision System Components

XINJE VISION STUDIO 3.7

XINJE VISION STUDIO **3.7**

## Designed Specifically for Machine Vision Engineers

XINJEVISION STUDIO 3.7, as Xinje's self-developed new-generation machine vision application development platform, boasts powerful functionality and flexibility, capable of meeting various complex machine vision application needs. Through drag-and-drop programming and rich HMI interactive modules, it lowers the development barrier, improves development efficiency, and injects new vitality into the development of the machine vision field.

100+ Industry Solutions   **5 Years** Dedicated R&D

Millisecond-level Execution Speed   **Hundreds of Millions of Times** Stable Operation

Advantages

- Drag-and-drop programming, no coding required. Simple dataflow linking and an intuitive, user-friendly interface.
- Built-in calibration algorithms for hand-eye calibration with robots, efficiently achieving pick-and-place and other functions.
- Integrated HMI functionality supports communication with PLCs, enabling mixed programming of PLC interfaces and vision interfaces, reducing costs and improving integration.
- Supports JS script programming, offering powerful functionality and high degree of freedom.
- Provides comprehensive learning material packages to help users get started quickly.

No Programming Required

Drag Icons

Easy Creation

Software Interface

XINJEVISION STUDIO 3.7 possesses various functions such as camera acquisition, image preprocessing, region analysis, detection and positioning, etc.

① Menu Bar
② General Toolbar
③ Project Bar
④ Command Toolbar, Control Bar (switchable)
⑤ Program Editing Bar
⑥ Debugging Interface, HMI (switchable)
⑦ Log Bar

Tool Types

Common: Logic, Camera, Variable

Preprocessing: Preprocessing, Region Analysis, Drawing

Positioning: Shape Fitting, Contour Positioning, Blob Positioning, Grayscale Matching, Motion Calibration, Code Reading, Character Recognition

2D Geometry: Create Shape, Measurement

System: Math, String, Array, Unit Conversion, Time Manager, Other

Communication: Modbus Communication, Serial Port, TCP/IP

Accessories

| Area Scan Industrial Camera

The series of area scan industrial cameras offers multiple resolution options from 0.4MP to 20MP, supporting both global shutter and rolling shutter modes. Its powerful ISP algorithm functions include Gamma correction, noise reduction, sharpening, and SPC correction, ensuring excellent image quality.
Furthermore, the SV series cameras are compatible with GigEVision, USB3.0, and CameraLink protocols, support POE functionality, and adhere to the GenICam standard, enabling high-quality image mixing and processing.

■ Model Parameters

Name	Model	Resolution	CMOS Size(")	Frame Rate (fps)	Shutter Mode	Color	Power Interface	Lens Interface

| Matrix Industrial Camera

SVThe series matrix industrial cameras are compatible with GigEVision/CameraLink protocols and the GenICam standard. The GigE interface supports lossless compression for higher frame rate transmission. The CameraLink interface supports various image format outputs such as Base, Medium, Full, and Deca modes, and supports flat-field correction and wide voltage input.

■ Model Parameters

Name	Model	Resolution	Pixel Size(um×um)	Line Rate(kHz)	Color	Power Interface	Lens Interface

| Industrial Lens

The main function of the SL series industrial lenses is to image the target onto the photosensitive surface of the image sensor. Important parameters for lens selection are resolution, focal length, aperture size, interface type, etc. Rational selection and installation of the lens is a crucial part of vision system design.

Accessories

Fixed-Focus Lens

• Specially designed FA fixed-focus lens for small-pixel cameras, offering excellent imaging quality；
• EF large-aperture universal series & SF positioning hand-eye series, featuring low-light large-aperture, distortion <2%, adjustable aperture, high relative illumination, compact size

■ Model Parameters

Telecentric Lens

• Adopts object-space telecentric design to ensure measurement accuracy
• Various working distances provide convenience for different spatial scenarios
• Magnification covers 0.1–4×
• Applicable to high-precision workpiece positioning, etc.

Accessories

| Light Source

The SJ series light source, as an important component of machine vision systems, has advantages such as fast response speed, long service life, and strong anti-interference capability. Its main function is to improve the brightness of the device under inspection and the image contrast, ensure image stability, reduce the pressure on algorithm processing, and improve the accuracy of visual recognition.

Ring Light

PCB substrate inspection, microscope illumination, liquid crystal calibration

Backlight

Mechanical part dimension measurement, electronic component and IC outline inspection, film spot detection
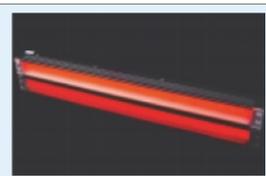

Parallel Backlight

Circuit board component detection and recognition, transparent object dimension measurement, LED ring/dot detection

### Aperture-type Parallel Backlight

Circuit board component detection and recognition, electronic component character recognition, Mark point positioning
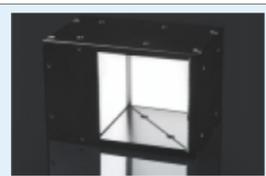

Bar Light

Metal surface inspection, image scanning, surface crack detection, LCD panel inspection

Dome Light
(Integrating Sphere Light Source)

Curved surface, concave/convex surface, arc surface inspection, inspection of surfaces with strong reflection

Coaxial Light

Surface scratch detection, chip and silicon wafer defect detection, packaging barcode recognition

Spot Light

Used with telecentric lenses, Mark point positioning, lens and LCD glass calibration

Accessories

Light Source Controller

The SIC series light source controller is mainly used to supply power to the light source, control the brightness and illumination state (on/off) of the light source. It can also enable strobe lighting by sending trigger signals to the controller, thereby extending the lifespan of the light source.

All XINJE vision controllers are digital controllers. Digital controllers can be remotely controlled via PC devices, allowing users to select different types of controllers based on actual production conditions.
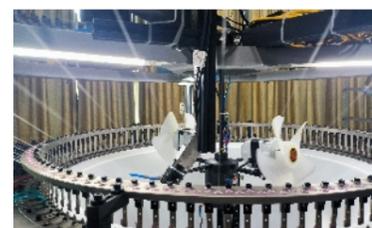

■ Model Parameters

Typical Applications of Vision Systems

Large Circular Knitting Machine Intelligent Inspection System

Vision-Guided 3D Depalletizing System

Vision-Based Lamination System

This system achieves real-time and precise inspection of the large circular knitting machine's manufacturing process. It can detect various defects including holes, oil stains, damaged needles, broken needles, and broken yarn. It operates 24/7 uninterrupted, automatically stopping when defects are encountered to prevent further production of defective products, thereby improving product quality.

The inspection accuracy is up to 95% or higher, with a false detection rate below 5%, reducing defect-related losses by 80%. Its application will bring significant production benefits and competitive advantages to enterprises.

AI + 3D vision-guided robots handle the handling and loading/unloading of various logistics units (cartons, sacks, totes, etc.). They feature fast installation and commissioning. For standard box-type depalletizing, they enable rapid deployment, intelligently recognize different pallet patterns, automatically plan optimal paths, and eliminate the need for recipe switching. This solves the challenge traditional automation faces in handling complex and variable depalletizing scenarios, significantly improving logistics turnover efficiency in fields such as food, consumer goods, supermarkets, express delivery, pharmaceuticals, and chemicals.

The vision-based lamination system is based on the self-developed Xinje Vision Studio platform. It employs CCD visual intelligent positioning in the laminator solution to achieve high-precision alignment, offering high flexibility and compatibility. It can perform rapid parameter adjustment and program optimization according to different production needs and process requirements, adapting to diverse lamination tasks. Traditional manual lamination operations are costly. The vision-based laminator can operate continuously 24/7, saving significant labor. For example, in the mobile phone/3C industry, a vision-based film applicator can save 70% of labor costs compared to manual film application.

Embedded IoT Industrial Controller

UE Series

The UE series embedded IoT industrial controllers adopt Intel Elkhart Lake and Alder Lake-N processors, providing highly reliable core processing units and rich interface resources for equipment. They can be flexibly customized according to actual needs and feature extremely low overall power consumption. Widely used in edge-cloud data processing, smart factories, industrial automation, and other fields.

Expandable IoT Industrial Controller

UF Series

The UF series expandable IoT industrial controller utilizes Intel Coffee Lake processors, allowing users to select the processor type according to actual needs. It delivers powerful computing performance and excellent image processing capabilities. With a wide range of external interfaces, it supports the maximum number of device connections, providing core control unit support for comprehensive solutions in industrial automation and machine vision.

UF1 Series
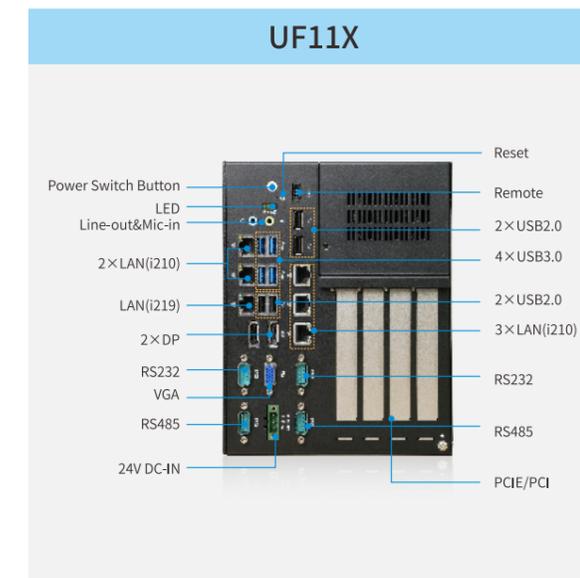

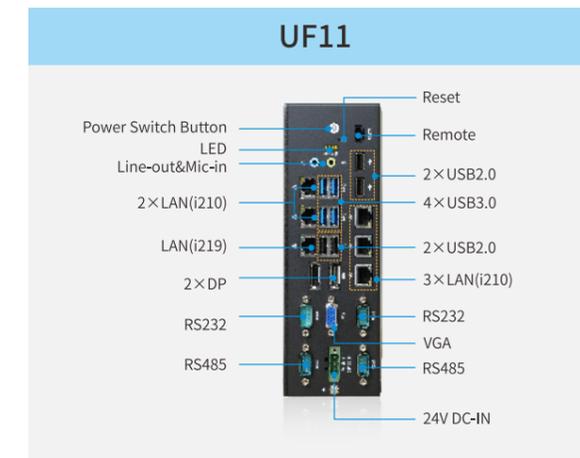

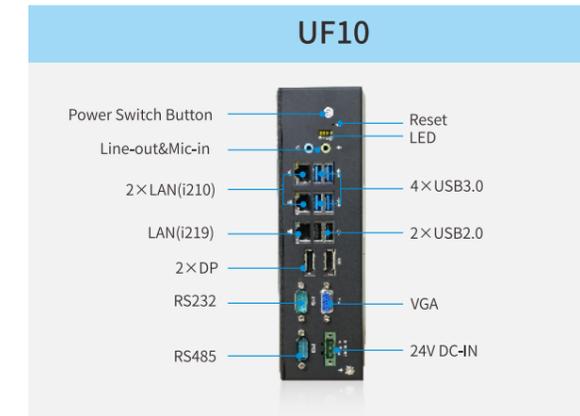

①Multiple-performance Coffee Lake processors available

②Multiple interface solutions available, supporting up to 10 network ports

③Supports 4G/WIFI wireless modules

④Customizable fan version with high heat dissipation efficiency

⑤Strong anti-interference capability, capable of stable and efficient operation in complex environments

Rack-Mounted Industrial Controller

UG Series

The UG series IoT industrial controller adopts the latest Alder Lake processor, housed in a standard 4U rack-mounted industrial chassis. It supports multiple high-performance configuration combinations, offering ultra-high stability and expandability. The large chassis provides efficient cooling space for the motherboard, meeting various usage scenarios and delivering highly reliable processing solutions for industries such as industrial automation, medical, and laser applications.

UG1 Series

①Adopts the latest Alder Lake processors, with full-performance CPUs available

②Standard ATX motherboard solution, supports multiple PCIe/PCI expansions

③Expandable graphics card RTX-4090, supports deep learning AI applications

④Made from high-quality steel plate molding for ultra-high stability

⑤Active cooling solution for excellent performance

Touch All-in-One Machine

UP Series

The UP series embedded touch all-in-one machine adopts Intel Elkhart Lake and Whiskey Lake-U series processors, and features 10.1"/12.1"/15.6"/21.5" industrial-grade high-brightness TFT LCD displays. It supports 10-wire projected capacitive touch, with the entire front panel rated IP65 for water and interference resistance. It is suitable for automation industries such as CNC machinery, CNC processing, 3C, and trajectory guidance.

	Display Area	261.12x163.2mm	344.23x193.54mm	475.2x267.3mm
	Maximum Colors	16.2M	262K	16.7M
	Brightness	400cd/m^2	220cd/m^2	250cd/m^2
	Viewing Angle	178°/178°	178°/178°	178°/178°
	Contrast Ratio	1000:1	400:1	1000:1
Touch Screen	Touch Screen Type	10-wire capacitive multi-touch screen		
	Transmittance	85%		
	Interface Type	USB		
External IO	Display	1xDVI, maximum resolution up to 1920x1200 @60Hz		
	Network Port	4xLAN, Intel i226		
	Serial Port	1xRS-232；1xRS-232/485（BIOS）		
	USB	4xUSB3.0		
Expansion IO	M.2	1xM.2, E-Key 2230, support WiFi		
	M.2	1xM.2, B-Key 3052, support 4G/5G		
Power	Input Voltage	9~36V DC input, 4PIN Phoenix, includes standard 24V adapter		
	Power	max 120W		
	Switch	1x power switch button		
	Reset	1x Reset button, touch to restart		
	Remote	1x Remote, integrated in power section		
	Indicator Lights	4xLED（Power\SATA\USER1\USER2）		
System	OS	Windows10/11、Linux		
Physical Parameters	Dimensions	320x219x65.2mm	390x245x65.2mm	528x322.5x69.2mm
	Weight	3.1kg	3.8kg	6.8kg
	Installation Method	Embedded installation, includes standard mounting clips; supports VESA mount installation		
Environmental Parameters	Operating Temperature	0~60℃, with 0.7m/s airflow		
	Storage Temperature	-40℃~85℃		
	Relative Humidity	10~95% @40℃ (non-condensing)		
	Certification Standards	CE、FCC		

| Interface Description

UP3-C121/C156/C215

LED
4×USB3.0
4×LAN(i226)
DVI
24V DC IN
RS232

Power Switch
RS232/RS485（BIOS Control）
Remote

| Dimension Description （unit：mm）

UP3-C121

UP3-C156

UP3-C215

PCIe Expansion Card

UZ-P Series

Extends image acquisition functionality through the PCIe interface, providing high-speed image transmission channels to meet the demands of high-speed image data transfer.

| Specifications

Attributes	UZ-PL4	UZ-PL4E
Bus Interface	PCI Express x4 Gen2	
Ethernet	4x10/100/1000M bps RJ45 Network Interfaces Full-Duplex, Half-Duplex Intelligent Detection and Auto-Adaptation	
Chip	Intel i210	
Compatible Slots	PCIe 16x/8x/4x	
Network Environment	Gigabit and Below Networks	
Features	Compliant with IEEE 802.1P/802.1Q/802.3 0Base-T/802.3u 100Base-TX/802.3ab 1000Base-T Supports 9KB Jumbo Frames Supports Multi-Card Multi-Camera	Power over Ethernet, Compliant with IEEE 802.3af/at Supports 9KB Jumbo Frames Supports Multi-Card Multi-Camera PoE Power Management PoE Protection
Indicator Lights	ACT: Indicator blinks when the port is transmitting or receiving data LINK: Indicator stays on when the link is normal	ACT: Indicator blinks when the port is transmitting or receiving data LINK: Indicator stays on when the link is normal PoE: Indicator stays on when external devices are powered normally
Power Requirements	-	Using 4-pin power connector, maximum 100W PoE power (+12V@8A) Using PCIe slot, maximum 20W PoE power (+12V@2.1A)
Product Dimensions	140 x 100mm	168 x 112mm
System Support	Windows 10/11、Linux	
Operating Environment	Operating Temperature: 0~70℃	
	Storage Temperature: -40~85℃	
	Relative Humidity: 10~95% @40℃ (Non-Condensing)
